CARE AND MAINTENANCE

Proper care and maintenance will ensure the longevity and appearance of your Delta Trinsic faucet.

- **Cleaning the Finish:** To clean the Champagne Bronze Brilliance finish, use a soft, damp cloth. Avoid abrasive cleaners, harsh chemicals, or polishes, as these can damage the finish. The Brilliance finish is designed to resist corrosion and scratches, making it easy to maintain with simple cleaning.
- **Cleaning the Drain:** The metal push-pop drain is designed for easy cleaning. Simply unscrew the drain stopper from above the deck to remove it. This allows for quick and easy removal of hair and other debris that may accumulate in the sink drain. Reinstall by screwing it back into place.
- **Aerator Maintenance:** If water flow decreases, the aerator may be clogged. Unscrew the aerator from the end of the spout, clean any debris, and rinse thoroughly before reattaching.
