SETUP AND PLACEMENT

The ARIEL Cambridge Bathroom Storage Cabinet comes fully assembled. Follow these guidelines for proper placement and initial setup:

1. **Unpacking:** Carefully remove all packaging materials. Inspect the cabinet for any shipping damage.
2. **Placement:** Position the cabinet in your desired bathroom location. Ensure the floor is clean and dry.
3. **Leveling:** Utilize the hidden leveling feet to ensure the cabinet is stable and does not wobble on uneven surfaces. Adjust each foot until the cabinet is perfectly level.
4. **Anti-Tip Protection:** For safety, it is recommended to secure the cabinet to the wall using the provided anti-tip hardware. Refer to the separate anti-tip installation guide for detailed instructions.
5. **Ventilation:** Upon initial unpacking, some new furniture may have a slight odor. Ensure adequate ventilation in the room for a few days to allow any residual scents to dissipate.

Using Soft-Close Doors and Drawers

The cabinet is equipped with soft-closing mechanisms for both the door and drawers. This feature ensures quiet operation and prevents abrupt slamming.

- To close, gently push the door or drawer until the soft-close mechanism engages. It will then close slowly and silently on its own.
- Avoid forcing the door or drawers shut, as this can damage the soft-close hardware.

CARE AND MAINTENANCE

Proper care will help maintain the appearance and longevity of your ARIEL Cambridge Bathroom Storage Cabinet.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid abrasive cleaners, harsh chemicals, or polishes that may damage the finish.
- **Spills:** Immediately wipe up any spills to prevent water damage, especially on the wood surfaces.
- **Humidity:** Maintain a consistent humidity level in the bathroom to prevent wood from expanding or

contracting excessively, which can lead to cracking or warping.

- **Hardware:** Periodically check and tighten any loose screws on hinges or drawer slides.

TROUBLESHOOTING

Cabinet is wobbly or uneven:

Adjust the hidden leveling feet located at the bottom of the cabinet. Turn them clockwise or counter-clockwise until the cabinet is stable on the floor.

Drawers or doors do not close smoothly:

Ensure nothing is obstructing the drawer slides or door hinges. Check if the soft-close mechanisms are clean and free of debris. If issues persist, inspect the hardware for any damage or misalignment.

New furniture odor:

New furniture may emit a slight odor upon arrival. This is normal and typically dissipates with proper ventilation. Keep the cabinet doors and drawers open and ensure good airflow in the room for several days.
