Nispira HAPF300AP

Nispira HAPF300AP AER1 Performance Plus True HEPA Air Purifier Filter Instruction Manual

INTRODUCTION

This manual provides essential information for the installation, operation, and maintenance of your Nispira HAPF300AP AER1 Performance Plus True HEPA Air Purifier Filter. Please read these instructions carefully before use to ensure optimal performance and longevity of your filter.

PRODUCT OVERVIEW

The Nispira HAPF300AP AER1 Performance Plus filter is a True HEPA filter designed to capture airborne particles. It is constructed with a pleated HEPA material and often includes an activated carbon layer for odor absorption.

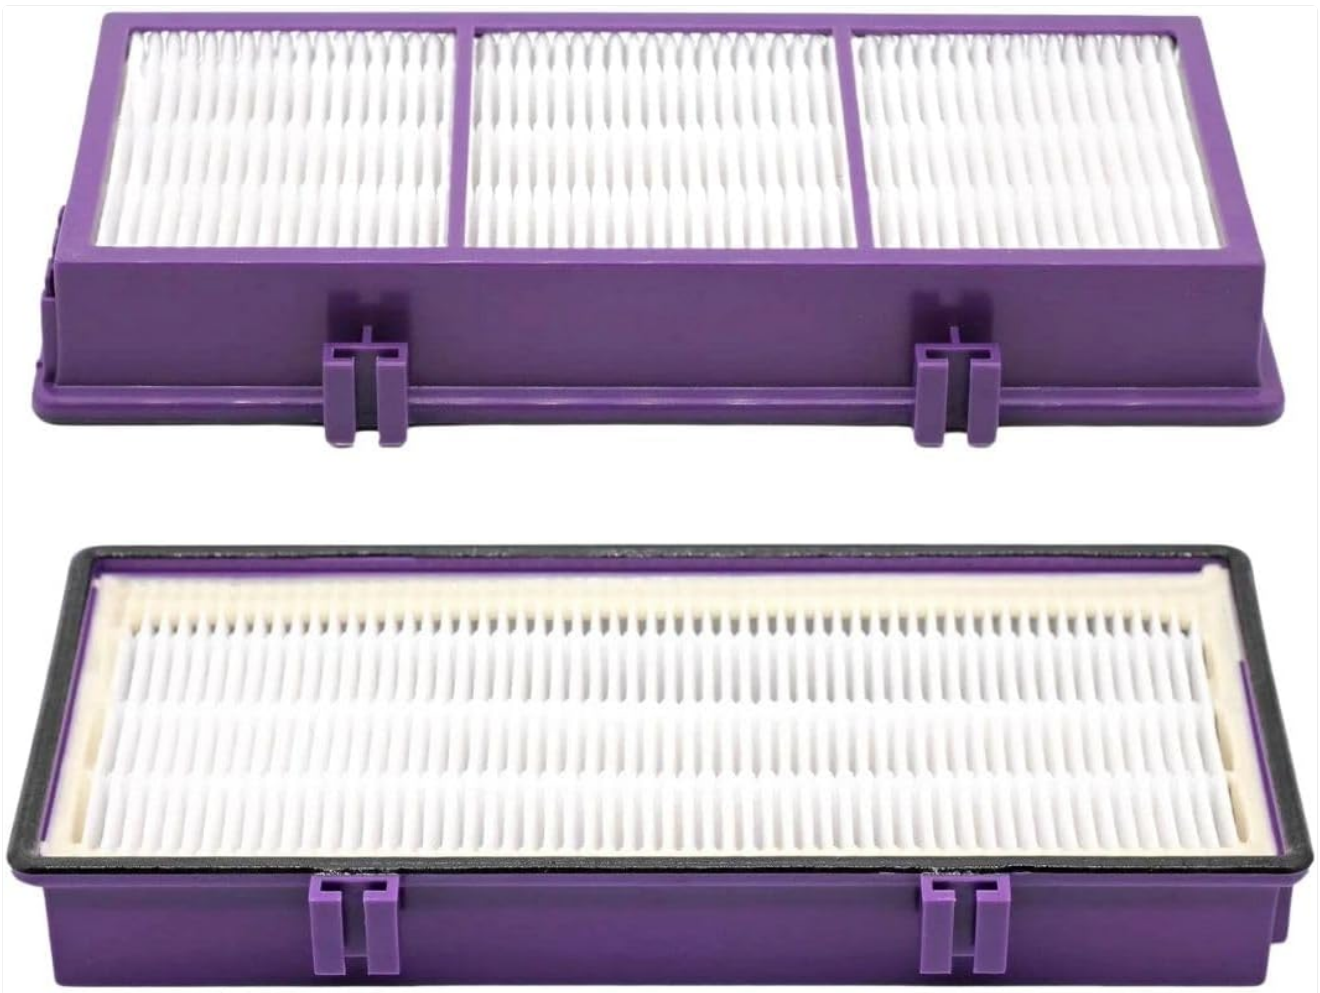

Image: Front and side view of the Nispira HAPF300AP AER1 Performance Plus True HEPA Air Purifier Filter, showing its purple frame and white pleated filter material.

Filter Capabilities:

- **True HEPA Filtration:** Captures up to 99.97% of airborne particles as small as 0.3 microns.
- **Particle Removal:** Effectively removes dust, pollen, pet dander, and other allergens.
- **Odor Reduction:** Activated carbon layer helps reduce common household odors, volatile organic compounds (VOCs), and smoke.

Compatible with the Following

Holmes AERI & Bionaire Air Purifier

Bionaire:

BAP260, BAP815, BAP825, BAP9200, BAP9700, BAP520

HolmesAERI:

HAP242-NUC, HAPF300AH-U4R,
HAPF30AT-U4R, CAP531-U, CAP529-U,
HAP240, HAP242, HAP412, HAP422, HAP424,
HAP706, HAP716, HAP9240, HAP9242,
HAP9412, HAP9414, HAP9422, HAP9424.

COMPATIBILITY

This Nispira HAPF300AP filter is compatible with AER1 ready air purifiers, including various Holmes and Bionaire models. Please verify your air purifier model number against the list below:

Compatible with the Following

Holmes AERI & Bionaire Air Purifier

HolmesAERI:

CAP531-U, CAP529-U, HAP240, HAP242, HAP412, HAP422, HAP424, HAP702, HAP706, HAP716, HAP1702, HAP2400, HAP9240, HAP9241, HAP9242, HAP9243, HAP9412, HAP9413, HAP9414, HAP9415, HAP9422, HAP9423, HAP9424, HAP9425

Bionaire:

BAP260, BAP815, BAP825, BAP9200, BAP9700, BAP520.

Compatible Holmes Units:

- CAP531-U, CAP529-U
- HAP240, HAP242, HAP412, HAP422, HAP424, HAP702, HAP706, HAP716, HAP1702, HAP2400
- HAP9240, HAP9241, HAP9242, HAP9243, HAP9412, HAP9413, HAP9414, HAP9415, HAP9422, HAP9423, HAP9424, HAP9425

Compatible Bionaire Units:

- BAP260, BAP815, BAP825, BAP9200, BAP9700, BAP520, BAP9417, BAP9427, BAP9435

SETUP (INSTALLATION)

Installing the Nispira HAPF300AP filter is a straightforward process. Always ensure your air purifier is turned off and unplugged before attempting filter replacement.

1. **Power Off and Unplug:** Disconnect the air purifier from the power outlet.
2. **Access Filter Compartment:** Open the filter compartment of your air purifier. Refer to your air purifier's specific manual for instructions on how to access the filter.
3. **Remove Old Filter:** Carefully remove the used filter. Dispose of the old filter according to local regulations.
4. **Insert New Filter:** Place the new Nispira HAPF300AP filter into the compartment. Ensure it is seated correctly and securely.
5. **Close Compartment:** Close the filter compartment door or cover.
6. **Restore Power:** Plug the air purifier back into the power outlet.
7. **Reset Filter Indicator (if applicable):** If your air purifier has a filter change indicator, follow its instructions to reset it.

OPERATING

Once installed, the Nispira HAPF300AP filter works continuously with your air purifier to clean the air. The True HEPA material captures microscopic particles, while the activated carbon layer absorbs odors and gases. The air purifier draws in untreated air, passes it through the filter, and releases cleaner air back into the room.

Image: An illustration demonstrating how a True HEPA filter captures 99.7% of airborne suspended particles as small as 0.3 microns, including smoke and environmental pollutants.

MAINTENANCE

Regular filter replacement is crucial for maintaining the efficiency of your air purifier and ensuring continuous clean air. The Nispira HAPF300AP filter is designed for optimal performance over a specific period.

Filter Replacement Frequency:

It is suggested to replace the filters every **6 months** to optimize the efficiency of your air purifier. Actual replacement frequency may vary based on air quality, usage duration, and the presence of pets or smokers in the environment. Do not attempt to wash or clean the filter, as this can damage the filter media and reduce its effectiveness.

TROUBLESHOOTING

If you experience issues after replacing your filter, consider the following:

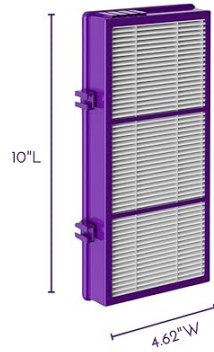

- **Air Purifier Not Turning On:** Ensure the filter compartment is fully closed and secured. Some air purifiers have a safety switch that prevents operation if the compartment is open.
- **Reduced Airflow or Purification:** Double-check that the filter is installed correctly and not obstructed. If the filter is old, it may be clogged and require replacement.
- **Filter Indicator Light Remains On:** After replacing the filter, you may need to manually reset the filter indicator on your air purifier. Refer to your air purifier's user manual for specific instructions on resetting the filter light.

SPECIFICATIONS

Brand	Nispira
Model Number	HAPF300AP (also JAJ0308, HBHAPF30AT)
Item Weight	2 pounds (for 4-pack)
Product Dimensions (per filter)	10 inches (L) x 4.62 inches (W) x 1.37 inches (Th)
Material Type	Activated Carbon, Plastic, Polypropylene

Included Components	Filter (typically sold in multi-packs)
UPC	810135627238

Product Dimensions

HEPA Filter

Removes up to 99.97% of particles as small as 0.3 microns.

Durable build for extended filtration and fewer replacements.
