Ryuwanku 202503

Ryuwanku Matte Black Freestanding Tub Faucet with 2-Function Hand Shower

Model: 202503

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Ryuwanku Matte Black Freestanding Tub Faucet with 2-Function Hand Shower. Please read this manual thoroughly before installation and retain it for future reference.

The faucet features a durable all-metal construction, a 360-degree swivel gooseneck spout, and a 2-in-1 handheld shower head for versatile use. It is designed for floor-mount installation.

SAFETY INFORMATION

- Ensure all water supply lines are turned off before beginning installation.
- Wear appropriate personal protective equipment, such as safety glasses and gloves, during installation.
- If you are unsure about any part of the installation process, consult a qualified plumber.
- Do not use abrasive cleaners or harsh chemicals on the faucet's finish, as this may damage the surface.
- Regularly check for leaks after installation and during use.

PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- Straight Tube
- Faucet Body
- Handheld Shower
- Water Lines (1/2" hot & cold, customizable to 3/8")
- Shower Hose (59" stainless steel)
- Base Cover Plate
- Extended Expansion Screws (3 pieces)
- Brass Tripod Base
- Installation Kit

Finish Type	Multi-layer Matte Black (high-temperature baked)
Number of Handles	2
Mounting Type	Floor Mount
Spout Reach	7.7 inches
Main Spout Water Flow	Up to 7.4 GPM
Handheld Shower Water Flow	2.8 GPM
Shower Hose Length	59 inches
UPC	734134908184

Free Standing Tub Faucet

Customized Hose Sizes Available

Thickened Iriss Bmeket

Extended Ixmsin Serew

Figure 2: Faucet Dimensions and Base Installation. This image illustrates the overall dimensions of the faucet, including its height and spout reach, along with a diagram of the floor-mount installation process and the brass tripod base.

SETUP AND INSTALLATION

This faucet is designed for floor-mount installation. Follow these general steps. Refer to the detailed installation instructions included in your package for specific diagrams and torque specifications.

1. **Prepare the Installation Area:** Ensure the floor is clean and level. Turn off the main water supply.
2. **Install the Brass Tripod Base:** Secure the brass tripod base to the floor using the provided extended expansion screws. Ensure it is firmly anchored and level.
3. **Connect Water Supply Lines:** Connect the hot and cold water supply lines to the corresponding inlets on the faucet body. Use thread sealant tape for a watertight connection. The faucet includes 1/2" hoses, which can be customized to 3/8" if needed.
4. **Assemble the Faucet Body:** Attach the faucet body to the brass tripod base. Ensure all connections are tight.
5. **Install the Straight Tube and Spout:** Connect the straight tube and spout components as per the detailed

instructions.

6. **Attach Handheld Shower and Hose:** Connect the 59-inch stainless steel shower hose to the faucet body and then attach the handheld shower.
7. **Secure Base Cover Plate:** Place the base cover plate over the installed base for a finished look.
8. **Test for Leaks:** Slowly turn on the main water supply and check all connections for leaks. Operate the faucet and handheld shower to ensure proper function.

OPERATING INSTRUCTIONS

Your Ryuwanku tub faucet offers both a main spout and a 2-function handheld shower.

1. Main Spout Operation:

- Turn the main handle to control water flow and temperature. Push the handle back for cold water, pull forward for hot water.
 - The gooseneck spout can rotate 360 degrees for flexible positioning.
 - The aerator provides an air-injected water stream, reducing splash.
2. **Diverter Knob:** Use the diverter knob located on the faucet body to switch water flow between the main tub spout and the handheld shower.
3. **Handheld Shower Operation:**
- The handheld shower features two spray modes. Twist the body of the handheld shower to toggle between standard shower mode (Wide Rain) and high-pressure spray gun mode (Soft Mist).
 - The handheld shower delivers a water flow of 2.8 GPM.

Figure 4: Faucet Control and Water Flow. This image highlights the main faucet handle, showing the hot and cold water indicators, and demonstrates water flowing from the main spout.

Figure 5: Handheld Shower Modes. This image details the two spray patterns available from the handheld shower: Wide Rain (standard shower) and Soft Mist (high-pressure spray gun), and how to switch between them by rotating the shower head.

MAINTENANCE

Proper care and maintenance will ensure the longevity and appearance of your faucet.

- **Cleaning the Finish:** Clean the faucet regularly with a soft cloth and mild soap. Rinse thoroughly with clean water and dry with a soft cloth to prevent water spots. Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the matte black finish.
- **Cleaning the Aerator:** If water flow from the main spout decreases, the aerator may be clogged. Unscrew the aerator from the spout, clean any debris, and rinse it under running water. Reinstall the aerator.
- **Cleaning the Handheld Shower Nozzles:** If spray patterns become irregular, gently rub the rubber nozzles on the handheld shower to dislodge mineral deposits. For stubborn clogs, soak the shower head in a solution of white vinegar and water.
- **Checking for Leaks:** Periodically inspect all connections for any signs of leaks. Tighten connections if necessary,

but do not overtighten.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Low water flow from spout or handheld shower.	Clogged aerator or shower nozzles; partially closed shut-off valves; kinked supply lines.	Clean the aerator and shower nozzles. Ensure shut-off valves are fully open. Check supply lines for kinks.
Leaks at connections.	Loose connections; worn O-rings or washers.	Tighten connections (do not overtighten). Replace O-rings or washers if damaged.
Water temperature is incorrect or inconsistent.	Improper hot/cold supply line connection; issue with water heater.	Verify hot and cold lines are connected correctly. Check water heater settings.
Diverter knob not switching properly.	Debris in diverter mechanism; worn diverter cartridge.	Flush the system. If problem persists, contact customer service for replacement parts.

WARRANTY AND SUPPORT

The Ryuwanku Matte Black Freestanding Tub Faucet (Model 202503) is backed by a **5-Year Warranty** from the date of purchase. This warranty covers manufacturing defects in materials and workmanship under normal use. For warranty claims, technical assistance, or any questions regarding your product, please contact Ryuwanku customer service. Please have your model number (202503) and proof of purchase available when contacting support. Contact information for customer service can typically be found on the product packaging or the official Ryuwanku website.
