NHOPEEW 7-Inch Android Car Radio User Manual

MODEL: 259388EC-DF23-42C7-97EB-2EADAEFD7CFB

Thank you for choosing the NHOPEEW Android Car Radio. This manual provides essential information for installation, operation, and maintenance.

1. Product Overview

The NHOPEEW 7-inch Android Car Radio is a versatile in-car entertainment and navigation system designed for specific Dacia and Renault models. It features a responsive touchscreen, Android 13 operating system, wireless CarPlay and Android Auto, GPS navigation, Wi-Fi connectivity, FM/RDS radio, and support for a reversing camera. With 2GB RAM and 64GB internal storage, it offers fast performance and ample space for your applications and media.

Figure 1.1: NHOPEEW 7-inch Android Car Radio main unit.

2. Vehicle Compatibility

This Android car radio is specifically designed for the following vehicle models and years:

- **For Dacia:** Logan (2012-2017), Duster (2011-2017), Sandero (2012-2017), Dokker (2012-2017), Lodgy (2012-2017)
- **For Renault:** Captur (2013-2017), Symbol (2013-2017), Duster
- **For LADA Xray 2:** Note that some steering wheel control buttons may be unusable.

Before purchase and installation, please confirm your car's original system configuration, year, and central control panel to ensure compatibility. Refer to the images below for visual guidance on compatible and incompatible dashboards.

3. What's in the Box

The package includes the following components:

- Car Radio Unit
- Power Cable
- RCA Cable
- USB Cable
- GPS Antenna
- Radio Antenna
- Canbus (if applicable for your vehicle model)
- Rear Camera Input Cable
- Rear Camera (optional, if included in your package)
- User Manual (this document)

Note: The exact contents may vary slightly based on the specific product variant.

4. Setup and Installation

Professional installation is recommended. Ensure the vehicle's battery is disconnected before starting installation. Connect all cables securely according to the wiring diagram provided with your unit. Incorrect wiring can cause damage to the device or vehicle.

4.1 Reversing Camera Installation

Follow these steps to install the reversing camera:

1. Connect the positive terminal of the camera's power supply to the reverse light's positive terminal.
2. Connect the negative terminal of the camera's power supply to the reverse light's negative terminal (ground).
3. Connect the video signal cable from the camera to the "Rear Camera Input" on the car radio.
4. The reversing trigger is controlled by the stereo, so no separate trigger wire connection is typically needed for the radio itself.

Important: Even if you are not using the backup camera, ensure the reversing input cable is connected to the radio. This is crucial for proper Bluetooth and Wi-Fi signal reception.

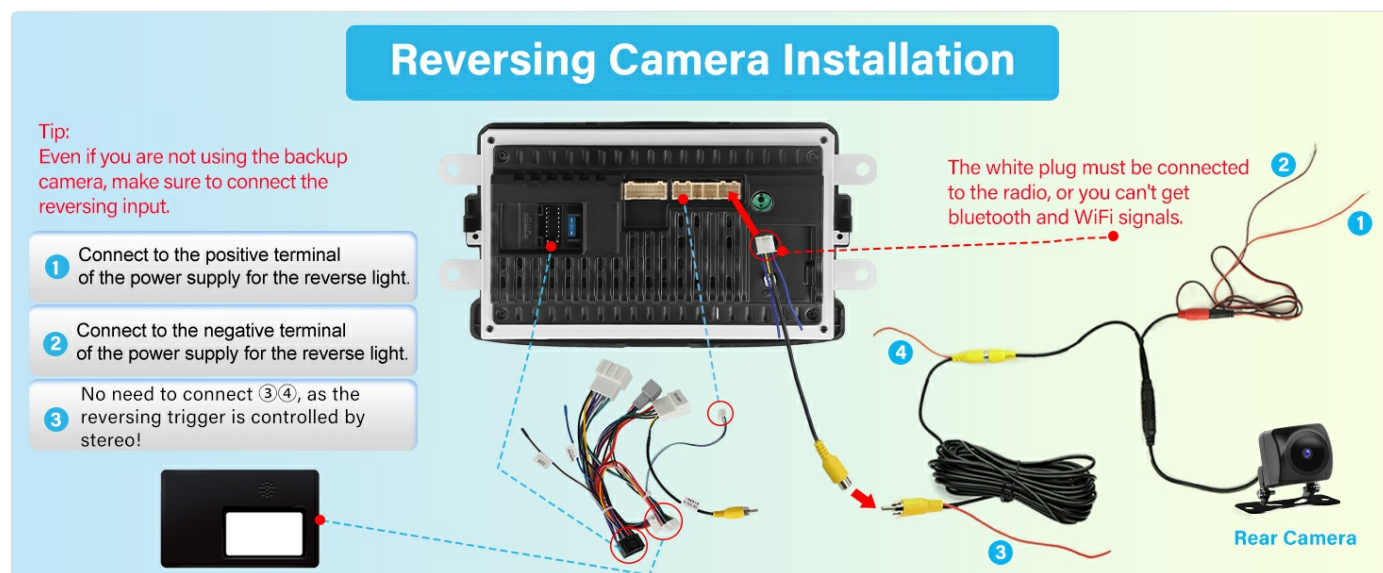

Figure 4.1: Reversing Camera Installation Diagram.

5. Operating Instructions

5.1 Wireless CarPlay and Android Auto

Enjoy hands-free control and seamless connectivity. Connect your smartphone wirelessly via Bluetooth or Wi-Fi, or use a USB cable for wired connection. Access navigation, music, calls, and messages directly from the car radio display.

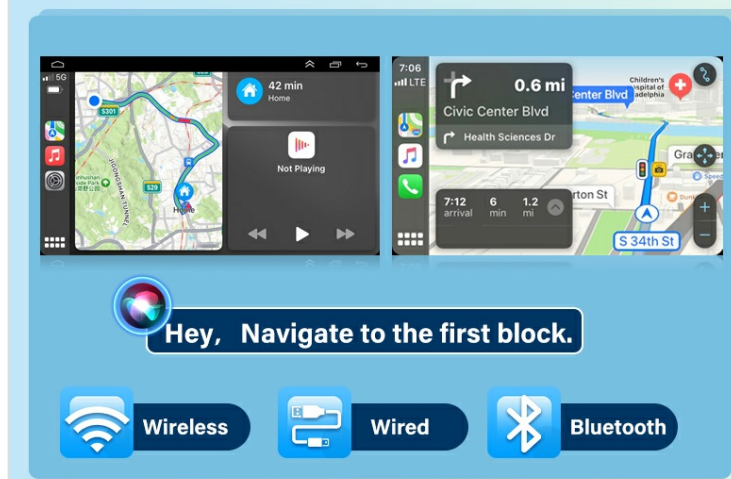

Figure 5.1: Wireless CarPlay interface.

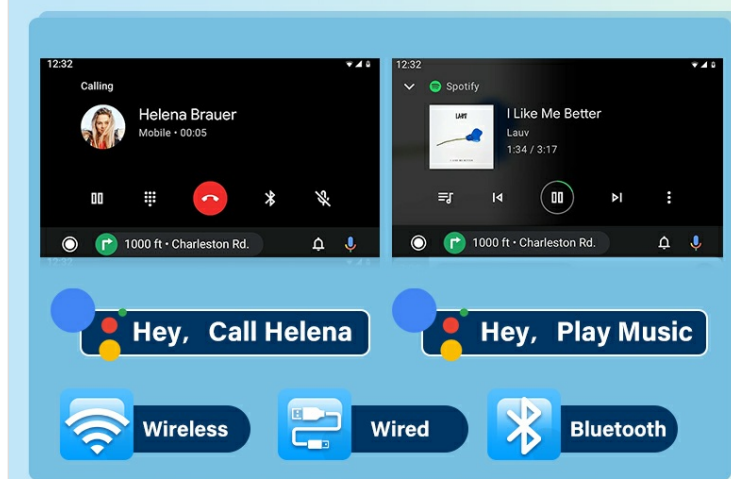

Figure 5.2: Wireless Android Auto interface.

5.2 Mirror Link Function

The Mirror Link function allows you to mirror your smartphone's screen (both iOS and Android) onto the car radio's display. This provides access to your phone's apps and videos on a larger screen. Connect wirelessly or via USB.

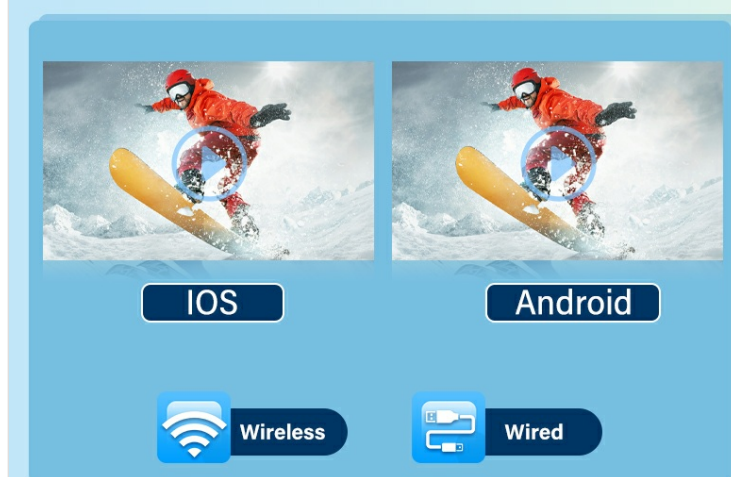

Figure 5.3: Mirror Link functionality for iOS and Android devices.

5.3 GPS Navigation and Wi-Fi Connectivity

The built-in GPS navigation system provides precise directions, real-time route adjustments, and up-to-date maps. With integrated Wi-Fi, you can connect to the internet, download apps, get live traffic updates, and check weather conditions directly from your car.

Figure 5.4: GPS Navigation and Wi-Fi connectivity.

5.4 FM/RDS Radio and Sound EQ

Enjoy clear radio reception with the FM tuner and RDS (Radio Data System) functionality. Customize your audio experience with the integrated sound equalizer (EQ) to match your preferences.

Figure 5.5: FM/RDS Radio and Sound EQ interface.

5.5 Steering Wheel Control (SWC)

The unit supports steering wheel controls, allowing you to manage audio, calls, and other functions without taking your hands off the wheel. This enhances driving safety and convenience. The system can be configured to learn your vehicle's steering wheel buttons.

Figure 5.6: Steering Wheel Control functionality.

5.6 Reversing Camera Integration

The system supports AHD reversing cameras, providing a clear view of the area behind your vehicle when reversing. This feature enhances safety during parking maneuvers. The camera typically offers night vision, is waterproof, provides high-definition video, and a wide viewing angle.

5.7 Split Screen Function

The split-screen function allows you to run two applications simultaneously on the display. For example, you can have navigation on one side and music playback on the other, improving multitasking while driving.

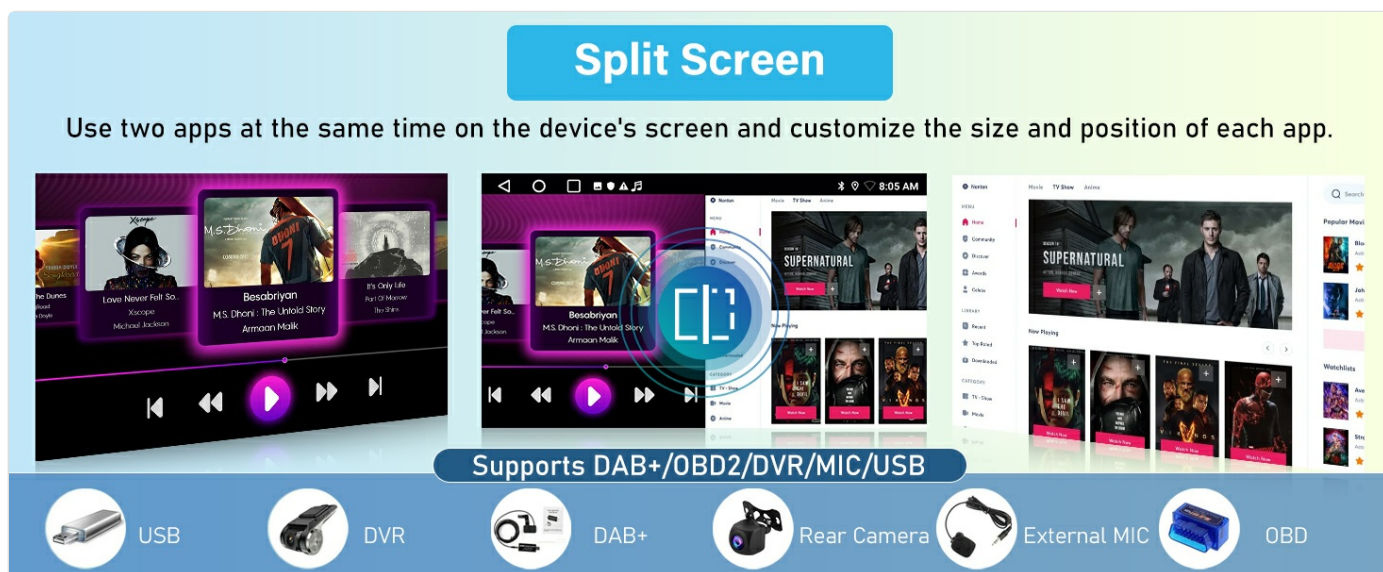

Figure 5.7: Split Screen functionality.

6. Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the screen and unit. Avoid abrasive cleaners or solvents.
- **Software Updates:** Periodically check for software updates to ensure optimal performance and access to new features. Updates can usually be downloaded via Wi-Fi.
- **Temperature:** Avoid exposing the unit to extreme temperatures, which can affect its lifespan and performance.

7. Troubleshooting

If you encounter any issues, please refer to the following common problems and solutions:

- **Screen is broken, cables are unsuitable, or parts are missing:**Inspect all components upon receipt. If any issues are found, contact customer support immediately.
- **Device does not power on after installation:** Double-check all wiring connections according to the diagram. A wiring error is a common cause. Take a photo of your wiring for reference when contacting support.
- **Screen is locked and unavailable after installation:**Try placing five fingers on any part of the screen simultaneously and holding for five seconds. Then, follow any on-screen instructions to unlock.
- **No Bluetooth or Wi-Fi signal:** Ensure the reversing input cable is connected to the radio, even if a camera is not installed. This cable is essential for signal reception.

For further assistance, please contact customer support.

If you have any of the following problems, please click Customer Support to contact us.

❶. The screen is broken after receiving the goods, the cable is not suitable, the parts are missing; there is a doubt about the wiring.
