## CofunKool H720

# CofunKool H720 3-in-1 Webcam Instruction Manual

Model: H720

## INTRODUCTION

The CofunKool H720 is a professional 3-in-1 system conference camera designed for various communication needs, including online meetings, classes, and live streaming. It integrates a 1080P HD camera, quad-microphone array with noise cancellation, and a 3W stereo speaker into a single, compact unit. This manual provides detailed instructions for setting up, operating, maintaining, and troubleshooting your H720 webcam to ensure optimal performance.

## PACKAGE CONTENTS

- CofunKool H720 3-in-1 Webcam (with integrated USB cable)

## SETUP

### 1. Physical Installation

The H720 webcam features a versatile mounting system that allows it to be securely placed on various displays or surfaces.

Front view of the CofunKool H720 3-in-1 Webcam, showcasing its integrated camera, speaker grille, and microphone array.

To mount the webcam:

1. Open the flexible clip/base of the webcam.
2. Place the webcam on top of your monitor, laptop screen, or a flat surface. Ensure the front of the webcam faces you.
3. Adjust the clip to firmly grip the top edge of your display. The friction-grip base provides stability.
4. Utilize the 360-degree rotatable neck and ball-mount to adjust the camera angle horizontally and vertically for optimal framing.

# MUTE KEY PRIVACY COVER

Press the button to stop pickuping voice,  
the business meeting is safer and more efficient

The webcam's flexible base allows for secure mounting on various displays, with a 360-degree rotatable neck for versatile positioning.

## 2. Connecting to Your Computer

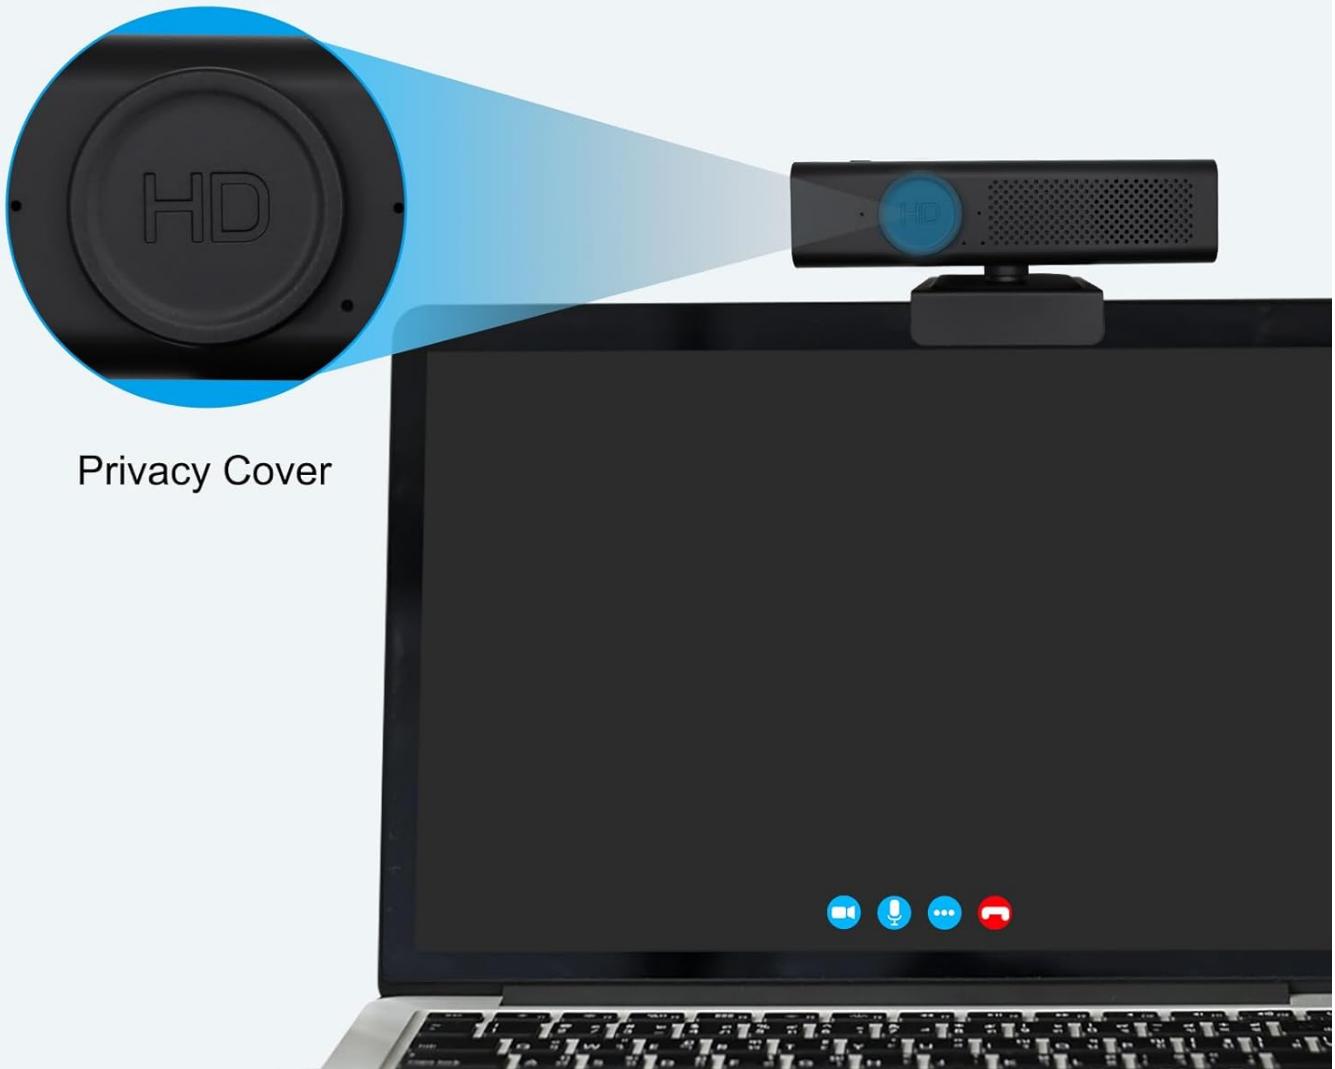

The CofunKool H720 is a plug-and-play device, requiring no additional driver installation for most operating systems.

1. Locate an available USB Type-A port on your desktop computer or laptop.
2. Plug the integrated USB cable from the webcam into the USB port.
3. Your operating system (Windows, macOS, Android, Linux) should automatically recognize the device.

# Webcam with Magnetic Privacy Cover

protect your privacy when not use it

The webcam connects via a standard USB Type-A 2.0 cable, offering plug-and-play compatibility with various systems.

## OPERATION

### 1. Basic Use

Once connected, the H720 webcam will be available as an audio and video input device in your communication applications (e.g., Zoom, Microsoft Teams, Skype, Google Meet).

- Open your preferred video conferencing or streaming software.
- In the application's settings, select the CofunKool H720 as your camera, microphone, and speaker device.
- The blue operational LED indicator on the webcam will illuminate when the camera is active.

### 2. Key Features

#### 1080P Full HD Camera

The integrated camera delivers crisp 1080P Full HD video resolution, ensuring clear visuals for your calls and streams.

Background noise cancellation

**After**

Clear natural sound

Illustration showing the effect of noise cancellation, transforming noisy audio into clear, natural sound.

### 3W Stereo Speaker

The built-in 3-watt stereo speaker delivers high-quality audio, allowing you to hear participants clearly without external speakers.

## Bulit-in 3 Watts HiFi Speaker

provides a stereo surround sound

The webcam features a built-in 3-watt HiFi speaker, providing stereo surround sound for an immersive audio experience.

### 90° Wide-Angle Field of View

The 90-degree wide-angle lens captures a broader view, ideal for group meetings or presentations where multiple people need to be in frame without distortion.

## Wide Angle Webcam

90° Field of View

A visual representation of the 90-degree wide field of view, suitable for capturing multiple participants in a meeting setting.

### Magnetic Privacy Cover

A magnetic privacy cover is included to ensure your privacy when the camera is not in use. Simply attach it over the lens.

## 3 in 1 Webcam with 4 Mics and Speaker

The webcam comes with a magnetic privacy cover to protect your privacy when the camera is not actively being used.

### Tactile Mute Button and LED Indicators

The webcam features a tactile mute button on the top-left. Pressing this button instantly mutes the microphones, indicated by a red LED light. When the light is off, the microphone is active and picking up sound.

# FOV 90° WITHOUT DISTORTION

More people can appear that will not be out of shape in the video at the same time

**Others**

**Our**

The mute button, when pressed, activates a red light, indicating that the microphone is muted for enhanced privacy during calls.

## MAINTENANCE

To ensure the longevity and optimal performance of your CofunKool H720 webcam, follow these maintenance guidelines:

- **Cleaning the Lens:** Gently wipe the camera lens with a soft, lint-free cloth. For stubborn smudges, use a lens cleaning solution specifically designed for optical surfaces. Avoid abrasive materials or harsh chemicals.
- **Cleaning the Body:** Use a dry or slightly damp soft cloth to clean the exterior of the webcam. Do not use liquid cleaners directly on the device.
- **Storage:** When not in use for extended periods, store the webcam in a cool, dry place, away from direct sunlight and extreme temperatures. Use the magnetic privacy cover to protect the lens.
- **Cable Care:** Avoid bending or kinking the USB cable excessively. Do not pull the cable to disconnect the webcam; always grasp the USB connector.

## TROUBLESHOOTING

If you encounter issues with your CofunKool H720 webcam, refer to the following common troubleshooting steps:

- **Webcam Not Detected:**

- Ensure the USB cable is securely plugged into both the webcam and your computer.
- Try plugging the webcam into a different USB port on your computer.
- Restart your computer.
- Check your operating system's device manager (Windows) or system information (macOS) to see if the webcam is listed.

- **No Video Output:**

- Verify that the magnetic privacy cover is removed from the lens.
- Ensure the webcam is selected as the primary camera in your video conferencing application's settings.
- Check privacy settings in your operating system that might be blocking camera access for certain applications.

- **No Audio (Microphone/Speaker):**

- Ensure the webcam's mute button is not activated (red LED should be off).
- Verify that the CofunKool H720 is selected as the microphone and speaker device in your application's audio settings.
- Check your computer's sound settings to ensure the webcam's microphone and speaker are enabled and not muted.
- Adjust volume levels in both your application and operating system.

- **Poor Video Quality:**

- Ensure adequate lighting in your environment.
- Clean the camera lens as described in the Maintenance section.
- Check your internet connection speed, as low bandwidth can affect video quality in online calls.

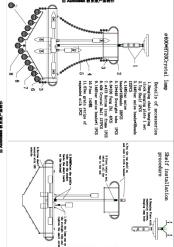

## SPECIFICATIONS

Feature	Specification
Brand Name	CofunKool
Model Number	H720
Item Weight	10.5 ounces
Package Dimensions	6.69 x 3.11 x 2.95 inches
Video Capture Resolution	1080p
Photo Sensor Technology	CMOS
Maximum Focal Length	500000 Millimeters
Maximum Aperture	2.7 f
Connectivity Technology	USB
Special Features	4 Mics, Low Light, Mute, Speakers
Supported Audio Format	AAC, MP3
Video Capture Format	MP4
