MAINTENANCE AND CARE

- **Cleaning:** Keep your device clean by wiping it with a soft, dry, lint-free cloth. Avoid using harsh chemicals, abrasive cleaners, or aerosol sprays, as these can damage the device's finish.
- **Protection:** To prevent scratches and damage, it is recommended to use a protective case and a screen protector.
- **Software Updates:** Regularly check for and install software updates to ensure your device has the latest features, security patches, and performance improvements. You can typically find updates in **Settings > System > Software Update**.
- **Temperature:** Avoid exposing your phone to extreme temperatures, both hot and cold, as this can affect battery life and overall performance.

Troubleshooting

Device Not Powering On

Ensure the battery is sufficiently charged. Connect the device to a charger for at least 15 minutes before attempting to power it on again. If the issue persists, try performing a force restart by holding down the power button and volume down button simultaneously for about 10-15 seconds.

Poor Battery Life

To optimize battery life, adjust screen brightness, disable unnecessary background apps, and review battery usage in **Settings > Battery** to identify power-consuming applications. Consider enabling battery saver mode when needed.

Connectivity Issues (Wi-Fi, Bluetooth, Mobile Data)

For Wi-Fi or Bluetooth issues, try toggling the respective settings off and on. For mobile data problems, ensure your SIM card is properly inserted and check your network settings. A device restart can often resolve temporary connectivity glitches.
