Giraffe Tools NW30 1/2

Giraffe Tools Retractable Hose Reel User Manual

Model: NW30 1/2

Introduction

The Giraffe Tools Retractable Hose Reel provides a convenient and efficient solution for all your garden watering needs. Designed for ease of use and durability, this hose reel ensures a tangle-free experience with its automatic rewind system and flexible installation options.

Key features include a 100ft, 1/2-inch hose with a locking mechanism, a 9-function sprayer nozzle, and a flexible swivel base for versatile placement on lawns or concrete surfaces. The hose is built to last, being freeze-proof, burst-proof, and rigorously tested for reliability.

Setup

Your Giraffe Tools Retractable Hose Reel comes pre-assembled with the hose. Follow these steps for initial setup:

1. **Unboxing and Components:** Carefully remove all components from the packaging. Ensure you have the main hose reel unit, 5ft leader hose, 9-mode nozzle, hose holder, 4 garden pins, and 4 anchor screws.
2. **Choose Installation Location:** Select a flat, stable surface for placement. The flexible swivel base allows for ground mounting on lawns or concrete.
3. **Secure the Unit (Optional):**
   - For ground installation on soft soil (e.g., lawn), use the provided 4 garden pins. Insert them through the designated holes in the base and hammer them into the ground until secure.
   - For concrete or hard surfaces, use the provided lag screws and anchors. Drill pilot holes as necessary and secure the base firmly.
4. **Attach Hose Holder:** The triangular hose holder can be easily attached to the side of the unit by pushing it into the slot until it clicks into place. This provides convenient storage for the nozzle.
5. **Connect Water Supply:** Attach the shorter 5ft leader hose to the water inlet on the side of the main unit. Then, connect the other end of the leader hose to your outdoor faucet or main garden hose.

6. **Attach Sprayer Nozzle:** Connect the 9-function sprayer nozzle to the end of the main 100ft hose.

Operating Instructions

Operating your Giraffe Tools Retractable Hose Reel is simple and efficient:

1. **Extend the Hose:** Gently pull the hose out to your desired length. The hose features an "any length lock" mechanism, allowing it to stop and hold at any point without constant tension.
2. **Use the Sprayer Nozzle:** The 9-function sprayer nozzle offers various spray patterns (e.g., mist, cone, soaker, flat, rinse, shower, vertical, angle, center) to suit different watering tasks. Adjust the pattern by rotating the nozzle head. The flow control switch on the nozzle allows you to easily turn the water on or off without returning to the faucet.
3. **Automatic Rewind:** To retract the hose, give it a gentle tug. The automatic rewinding system will smoothly and neatly coil the hose back into the unit, preventing kinks and tangles.
4. **Flexible Swivel Base:** The unit's 360-degree swivel base allows the hose to follow your movement, reducing friction and making it easier to water all areas of your garden without repositioning the reel.

Maintenance

Regular maintenance ensures the longevity and optimal performance of your hose reel:

- **Cleaning:** Periodically wipe down the exterior of the unit with a damp cloth to remove dirt and debris.
- **Hose Inspection:** Regularly inspect the hose for any signs of wear, cuts, or leaks. Address any damage promptly to prevent further issues.
- **Winterization:** Before freezing temperatures, disconnect the hose reel from the water supply, drain all water from the hose and unit, and store it in a frost-free location to prevent damage.
- **Internal Check:** The unit features a front cover opening design, allowing you to check the internal reel whenever required for inspection or minor adjustments.

Figure 5: Front cover opening design allows for easy internal inspection.

Troubleshooting

If you encounter any issues with your hose reel, refer to the following common troubleshooting tips:

- **Hose Not Retracting:** Ensure there are no kinks or obstructions along the hose's path. Check if the hose is fully extended and give it a firm, quick tug to activate the rewind mechanism.
- **Leaks:** Check all connections (faucet, leader hose, nozzle) for tightness. Ensure rubber washers are properly seated. Inspect the hose for any visible damage.
- **Low Water Pressure:** Verify that your water supply is fully open. Check for any kinks in the hose or blockages in the nozzle.

Specifications

Brand	Giraffe Tools
Model Number	NW30 1/2
Hose Length	100 Feet
Hose Diameter	1/2 Inch
Working Pressure	300 PSI
Burst Pressure	600 PSI
Item Dimensions (L x W x H)	21.57 x 12.52 x 20.59 inches
Item Weight	30.3 pounds
Operation Mode	Automatic

Warranty & Support

Giraffe Tools is committed to resolving all your concerns with the utmost professionalism. For timely solutions and lifetime-friendly support, please reach out to our customer service team.
