

POYBPCY CT369-D

POYBPCY 4K+1080P Dual Dash Camera

USER MANUAL

Model: CT369-D

1. Product Overview

The POYBPCY 4K+1080P Dual Dash Camera is designed to provide comprehensive vehicle surveillance with high-definition video recording. Featuring a front 4K camera and a rear 1080P camera, it captures clear footage both day and night. Equipped with 5GHz WiFi for fast data transfer, a CPL filter to reduce glare, G-sensor for emergency locking, and 24-hour parking mode, this dash cam offers advanced protection and convenience for drivers.

2. What's in the Box

Verify that all items listed below are included in your package:

- Dash Camera (Front Unit)
- 1080P Rear Camera
- CPL Filter
- 64GB SD Card
- 3M Adhesive Mount
- Type-C Power Cable
- Reset Pin
- USB Card Reader
- Crowbar (for cable routing)
- Cable Clips
- User Manual

What's in the box?

3. Setup and Installation

Follow these steps for proper installation of your dash camera system:

- 1. Prepare the Windshield:** Clean the area on your front windshield where the dash camera will be mounted. Ensure it is free of dust and grease for optimal adhesive performance.
- 2. Attach Electrostatic Sticker:** Apply the electrostatic sticker to the chosen area on the windshield. This protects your windshield and allows for easier removal of the adhesive mount.
- 3. Mount the Front Dash Camera:** Peel off the protective film from the 3M adhesive pad on the magnetic mount. Attach the mount firmly to the electrostatic sticker. The dash camera can then be magnetically attached to this mount. Ensure the camera lens has a clear view of the road and does not obstruct your driving visibility. The front camera angle is adjustable up to 40 degrees.
- 4. Install the Rear Camera:** Choose a suitable location for the rear camera, typically on the rear windshield. The rear camera can be mounted internally and rotates 360 degrees for flexible positioning. Use the provided 3M adhesive and route the cable discreetly using the crowbar and cable clips.
- 5. Connect Power:** Connect the Type-C power cable to the dash camera and plug the car charger into your vehicle's cigarette lighter socket. For 24/7 parking mode functionality, a hardwire kit (not included) is required.
- 6. Insert SD Card:** Insert the included 64GB SD card into the designated slot on the dash camera. Ensure it is inserted correctly.
- 7. Install CPL Filter:** Screw the CPL filter onto the front camera lens. This filter helps reduce glare and reflections from the windshield, improving video clarity.

4. Operating Instructions

4.1. Video Recording

The dash camera automatically begins recording when powered on. It records dual-channel videos in 4K (front) and 1080P (rear) resolution, ensuring high-quality footage.

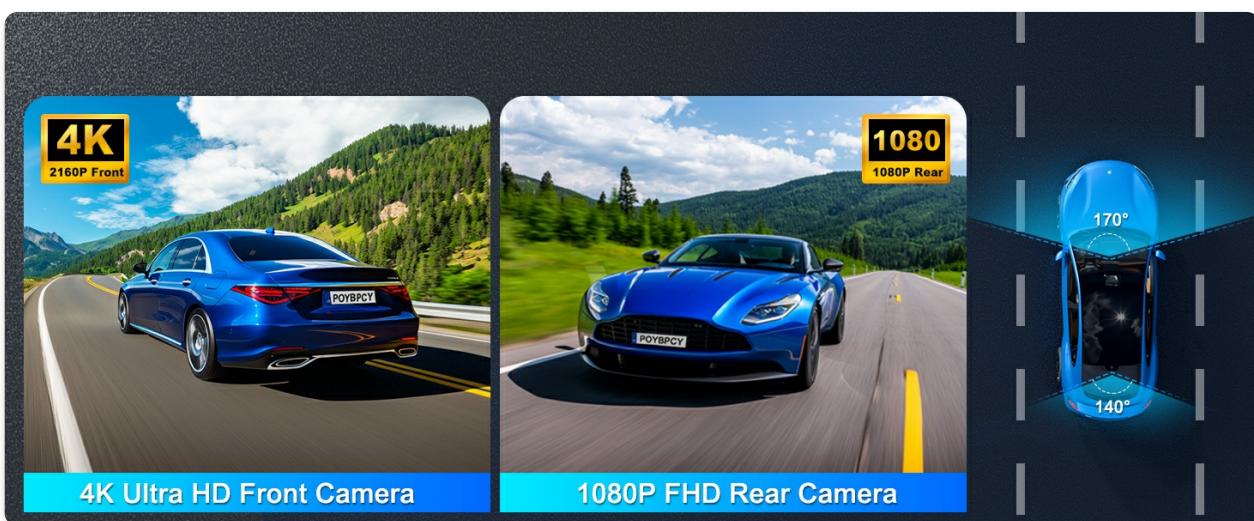

Figure 4.1: Dual-channel recording with wide-angle coverage.

4.1.1. Seamless Loop Recording

The camera features seamless loop recording, which automatically overwrites the oldest unlocked footage when the SD card is full. This ensures continuous recording without manual intervention. Locked files (triggered by G-sensor) are protected from being overwritten.

SEAMLESS Loop Recording

Overwrites the oldest unlocked footages with the newest

EXCEPT FOR LOCKED FILES

32G	64G	128G	512G
1.3H	2.9H	5.8H	11.7H

Figure 4.2: Loop recording ensures continuous capture.

4.1.2. G-Sensor Emergency Lock

The built-in G-sensor detects sudden impacts or collisions. When triggered, it automatically locks the current video segment, protecting it from being overwritten by loop recording. This ensures critical event footage is preserved as evidence.

G-sensor

When the G-Sensor is triggered, the corresponding footage is instantly locked away from being overwritten.

Figure 4.3: G-sensor automatically locks important footage.

4.1.3. Super Night Vision with WDR Technology

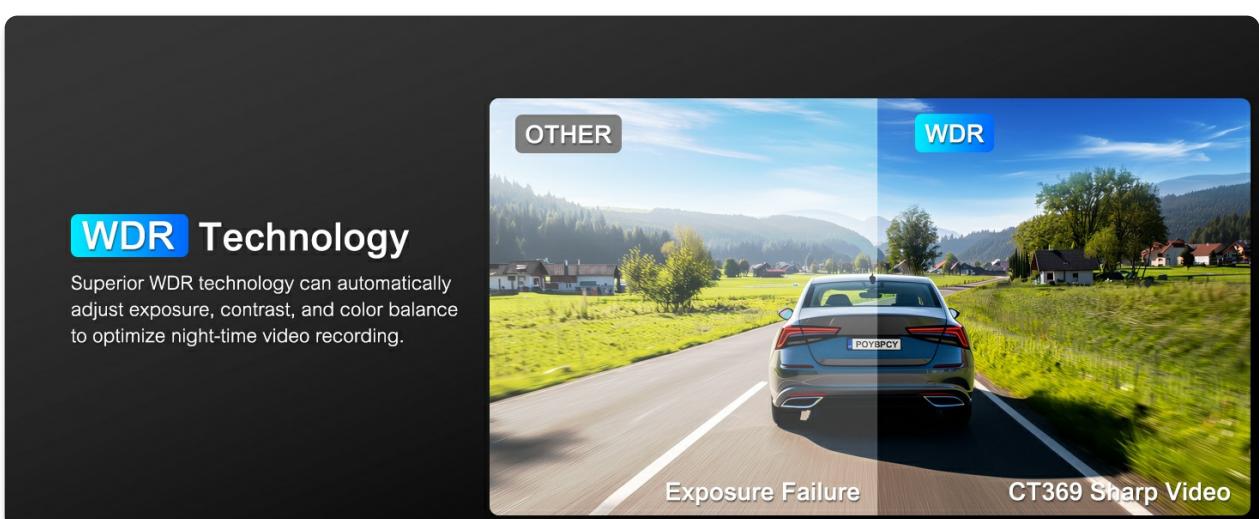

The dash camera is equipped with advanced night vision capabilities, an F1.8 aperture, and a 6-layer glass lens to capture clear images even in low-light environments. Wide Dynamic Range (WDR) technology automatically adjusts exposure, contrast, and color balance to optimize night-time video recording, providing balanced and detailed footage.

Super Night Vision

Capture clear images even low-light environments.

WDR Technology

Superior WDR technology can automatically adjust exposure, contrast, and color balance to optimize night-time video recording.

Figure 4.5: WDR Technology for balanced exposure.

4.1.4. CPL Filter for Glare Reduction

The included CPL (Circular Polarizing Lens) filter reduces glare and reflections from your windshield and dashboard, enhancing overall video quality, color tone, and details, especially in bright sunlight.

Figure 4.6: CPL filter for glare-free clarity.

4.2. 5GHz WiFi & Smart App Control

The built-in 5GHz Wi-Fi offers faster speeds and more reliable connections compared to standard 2.4GHz networks. This allows for smoother video streaming and quicker file transfers to your smartphone. Pair the dash cam with the dedicated "BOBOCAM" App (available on Google Play and App Store) for easy control, viewing, downloading, and sharing of footage.

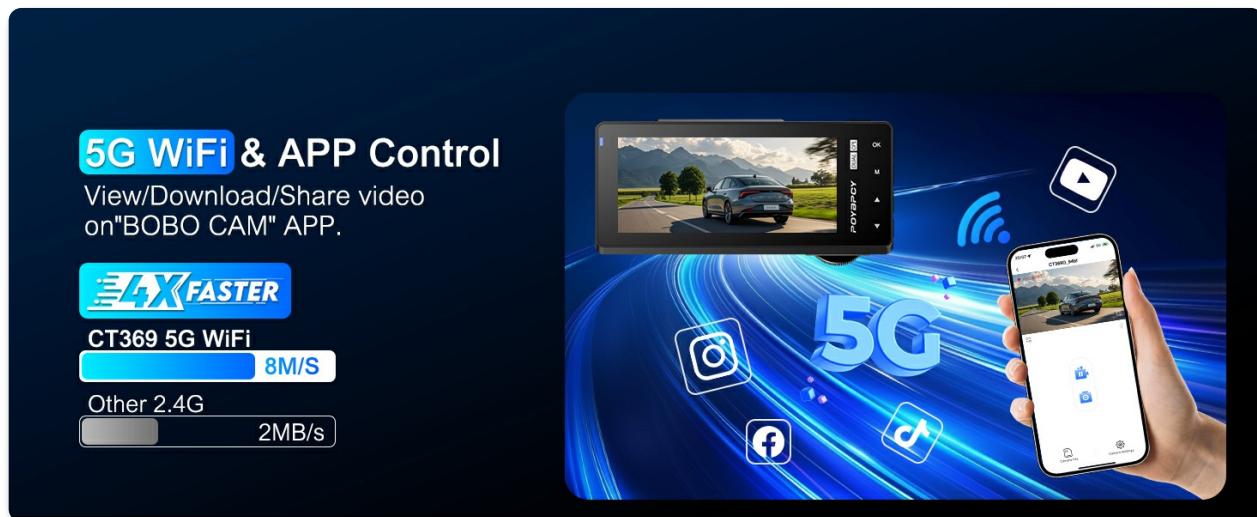

Figure 4.7: Fast 5GHz WiFi and convenient app control.

4.3. 24/7 Parking Mode

Keep your vehicle protected around the clock with the 24/7 parking mode. When your car is parked, the dash cam continuously monitors its surroundings and automatically records when it detects motion or impact. This feature requires a hardwire kit (not included) for continuous power supply.

Video 4.1: Overview of the 4K Dash Cam's features, including parking mode functionality.

5. Maintenance

- Clean the Lens:** Regularly clean the front and rear camera lenses with a soft, lint-free cloth to ensure clear video quality. Avoid abrasive materials that could scratch the lens.
- Format SD Card:** It is recommended to format the SD card periodically (e.g., once a month) to maintain optimal performance and prevent data corruption. This can usually be done through the dash camera's settings menu or via the mobile app.
- Firmware Updates:** Check the manufacturer's website or the BOBOCAM app for any available firmware updates to ensure your dash camera has the latest features and bug fixes.
- Temperature Considerations:** While the dash cam is designed for all-weather durability, avoid prolonged exposure to extreme temperatures when the vehicle is parked, if possible.

6. Troubleshooting

Problem	Possible Cause	Solution
Camera not powering on	Loose power connection; vehicle power outlet issue; damaged cable.	Check power cable connection; test vehicle power outlet; try a different cable.

Problem	Possible Cause	Solution
Poor video quality (blurry/unclear)	Dirty lens; CPL filter not adjusted; low light conditions; incorrect resolution settings.	Clean lenses; rotate CPL filter for optimal glare reduction; ensure WDR is enabled; check video resolution settings.
SD card error/recording stops	SD card full; corrupted SD card; incompatible SD card.	Format the SD card; try a new high-speed (Class 10 or U3) SD card; ensure card is inserted correctly.
WiFi connection issues	Incorrect WiFi password; app not updated; interference.	Verify WiFi password; update BOBOCAM app; ensure no strong interference sources nearby.
G-sensor too sensitive/not sensitive enough	G-sensor sensitivity setting.	Adjust G-sensor sensitivity in the camera settings via the app.

7. Specifications

Feature	Detail
Model Name	CT369-D
Video Capture Resolution	Front: 4K (2160p), Rear: 1080P
Connectivity Technology	5GHz Wi-Fi
Display	3.69" IPS Screen
Lens Aperture	F1.8
Special Features	CPL Filter, 64GB SD Card Included, Night Vision, G-Sensor, Loop Recording, 24H Parking Mode
Included Components	Dash Camera, CPL Filter, 64GB SD Card, Crowbar, Charging Cable
Product Dimensions	1.49 x 4.33 x 1.94 inches
Item Weight	3.53 ounces
Operating Temperature Range	Designed for all-weather durability (e.g., -40°F to 185°F)

8. Warranty and Support

For warranty information, technical support, or any inquiries regarding your POYBPCY Dash Camera, please refer to the contact details provided on the product packaging or visit the official POYBPCY website. Keep your purchase receipt as proof of purchase for warranty claims.
