

700cm

Generic Telescopic Water-Fed Cleaning Pole

MODEL: 700CM

Introduction

This manual provides instructions for the safe and effective use of your Generic Telescopic Water-Fed Cleaning Pole. This system is designed for high-altitude cleaning tasks, allowing you to clean windows, solar panels, roofs, and vehicles from the ground. The pole features a reinforced aluminum alloy construction for durability and lightweight handling, and an adjustable brush head for versatile cleaning.

Safety Information

- **Fragile items:** Please do not squeeze the product during handling or storage.
- **Sharp objects:** Do not use sharp objects to clean the pole or brush to avoid scratches or damage.
- Always ensure all pole sections are securely locked before use to prevent collapse.
- Exercise caution when working at heights. Maintain a stable stance and be aware of your surroundings.
- Do not use the product near electrical lines or equipment.
- Disconnect water supply and drain the pole before storing.

Package Contents

Your package should contain the following items:

- 1 x Telescopic Water-Fed Cleaning Brush Set (including pole sections, brush head, hose, and connectors)

Features

- **Professional Cleaning:** Designed for high-altitude cleaning with a freely rotating brush head to tackle dust and stains in various corners.
- **High-Quality Material:** Constructed from high-density reinforced aluminum alloy, offering high hardness, rust resistance, and lightweight design. Each pole section weighs approximately 0.25kg.
- **Durable Bristles:** Features soft PP bristles for effective cleaning without damaging surfaces.
- **Convenient Water Supply:** Connects to a standard garden hose using the included brass adapter for easy water flow.

- **Simple to Use:** Multiple rod sections can be connected and secured with fixed steel buckles for easy assembly and disassembly.

Image: Overview of the brush head components, including PP bristles, all-copper connector, high-quality hose and connector, and angle adjustment mechanism.

Setup Instructions

1. **Assemble Pole Sections:** Connect the desired number of aluminum pole sections. Each section features a fixed groove and a fixed steel buckle for secure attachment. Ensure each section is fully inserted and the buckle is engaged to prevent separation during use.

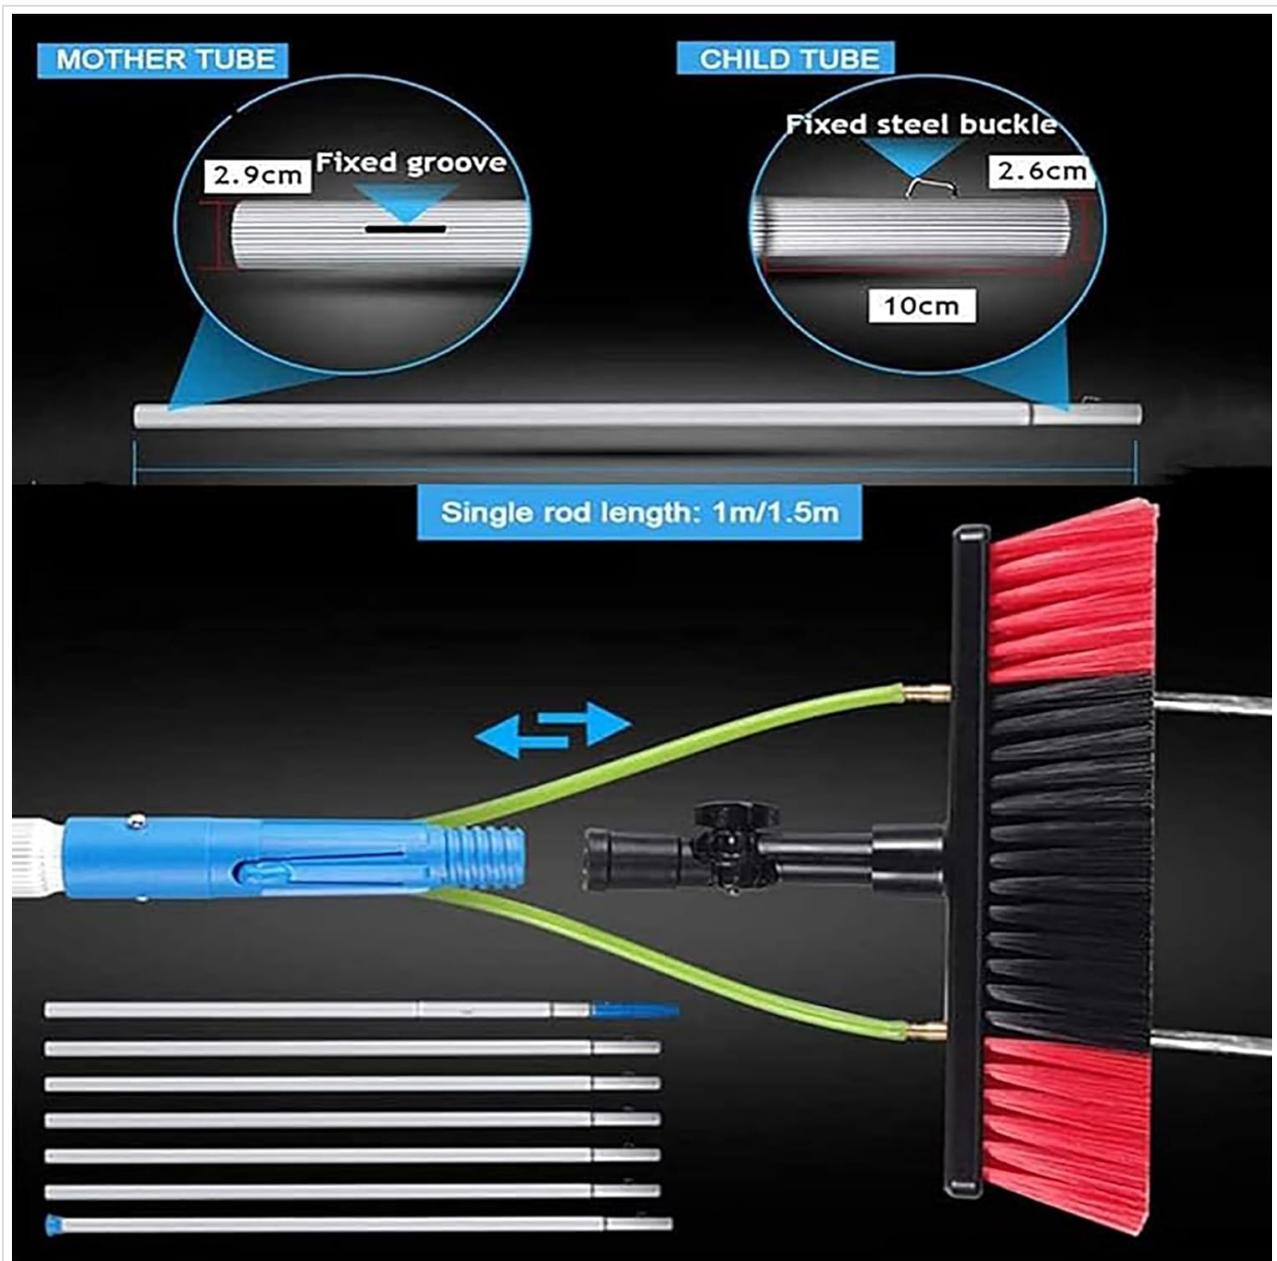

Image: Illustration of 'Mother Tube' and 'Child Tube' showing the fixed groove and fixed steel buckle for connecting pole sections. Each single rod length is 1m/1.5m.

2. **Attach Brush Head:** Securely attach the brush head to the top pole section. Ensure the connection is tight to prevent the brush from detaching.
3. **Connect Water Hose:** Connect the provided hose to the brush head's water inlet. Then, use the brass adapter to connect the other end of the hose to a standard garden hose. Ensure all connections are tight to prevent leaks.

Image: Detailed view of pole connection mechanism, indicating the lightweight nature (0.25kg per section) and pole wall thickness (1.2mm).

Operating Instructions

1. **Adjust Brush Angle:** Use the angle adjustment mechanism on the brush head to set the optimal cleaning angle for the surface you are cleaning.
2. **Turn on Water Supply:** Slowly turn on the water tap to allow water to flow through the pole and out of the brush head. Adjust water pressure as needed.
3. **Begin Cleaning:** Guide the brush head over the surface to be cleaned. The water flow will help loosen dirt and rinse the surface. Work systematically to ensure thorough cleaning.
4. **Applications:** This water-fed pole is suitable for cleaning various surfaces, including high-altitude windows, solar photovoltaic panels, buses, large vehicles, trucks, caravans, ships, and decks.

Image: Examples of the telescopic brush in use for cleaning solar panels and before/after results showing effective dirt removal.

Maintenance

- **After Each Use:** Turn off the water supply and disconnect the garden hose. Allow any remaining water to drain from the pole and hose.
- **Clean Brush Head:** Rinse the brush head thoroughly with clean water to remove any dirt or debris. Allow it to air dry.
- **Inspect Connections:** Periodically check all pole connections, hose connections, and the brush head for wear or damage. Replace any worn parts as necessary.
- **Storage:** Store the telescopic pole in a clean, dry place, away from direct sunlight and extreme temperatures. Disassemble the pole sections if preferred for compact storage.

Troubleshooting

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
No water flow or weak water flow	Water tap is off or not fully open; hose kinked; clogged nozzle/brush head; loose connection.	Ensure water tap is fully open. Check hose for kinks. Inspect brush head and nozzle for blockages and clear them. Tighten all hose connections.
Water leaks from connections	Loose connections; damaged O-rings or washers.	Tighten all connections. Inspect O-rings and washers for damage and replace if necessary.
Pole sections not holding securely	Steel buckle not engaged; dirt in connection mechanism.	Ensure each steel buckle is fully engaged. Clean any dirt or debris from the connection points.

Specifications

- **Brand:** Generic
- **Model:** 700cm
- **Material:** High-density Reinforced Aluminum Alloy
- **Brush Bristles:** PP (Polypropylene)
- **Color:** One Color (as pictured)
- **Number of Items:** 1 (complete set)
- **ASIN:** B0DYHHV2WH
