## KingChii JC-20WLX

# KingChii Cigar Humidor Instruction Manual

Model: JC-20WLX

## PRODUCT OVERVIEW

---

The KingChii Cigar Humidor Model JC-20WLX is designed to provide an optimal environment for preserving your cigar collection. It features a premium leather finish, Spanish cedar wood components, an integrated hygrometer, and a multi-color LED lighting system. This manual provides essential information for setup, operation, maintenance, and troubleshooting.

## SETUP INSTRUCTIONS

Proper setup is crucial for maintaining the ideal humidity levels required for cigar preservation. Follow these steps to prepare your humidor for use:

- 1. Unpack and Inspect:** Carefully remove all components from the packaging. Inspect the humidor for any damage. Ensure all accessories, including the humidifiers and USB cable, are present.
- 2. Seasoning the Humidor:** The Spanish cedar interior needs to be seasoned to absorb moisture and maintain stable humidity. This process typically takes 12 hours.
  - Wipe the interior surfaces (cedar shelves and walls) with a sponge dampened with purified or distilled water. Avoid over-saturating the wood.
  - Fill the included humidifiers with 15-30 ml of distilled water. Place them inside the humidor.
  - Close the humidor and allow it to sit for at least 12 hours. Monitor the built-in hygrometer to ensure humidity stabilizes between 65% and 75%.
- 3. Hygrometer Check:** The humidor includes a built-in hygrometer. Ensure it is reading within the

recommended range of 65% to 75% relative humidity after seasoning.

4. **Placement:** Place the humidor in a cool, dry location away from direct sunlight or heat sources to prevent rapid humidity fluctuations.

## OPERATING INSTRUCTIONS

The KingChii Humidor is designed for ease of use, offering features to enhance your cigar storage experience.

### LED Lighting System

The humidor features an upgraded three-color dimmable LED lighting system. The touch-sensitive controls allow for easy adjustments.

- **Short Touch:** Press the lighting touch button briefly to turn the light on and cycle through warm, natural, and cool light colors.
- **Long Touch:** Press and hold the button to increase or decrease the brightness of the selected light color.

## Storage System

The humidor offers a spacious 4-level storage system with three adjustable tiers of Spanish cedar wood shelves and a bottom pull-out drawer.

- **Cigar Placement:** Arrange your cigars on the Spanish cedar shelves. The adjustable tiers allow for flexible organization based on cigar size and quantity. The humidor can hold approximately 100-150 cigars depending on their ring gauge.
- **Accessory Drawer:** Utilize the bottom pull-out drawer for storing cigar accessories such as cutters, lighters, or other collectibles.

## MAINTENANCE

---

Regular maintenance ensures the longevity of your humidor and the quality of your cigars.

- **Humidity Monitoring:** Continuously monitor the built-in hygrometer. The ideal humidity range is between 65% and 75%.
- **Humidifier Refill:** When the humidity drops below the recommended range, refill the humidifiers with distilled water. The dedicated compartment under the drawer is designed for humidity packs or the provided humidifiers.
- **Interior Cleaning:** Periodically wipe the interior cedar surfaces with a sponge dampened with distilled water (recommended every 1-2 months) to maintain proper seasoning and prevent mold growth.
- **Exterior Cleaning:** Clean the exterior leather finish with a soft, dry cloth. Avoid harsh chemicals that may damage the finish.

## TROUBLESHOOTING

---

Here are some common issues and their solutions:

- **Humidity Too Low:** If the hygrometer reads below 65%, ensure humidifiers are filled with distilled water. Re-season the humidor if necessary by wiping the cedar interior with distilled water. Check for any leaks in the humidor seal.
- **Humidity Too High:** If the hygrometer reads above 75%, remove the humidifiers and expose them to air to allow some water to evaporate. Ensure the humidor is not in an overly humid environment. Avoid opening the humidor frequently.
- **Mold Growth:** If mold appears, immediately remove affected cigars. Wipe the affected area of the humidor with a cloth dampened with distilled water and a small amount of isopropyl alcohol (70%). Allow to air dry completely before reintroducing cigars. Ensure proper humidity levels are maintained to prevent recurrence.
- **LED Light Not Working:** Check if the USB power cable is securely connected. Ensure the power source is active. If issues persist, contact customer support.

## SPECIFICATIONS

Feature	Detail
Model Number	JC-20WLX
Dimensions (L x W x H)	10.6 x 11.5 x 15.8 inches
Weight	18.45 Pounds
Capacity	Holds 100-150 Cigars (depending on ring gauge)
Material	Spanish Cedar Wood Interior, Premium Leather Exterior
