

## Huffy Upshot (Model 72881)

# Huffy Upshot Kids' Bike User Manual

Brand: Huffy | Model: Upshot (Model 72881)

## PRODUCT OVERVIEW

The Huffy Upshot Kids Bike is designed to support young riders through various stages of their cycling journey. Available in 12", 16", and 20" sizes, this bike prioritizes safety, style, and skill development. It features a durable steel frame and intuitive controls suitable for beginners and experienced riders alike.

### Key Features:

- **Bold Style:** Vibrant colors and BMX-inspired design.
- **EZ Build Assembly:** Designed for fast and frustration-free setup.
- **Beginner-Friendly Design:** Removable training wheels (for 12" and 16" models) for stability.
- **Simple Coaster Brake:** Intuitive stopping by pedaling backward.
- **Durable Construction:** Strong steel frame, soft grips, padded seat, and wide tires for a stable ride.

## ASSEMBLY INSTRUCTIONS

The Huffy Upshot bike features the EZ Build system for quick and easy assembly. Follow these steps and refer to the video for visual guidance.

### Step 1: Unboxing and Preparation

Carefully remove all components from the box. Lay them out on a clean, flat surface. Remove any protective packaging or plastic pieces from the bike parts.

### Step 2: Attach Training Wheels (12" and 16" models only)

Locate the training wheels. They slide directly into the designated channels on the rear wheel axle. Ensure they click securely into place on both sides. Remove any protective plastic pieces from the rear wheel axle before attaching the training wheels.

### **Step 3: Connect Fork and Handlebars**

Remove any protective covers from the head tube of the bike frame. Insert the front wheel fork assembly into the head tube. Ensure the handlebar is oriented correctly (the sweep should go towards the rider). Drop the handlebar stem into the fork assembly until it clicks into place. Tighten the ring on the handlebar stem by hand to secure it.

### **Step 4: Extend Pedals**

The pedals are designed to fold for compact shipping. Simply rotate each pedal outward until it clicks into its extended, riding position.

### **Step 5: Insert Seat Post**

Insert the seat post into the frame's seat tube. Adjust the seat height to an appropriate level for the rider, ensuring the minimum insertion line on the seat post is not visible. Secure the quick-release seat post clamp firmly. If the seat is loose, open the lever, tighten the nut on the opposite side a few turns, and re-clamp until secure.

## OPERATING YOUR HUFFY UPSHOT BIKE

The Huffy Upshot bike is designed for ease of use, especially for young riders.

### Riding with Training Wheels:

For beginners, the removable training wheels provide essential stability. Ensure they are securely attached before riding. As the rider gains confidence and balance, the training wheels can be easily removed.

### Coaster Brake Operation:

The bike is equipped with a rear coaster brake. To stop, simply pedal backward. This intuitive braking system is easy for new riders to learn and control.

**Chain Guard  
For Safety**

**Single-Speed  
Simplicity**

## MAINTENANCE AND CARE

Regular maintenance ensures the longevity and safe operation of your Huffy Upshot bike.

### Tire Pressure:

Check tire pressure regularly. Proper inflation ensures a smooth ride and prevents flats. Refer to the tire sidewall for recommended PSI.

### Chain Lubrication:

Keep the chain clean and lubricated to ensure smooth pedaling and prevent rust. Apply a bicycle-specific lubricant periodically.

### Cleaning:

Clean the bike regularly with mild soap and water. Avoid high-pressure washers, which can damage bearings and components. Dry thoroughly after washing.

## Adjustable Seat:

The padded seat is adjustable to accommodate your child's growth. Ensure the seat is at a comfortable height for pedaling and that the quick-release clamp is always securely tightened.

## TROUBLESHOOTING COMMON ISSUES

Here are solutions to some common issues you might encounter:

### Wobbly Training Wheels:

If training wheels become wobbly, ensure they are fully inserted and clicked into place. Check the bolts securing them to the axle and tighten if necessary. Over time, wear can occur, but proper installation minimizes wobble.

### Loose Handlebars or Seat:

If the handlebars or seat feel loose, re-check the quick-release mechanisms or bolts. For handlebars, ensure the stem is fully inserted and the tightening ring is secure. For the seat, ensure the quick-release lever is clamped tightly and the internal nut is adjusted for proper tension.

## Chain Falling Off:

A loose chain can fall off. Check the chain tension; it should have a small amount of slack but not be excessively loose. If the chain repeatedly falls off, it may require professional adjustment or replacement.

## TECHNICAL SPECIFICATIONS

Specification	Detail
Bike Type	Kids Bike
Age Range (Description)	Ages 3-5 (12" model)
Brand	Huffy
Number of Speeds	1
Color	Blue
Wheel Size	12 Inches
Frame Material	Alloy Steel
Suspension Type	Rigid
Brake Style	Coaster
Item Weight	9.32 Kilograms
Minimum User Height	37 Inches
Maximum Weight Recommendation	50 Kilograms
