

GlasFlength Full Length Mirror

GlasFlength 64"x21" Full Length Mirror Instruction Manual

Model: Full Length Mirror

INTRODUCTION

Thank you for choosing the GlasFlength 64"x21" Full Length Mirror. This manual provides important information regarding the safe installation, operation, and maintenance of your new mirror. Please read these instructions carefully before use and retain them for future reference.

SAFETY INFORMATION

- Always handle the mirror with care. Two people are recommended for lifting and positioning to prevent injury and damage.
- Ensure the mirror is placed on a stable, level surface if standing, or securely mounted if wall-hung.
- The mirror features explosion-proof glass designed to prevent shattering into sharp pieces upon impact. However, avoid striking the mirror with force.
- Keep children and pets away from the mirror during installation.
- Do not hang heavy objects on the mirror frame.

PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- 1 x GlasFlength 64"x21" Full Length Mirror
- 1 x Removable Floor Stand Bracket (pre-attached)
- Wall Mounting Hardware (drywall rivets and screws)

SETUP AND INSTALLATION

Your GlasFlength Full Length Mirror offers versatile placement options: floor standing, leaning against a wall, or wall-mounted.

Option 1: Floor Standing

1. Carefully unpack the mirror.

2. Locate the pre-attached U-shaped bracket on the back of the mirror.
3. Gently unfold the bracket until it locks into position, providing a stable base for the mirror to stand upright.
4. Place the mirror on a flat, stable surface. Ensure the bracket is fully extended and the mirror is balanced.

- **Aluminum Alloy Frame**
- **Frame Thickness 0.55"**

Image: The mirror can be used as a floor-standing unit with its integrated bracket or leaned against a wall.

Option 2: Leaning Against a Wall

1. If the floor stand bracket is attached, you may remove it by unscrewing the hinge if desired, or simply fold it flat against the mirror back.
2. Position the mirror against a sturdy wall, ensuring it is stable and cannot easily tip over.
3. For added stability, consider using anti-tip hardware (not included) to secure the top of the mirror to the wall.

Option 3: Wall Mounting

This option requires drilling and proper wall anchors. Ensure you are comfortable with these steps or seek professional assistance.

1. Remove the floor stand bracket by unscrewing the hinge mechanism.
2. Identify the pre-drilled holes on the back of the mirror frame, designed for hanging.
3. Measure the distance between the hanging points on the mirror.
4. Mark the desired location on your wall for the mounting screws, ensuring it is level.
5. Drill pilot holes at the marked locations. Insert the provided drywall rivets (anchors) into the pilot holes if mounting into drywall.
6. Insert the provided screws into the anchors, leaving a small portion of the screw head exposed to hang the mirror.
7. Carefully lift the mirror and align the pre-drilled holes on the frame with the screws on the wall. Gently lower the mirror until it is securely seated on the screws.
8. Verify the mirror is stable and level before releasing it.

Image: The back of the mirror features a durable hanging design and an adjustable hinge for the stand. Included accessories facilitate wall mounting.

OPERATING INSTRUCTIONS

The GlasFlength Full Length Mirror is designed for straightforward use. Once installed, simply position yourself in front of the mirror to view your reflection. Its high-definition reflection provides clear and accurate imaging.

Aluminum Alloy Frame Explosion-proof Tempered Glass 1:1 High-definition Reflection

MAINTENANCE

To keep your mirror in optimal condition, follow these simple maintenance guidelines:

- **Cleaning the Glass:** Use a soft, lint-free cloth and a non-abrasive glass cleaner. Spray the cleaner onto the cloth, not directly onto the mirror, to avoid streaks and liquid seeping into the frame edges. Wipe gently until clean and dry.
- **Cleaning the Frame:** Wipe the aluminum alloy frame with a soft, dry cloth. Avoid harsh chemicals or abrasive cleaners that could damage the finish.
- **Inspection:** Periodically check the stability of the mirror, especially if it is wall-mounted or frequently moved. Ensure all screws and connections are secure.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Mirror is unstable when standing.	Bracket not fully extended or locked; uneven floor surface.	Ensure the U-shaped bracket is fully extended and locked. Place the mirror on a flat, level surface.
Mirror appears wobbly when wall-mounted.	Screws not fully tightened; incorrect anchors used; insufficient number of mounting points.	Tighten mounting screws. Ensure appropriate anchors are used for your wall type. Verify all designated mounting points are utilized.
Streaks or smudges on the mirror surface.	Improper cleaning technique or cleaning solution.	Use a clean, lint-free cloth and a dedicated glass cleaner. Spray cleaner onto the cloth first, then wipe the mirror.

SPECIFICATIONS

Feature	Detail
Product Dimensions	64"L x 21"W (162.5 cm x 53.3 cm)
Frame Material	Aluminum Alloy
Glass Type	Explosion-Proof Tempered Glass, High-Definition
Mounting Type	Floor Mount, Leaning, Wall Mount
