Novzix NOVZIX-S1-WT

Novzix Android Compatible Air Tracker Tag User Manual

Model: NOVZIX-S1-WT

Brand: Novzix

INTRODUCTION

The Novzix Android Compatible Air Tracker Tag is designed to help you locate your belongings using the Google Find My Device network. This device integrates seamlessly with Android phones running Android 9 and above, leveraging a vast network of Android devices for crowdsourced tracking. This manual provides essential information for the proper setup, operation, and maintenance of your tracker tag.

Compatible with Android Devices (Android 9.0+)

Image: The Novzix Air Tracker Tag is compatible with Android devices running Android 9.0+.

Supported by Google's "Find My Device"

Compatible with Samsung and Google phones

Apple and Huawei Do Not Support

SAFETY INFORMATION

- Keep the device and its battery out of reach of children and pets. The coin cell battery can be a choking hazard.
- Do not expose the device to extreme temperatures, direct sunlight, or open flames.
- Do not attempt to disassemble, modify, or repair the device yourself. This may void the warranty and cause damage.
- Dispose of batteries according to local regulations. Do not incinerate batteries.

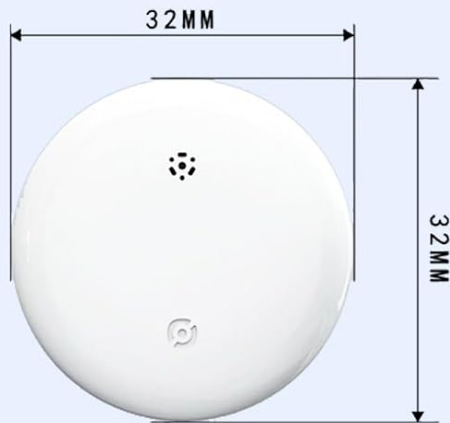

SETUP INSTRUCTIONS

Follow these steps to set up your Novzix Air Tracker Tag with your Android device.

1. Initial Activation and Battery Check

Your tracker tag comes with a pre-installed CR2032 battery. To activate the tracker, ensure the battery is properly seated. If the device does not respond, you may need to replace the battery. A spare battery and a tool to open the tracker are typically included in the package.

2. Prepare Your Android Device

- Ensure your Android phone is running Android 9 or above.
- Make sure Bluetooth is enabled on your device.
- Ensure you have the Google Find My Device app installed and updated.
- Your Google account must be logged in on your phone.

3. Pairing the Tracker Tag

1. Open the **Settings** app on your Android phone.
2. Navigate to **Google**.
3. Select **All services** or similar option.

4. Tap on **Devices** or **Connect devices**.
5. Follow the on-screen prompts to search for and connect your Novzix Air Tracker Tag. You may need to press the button on the tracker to put it into pairing mode.
6. Once detected, select your tracker from the list and complete the pairing process.

If you encounter issues, try turning off and on your phone's Bluetooth, or restarting the tracker by removing and reinserting the battery.

Your browser does not support the video tag.

OPERATING INSTRUCTIONS

Once your Novzix Air Tracker Tag is paired, you can use the Google Find My Device app to locate your items.

Locating Your Item

- Open the **Google Find My Device** app on your Android phone.
- Your tracker tag will appear on the map, showing its last known location.
- Location updates occur every 3-30 minutes, depending on network activity.
- If the item is nearby, you can tap the **Play Sound** option in the app to make the tracker emit an audible alert, helping you pinpoint its exact location.

Track Globally Find Instantly

NOVZIX

MAINTENANCE

Battery Replacement

The Novzix Air Tracker Tag uses a standard CR2032 coin cell battery, which typically lasts for approximately 365 days. When the battery is low, the device's performance may be affected, or it may stop responding. To replace the battery:

1. Use the provided tool (or a similar small, flat object) to carefully open the tracker's casing.
2. Remove the old CR2032 battery.
3. Insert a new CR2032 battery with the positive (+) side facing up.
4. Close the casing securely, ensuring it is properly sealed to maintain water and dust resistance.

Dispose of used batteries responsibly according to local regulations.

Cleaning and Care

- Wipe the tracker with a soft, dry cloth to remove dust or dirt.
- Avoid using harsh chemicals, cleaning solvents, or strong detergents, as these may damage the device.
- The device features water and dust resistance, making it suitable for various environments. However, avoid prolonged submersion in water.

TROUBLESHOOTING

Device Not Connecting/Pairing

- Ensure Bluetooth is enabled on your Android device.
- Verify that your Android device is running Android 9 or a newer version.
- Check the battery level of the tracker. Replace the CR2032 battery if it is low or depleted.
- Try restarting your phone's Bluetooth or restarting the tracker by removing and reinserting the battery.
- Ensure you are within the Bluetooth range (approximately 100 feet) of the tracker during pairing.

Inaccurate or Infrequent Location Updates

- The tracker relies on the Google Find My Device network. Location updates depend on nearby Android devices detecting your tracker. In areas with fewer Android devices, updates may be less frequent.
- Ensure your phone has a stable internet connection (Wi-Fi or mobile data) to receive location updates from the network.
- Location updates typically occur every 3-30 minutes. Constant real-time tracking is not supported.

Tracker Not Emitting Sound

- Confirm the tracker is within Bluetooth range of your phone.
- Check the battery level. A low battery may affect the sound function.
- Ensure the volume on your phone is not muted or too low.

SPECIFICATIONS

Brand	Novzix
Model Number	NOVZIX-S1-WT
Compatible Devices	Android devices (Android 9.0+)
Connectivity Technology	Bluetooth
Control Method	App (Google Find My Device)
Range	Approximately 100 feet (Bluetooth direct connection)
