Gotical 469990 Water Filter

GOTICAL Kenmore Clean Water Filter 9990 User Manual

Model: 469990 Water Filter

PRODUCT OVERVIEW

The GOTICAL Kenmore Clean Water Filter 9990 is designed to remove contaminants from your water supply, providing cleaner and better-tasting water. This filter is compatible with various refrigerator models and is recommended for replacement every six months with average use to maintain optimal performance.

Key Features

- Removes contaminants for cleaner, better-tasting water.
- Recommended replacement every 6 months for optimal performance.
- Compatible with a wide range of refrigerator models.
- Constructed from durable resin material.

SETUP AND INSTALLATION

Proper installation ensures the filter functions correctly and provides clean water. Always refer to your refrigerator's specific user manual for detailed instructions on filter replacement, as procedures may vary by model.

Before You Begin

- Ensure you have the correct replacement filter (Model: 469990 Water Filter).
- Turn off the water supply to your refrigerator, if possible, to prevent leaks during installation.
- Have a towel or shallow pan ready to catch any residual water.

Installation Steps

1. Locate the existing water filter in your refrigerator. This is typically found in the upper right corner of the fresh food

compartment, or in the base grille.

2. Carefully twist the old filter counter-clockwise to unlock and remove it. Some water may drip out.
3. Remove the protective cap from the new GOTICAL Kenmore Clean Water Filter 9990.

Image: A detailed view of the filter's connection end, highlighting the O-rings and internal structure. This part connects directly into the refrigerator's water line.

4. Insert the new filter into the filter housing.
5. Twist the filter clockwise until it locks securely into place. You may feel a slight click or resistance.

Bottom Freezer

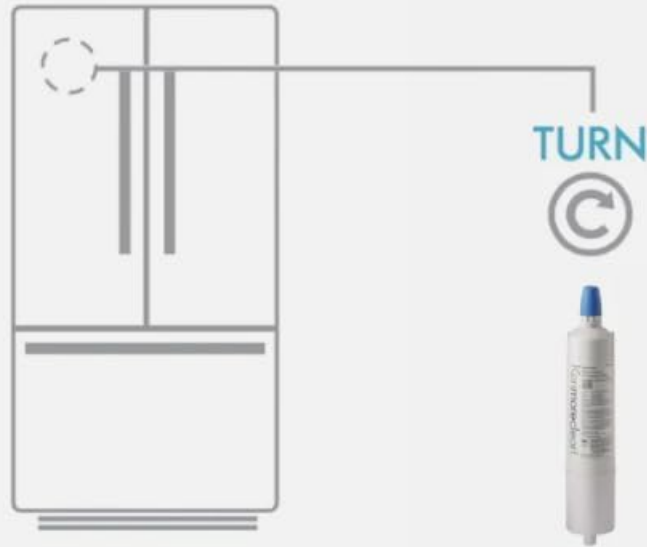

Image: An illustrative diagram depicting a bottom freezer refrigerator. An arrow indicates the direction to turn the water filter for installation, typically a clockwise motion to secure it.

6. Turn the water supply back on to the refrigerator.
7. Run water through the dispenser for approximately 3-5 minutes (about 2-3 gallons) to flush out any air and carbon fines from the system. This is crucial for optimal filter performance and taste.
8. Check for any leaks around the filter housing.
9. Reset the "Change Filter" indicator light on your refrigerator, if applicable. Refer to your refrigerator's manual for specific instructions on resetting the indicator.

OPERATING INSTRUCTIONS

Once installed, the GOTICAL Kenmore Clean Water Filter 9990 operates automatically as water flows through your refrigerator's dispenser and ice maker. No manual operation is required.

Filter Functionality

The filter utilizes advanced filtration technology to reduce various contaminants. Water passes through multiple layers designed to trap impurities.

Efficient Filtration Ensures Purity in Each Drop

Reduce heavy metals and other impurities

Image: A diagram illustrating the multi-stage filtration process. It shows water flowing downwards through different layers, effectively reducing substances like chlorine, elements causing bad taste, and sources of bad odor, resulting in purified water.

MAINTENANCE

Regular maintenance, primarily filter replacement, is essential for the continued effectiveness of your water filtration system.

Filter Replacement Schedule

It is recommended to replace your GOTICAL Kenmore Clean Water Filter 9990 every **six months** or sooner if you notice a decrease in water flow or taste/odor issues. The filter's lifespan can vary based on water quality and usage volume.

Storage

Store unused filters in a cool, dry place away from direct sunlight and extreme temperatures. Do not remove the protective caps until ready for installation.

TROUBLESHOOTING

This section addresses common issues you might encounter with your water filter.

Problem	Possible Cause	Solution
Slow Water Flow	<ol style="list-style-type: none"> 1. Clogged filter (old or heavily used). 2. Air trapped in the system. 	<ol style="list-style-type: none"> 1. Replace the filter. 2. Flush the system by dispensing 2-3 gallons of water.
Bad Taste or Odor in Water	<ol style="list-style-type: none"> 1. Filter needs replacement. 2. Insufficient flushing after installation. 	<ol style="list-style-type: none"> 1. Replace the filter. 2. Flush the system thoroughly.
Water Leaks from Filter Area	<ol style="list-style-type: none"> 1. Filter not properly seated. 2. Damaged O-rings on filter. 	<ol style="list-style-type: none"> 1. Remove and re-install the filter, ensuring it clicks into place. 2. Inspect O-rings for damage; replace filter if damaged.

SPECIFICATIONS

Attribute	Detail
Brand	Gotical
Model Number	469990 Water Filter
Equivalent Part Numbers	C L S - 30320001, 5231 JA 2006 E, 5231 JA 2005 A
Material	Resin
Product Dimensions	2"D x 2"W x 2"H
Item Weight	1.57 pounds
Filter Lifespan	Up to 6 months (with average use)
Product Benefits	Removes contaminants for cleaner, better-tasting water, compatible with various refrigerator models.

Compatible Refrigerator Models (Partial List)

This filter is compatible with numerous Kenmore refrigerator models. A partial list includes:

- 27931, 51072, 51073, 51074, 51076, 51079, 51082, 51083, 51086, 51089, 51092, 51093, 51099, 51372, 51373, 51374, 51376, 51379, 75192, 75193, 75194, 75196, 75199, 75542, 75543, 75544, 75546, 75549, 75552, 75553, 75554, 75556, 75559, 77192, 77193, 77194, 77242, 77243, 77244, 77249, 77252, 77253, 77572, 77573, 77579, 78342, 78349, 78402, 78403, 78406, 78409, 78412, 78413, 78416, 78419, 79012, 79013, 79014, 79019, 79304, 79309.
