ABBIDOT AB-T60

ABBIDOT T60 Pro Dog Training Collar User Manual

Model: AB-T60

INTRODUCTION

Thank you for choosing the ABBIDOT T60 Pro Dog Training Collar. This manual provides detailed instructions for setting up, operating, and maintaining your device to ensure effective and humane training for your dog. Please read this manual thoroughly before use to ensure proper functionality and safety.

SETUP

Package Contents

Image: Contents of the ABBIDOT T60 Pro package, including the T60 Remote, T60 Collar with Strap, User Manual, Dog Training Booklet, Package, Metal Extension Contact, Test Light Tool, Silicone Caps (x4), Contact Points (x4), Type-C Cable, and Lanyard.

- T60 Remote
- T60 Collar with Strap
- User Manual
- Dog Training Booklet
- Metal Extension Contact
- Test Light Tool
- Silicone Caps (4x)
- Contact Points (4x)
- Type-C Cable
- Lanyard

Charging the Devices

Before first use, fully charge both the remote and the collar receiver. The remote lasts up to 45 days on a full charge, and the collar receiver lasts up to 25 days. Use the provided Type-C cable for charging.

EXTENDED WORKING TIME AND CONTROL RANGE

25
Days

45
Days

Image: The remote and collar showing their extended battery life (45 days for remote, 25 days for collar) and the impressive 4500ft control range.

Fitting the Collar

Proper fit of the collar is crucial for effective and safe training. The collar strap is adjustable to fit dogs from 5 lbs to 120 lbs, with a minimum length of 6 inches and a maximum of 27 inches. Ensure the contact points make direct contact with your dog's skin. Use the appropriate contact points (long or short) based on your dog's coat length. The collar should be snug enough to allow two fingers to fit comfortably between the strap and your dog's neck.

ANTI-LOST LIGHT

3 Light Modes

Flashlight

Slow flash

Explosive flash

Adjustable Strap

For small, medium, and large dogs

Image: The collar features an anti-lost light with three modes (flashlight, slow flash, explosive flash) and an adjustable strap suitable for small, medium, and large dogs (10-130 lbs, Min 6 inches, Max 27 inches).

OPERATING INSTRUCTIONS

Remote Control Overview

The T60 Pro remote features a user-friendly LCD display and intuitive controls for single-handed operation. The display shows the current dog selected, collar battery indicator, tone indicator, vibration indicator, stimulation indicator, levels display, LED indicator, E-Clicker indicator, remote battery indicator, and stimulation lock status.

PROTECTED & USER-FRIENDLY

Training Modes

The ABBIDOT T60 Pro offers a variety of training modes to suit different needs and dog temperaments. You can adjust modes and levels using the push-down and rotate knob on the remote.

Your browser does not support the video tag.

Video: An overview of the T60 Pro's training sessions, demonstrating how to adjust E-Clicker, Tone, Vibration, Custom Session (Combo or Static), and LED Light modes.

- **E-Clicker (3 Modes):** For positive reinforcement training. Press and rotate the knob to adjust modes.
- **Tone (9 Modes):** Provides an audible signal. Press and rotate the knob to adjust modes.
- **Vibration (36 Levels):** Delivers a tactile sensation. Press and rotate the knob to adjust levels.
- **Custom Mode:** Combines Vibration (Level 36) and Tone (M1).
- **Static (Stimulation) (118 Levels):** Provides a static correction. Press the 'M' button to select Static, then rotate the knob to adjust levels.

Safety Lock for Static Mode

To prevent accidental stimulation, the static mode features a safety lock. Short push the knob to lock or unlock the static (stimulation) function.

LED Light Modes

The collar features an LED light for visibility in low-light conditions. Push the light button for 2 seconds to turn the LED light ON/OFF. Press and rotate the knob to adjust between 3 modes: Flashlight, Slow flash, and Explosive flash.

Range and Waterproofing

The T60 Pro offers an extended working range of up to 4100 feet, ideal for off-leash training in open areas. The collar receiver is 100% waterproof (IP67 rated), allowing your dog to play freely in various weather conditions, including swimming, rain, bathing, and snow. **Note: The remote is not waterproof; please keep it away from water.**

100% WATERPROOF COLLAR

Fearless of weather, play freely

IP67
Waterproof

The Remote not waterproof,
please keep away from water

Image: The ABBIDOT T60 Pro collar is shown submerged in water, demonstrating its IP67 waterproof rating, suitable for swimming, rain, bathing, and snow. A small image of the remote indicates it is not waterproof.

Multi-Dog Control

The remote control can be paired with and control up to 6 dogs simultaneously, making it suitable for households with multiple pets or professional trainers.

MAINTENANCE

- Wipe the remote and the receiver with a damp cloth to keep them clean.
- Regularly check the collar for any signs of wear or damage.
- Ensure the charging ports are clean and dry before charging.
- Store the device in a cool, dry place when not in use.

TROUBLESHOOTING

Collar not responding to remote:

- Check if both the remote and collar are sufficiently charged.
- Ensure the collar and remote are properly paired. If not, re-pair them according to the pairing instructions (refer to the included Dog Training Booklet for detailed steps).
- Verify that the selected mode and level on the remote are appropriate and not locked (especially for static mode).
- Ensure you are within the effective range of 4100 feet.

Collar not charging:

- Check the charging cable and adapter for damage.
- Ensure the charging port on the collar is clean and free of debris.
- Try a different USB power source.

Static correction seems weak or inconsistent:

- Ensure the contact points are making good contact with your dog's skin. You may need to trim your dog's fur or use the longer contact points.
- Check the static level on the remote and increase it if necessary.
- Use the included test light tool to verify the static function is working correctly.
