Operating Instructions

Familiarize yourself with the controls and the vehicle's capabilities before operating at high speeds or in challenging terrain.

Basic Controls

- **Throttle:** Controls forward and reverse movement. Gently increase throttle for smooth acceleration.
- **Steering:** Controls left and right turns. Adjust steering trim on the remote for straight tracking.

Driving Tips

The FMS F-100 is designed for off-road performance with adaptive crawling dynamics. Its 2WD rear-drive system allows it to conquer slopes up to 35 degrees. The 40A ESC-receiver combo provides a rapid 0.1s throttle response for precise control.

- **Off-Road Driving:** The nylon frame chassis is built to withstand impacts, and the waterproof digital steering servo ensures reliable operation in wet conditions up to 20cm depth.
- **Wheelie Bar:** The multi-angle adjustable lift wheels (wheelie bar) help prevent backflips and maintain stability during aggressive acceleration. Adjust the angle to suit your driving style and terrain.

Component Checks

- **Tires and Wheels:** Inspect for damage, wear, and ensure lug nuts are tight.

1. General description

The TEA5767HN is a single-chip electronically tuned FM stereo radio for low-voltage applications with fully integrated Intermediate Frequency (IF) selectivity and demodulation. The radio is completely adjustment-free and only requires a minimum of small and low-cost external components. The radio can be tuned to the European, US, and Japanese FM bands.

2. Features

- High sensitivity due to integrated low-noise RF input amplifier
- FM mixer for conversion to IF of the US/Europe (87.5 MHz to 108 MHz) and Japanese (76 MHz to 95 MHz) FM band
- Precise tuning to receive Japanese TV audio up to 108 MHz
- RF Automatic Gain Control (AGC) circuit
- LC tuner oscillator operating with low-cost fixed chip inductors
- 160-IF selectivity per channel internally
- No external discriminator needed due to fully integrated FM demodulator
- Crystal reference frequency decoder: the oscillator operates with a 32.768 kHz clock crystal or with a 13 MHz crystal and with an externally applied 6.5 MHz reference frequency
- Phase-locked loop (PLL) synthesizer tuning system
- I²C-bus and 3-wire bus, selectable via pin BUSMODE
- 7-bit IF counter output via the bus
- 4-bit level information output via the bus
- SSB mode
- Signal-dependent mono to stereo blend (Stereo Noise Cancelling (SNC))
- Signal-dependent High Cut Control (HCC)
- Soft mute, SNC and HCC can be switched off via the bus
- Adjustment-free stereo decoder
- Autonomous search tuning function
- Standby mode
- Two software-programmable pins
- Bus enable line to switch the bus input and output lines into 3-state mode
