5. OPERATING INSTRUCTIONS

The Fsbecl Lift Top Coffee Table is designed for ease of use, offering both a raised surface and convenient storage.

5.1. Using the Lift-Top Mechanism

To raise the tabletop, gently pull the designated section of the tabletop upwards. The pneumatic struts will assist in a smooth and controlled lift. To lower, gently push the tabletop down until it rests securely in its closed position. Avoid forcing the mechanism.

5.2. Accessing Hidden Storage

The main hidden storage compartment is located beneath the lift-top section. When the lift-top is raised, the compartment becomes accessible. Additionally, a separate flip-top section on the other side of the table provides quick access to another storage area. This allows for organized storage of blankets, books, remote controls, or other items.

6. MAINTENANCE

Proper care will extend the life and appearance of your coffee table.

- **Cleaning:** Wipe the table surface with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or polishes that may damage the finish.
- **Spills:** Immediately wipe up any spills to prevent staining or water damage.
- **Protection:** Use coasters under drinks and placemats under hot items to protect the tabletop.
- **Mechanism Care:** The lift mechanism is designed for durability. Avoid applying excessive force. If the mechanism becomes stiff, a small amount of silicone-based lubricant can be applied to moving parts, avoiding contact with wood surfaces.

7. TROUBLESHOOTING

If you encounter issues with your coffee table, refer to the following common solutions:

- **Lift-Top Does Not Operate Smoothly:**

- Check for any obstructions in the mechanism's path.
- Ensure all screws securing the lift mechanism are properly tightened.
- Verify that the pneumatic struts are installed correctly and are not damaged.

- **Table Feels Unstable or Wobbly:**

- Confirm that all assembly screws and bolts are fully tightened.
- Ensure the table is on a level surface. Adjust floor glides if present.

- **Tabletop Panels Do Not Align Properly:**

- Review the assembly instructions to ensure all panels and brackets are oriented correctly.
- Loosen relevant screws slightly, adjust alignment, then re-tighten.
