3. Setup

3.1 Power Connection

The clock is battery-operated for easy setup and portability. Ensure batteries are correctly inserted into the remote control. The main clock unit requires an AC adapter for continuous operation.

- Insert 2 AAA batteries into the remote control. Ensure the plastic film is removed from the battery compartment if present.
- Connect the AC adapter to the power input port on the back of the clock unit.
- Plug the AC adapter into a standard wall outlet.

3.2 Initial Time Synchronization

The clock features automatic time correction via radio wave connection. Upon initial power-up, the clock will attempt to synchronize with the radio signal. This may take a few minutes.

3.3 Mounting Options

The clock supports both wall-mounting and tabletop placement.

- **Tabletop Use:** Extend the built-in stands on the back of the clock to place it on any flat surface.
- **Wall Mounting:** Use the provided transparent hooks or nail hooks to securely mount the clock on a wall.

4. Operating Instructions

The clock can be operated using the included remote control for convenience.

4.1 Display Modes and Settings

- **12H/24H Display:** Use the remote control to switch between 12-hour and 24-hour time formats.
- **Temperature Unit:** Toggle between Celsius (°C) and Fahrenheit (°F) for temperature display.
- **Date/Day Display:** The clock automatically displays the current date and day of the week.

4.2 Alarm Function

The clock features multiple alarms with 57 chime types and a 9-minute snooze function.

- **Setting an Alarm:** Press and hold the 'Alarm' button on the remote to enter alarm setting mode. Use the number buttons to set the desired alarm time.
- **Alarm Modes:** Choose from different alarm modes (e.g., daily, weekdays, weekends) using the remote control.
- **Snooze:** When the alarm sounds, tap the snooze icon on the clock or press the snooze button on the remote for a 9-minute snooze.
- **Chime Selection:** Select from 57 different chime types to personalize your alarm sound.

4.3 Timer Function

The clock includes a timer function. Use the remote control to set the desired countdown time in hours, minutes, and seconds. The timer will provide audible alerts at 30, 15, 10, and 1 minute before the end, and a 10-second countdown broadcast.

4.4 Brightness and Volume Adjustment

- **Brightness:** Adjust the display brightness using the remote control. The clock also features a night mode for reduced

brightness.

- **Volume:** Control the alarm and chime volume to your preference.

5. Features Overview

The KMMKGG Digital Radio LCD Wall/Desk Clock is packed with features to enhance your daily life:

- **Automatic Time Correction:** Ensures precise timekeeping without manual adjustments.
- **Large LCD Display:** Clear, easy-to-read digits visible from various angles.
- **Temperature & Humidity Display:** Monitors indoor environmental conditions (°C/°F switchable).
- **Date & Day of the Week:** Comprehensive calendar function.
- **Multiple Alarms:** Set up to three alarms with 57 selectable chime types.
- **Snooze Function:** A convenient 9-minute snooze for extra rest.
- **Memory Function:** Retains settings even during power interruptions (requires backup batteries).
- **Versatile Placement:** Designed for both wall-mounting and tabletop use.

Power Source	Battery operated (main unit via AC adapter, remote via AAA batteries)

Display Type	Digital
Special Features	Calendar display, Temperature display, Alarm clock, Snooze, Backlight
Shape	Rectangular

7. Troubleshooting

If you encounter any issues with your KMMKGG Digital Radio LCD Wall/Desk Clock, please refer to the following common problems and solutions:

- **Clock not displaying time:** Ensure the AC adapter is securely connected and plugged into a working power outlet. Check if the power switch on the back of the unit is in the 'ON' position.
- **Time is incorrect:** Allow sufficient time (up to several hours) for the clock to receive the radio wave signal for automatic time correction. Ensure the clock is placed in an area with good signal reception, away from large metal objects or electronic interference.
- **Remote control not working:** Check if the AAA batteries in the remote control are correctly inserted and have sufficient charge. Remove any plastic film from the battery compartment.
- **Temperature/Humidity not displaying:** Ensure the clock is in an environment where it can accurately sense these parameters. If the display shows 'HH' for temperature, it might be outside the measurable range.
- **Alarm not sounding:** Verify that the alarm is set to 'ON' and the volume is not muted or set too low. Check the alarm mode (daily, weekdays, weekends) to ensure it's active for the desired day.

For further assistance, please contact customer support.

8. Warranty and Support

The KMMKGG Digital Radio LCD Wall/Desk Clock comes with a **1-year warranty** from the date of purchase.
