MIKUSO Wired Computer Keyboard Instruction Manual

Model: KB-088U-Grey

Introduction

This manual provides comprehensive instructions for the MIKUSO Wired Computer Keyboard, designed for optimal performance and user comfort. Featuring laser-engraved, anti-fading characters and 12 multimedia hotkeys, this full-size keyboard is a reliable companion for various computing needs.

Key features include:

- **Laser Engraving Characters:** Advanced laser engraving technology ensures characters on keycaps are slightly raised and will not fade after long-term typing, preventing unclear character reading.
- **Comfortable Keys:** 104 standard keys with large silicone SHIN-ETSU and polyester film substrate, offering a soft and fast rebound for comfortable extended typing.
- **Easy Setup:** Plug-and-play functionality requires no driver installation, providing stable and sensitive typing via wired connection.
- **12 Multimedia Hotkeys:** Convenient access to music, volume, computer, email, and more, significantly improving work efficiency. Includes Caps Lock and Number Lock indicators.
- **Wide Compatibility:** Compatible with Windows 7, 8, 10 or higher versions for computers, laptops, and PCs. (Note: Multimedia keys may not be compatible with MAC systems, but other keys function properly).

Setup

The MIKUSO Wired Computer Keyboard is designed for simple and quick setup. No special drivers or software are required.

1. **Unpack the Keyboard:** Carefully remove the keyboard from its packaging.
2. **Locate a USB Port:** Identify an available USB-A port on your computer, laptop, or PC.
3. **Connect the Keyboard:** Insert the USB connector of the keyboard cable into the USB port.
4. **System Recognition:** Your operating system (Windows 7, 8, 10, or higher) will automatically detect and install the necessary generic drivers. This process usually takes a few seconds.
5. **Begin Typing:** Once recognized, the keyboard is ready for immediate use.

Maintenance

To ensure the longevity and optimal performance of your MIKUSO Wired Computer Keyboard, follow these simple maintenance guidelines:

- **Cleaning:** Regularly clean the keyboard surface and between the keys using a soft, dry cloth or a can of compressed air to remove dust and debris. For stubborn dirt, a slightly damp cloth with mild soap can be used, ensuring no liquid enters the keyboard.
- **Avoid Spills:** While the keyboard has some water resistance, it is best to avoid liquid spills directly onto the keys or internal components. In case of a spill, immediately disconnect the keyboard and allow it to dry completely before reconnecting.
- **Character Durability:** The laser-engraved characters are designed to be anti-fading, providing long-lasting legibility even with extensive use. Avoid abrasive cleaners or harsh chemicals that could damage the keycap surface.
- **Cable Care:** Do not excessively bend or pull the USB cable. Store the cable neatly to prevent kinks or damage.

TROUBLESHOOTING

If you encounter issues with your MIKUSO Wired Computer Keyboard, please refer to the following common troubleshooting steps:

- **Keyboard Not Responding:**
  - Ensure the USB cable is securely plugged into a functioning USB port on your computer.
  - Try plugging the keyboard into a different USB port.
  - Restart your computer.
  - Test the keyboard on another computer to determine if the issue is with the keyboard or your computer's USB ports.
- **Multimedia Keys Not Working (on Mac Systems):**
  - As noted in the product description, multimedia keys may have limited or no functionality on MAC operating systems. This is a known compatibility characteristic. Standard typing keys should still function normally.
- **Keys Feel Stiff or Unresponsive:**
  - Ensure no debris or foreign objects are lodged under the keycaps. Gently clean around the affected keys.
  - The keys are designed for a soft and fast rebound. If a key feels unusually stiff, it might indicate a manufacturing anomaly.
- **Spacebar Squeaks:**
  - Some users have reported a slight squeaking sound from the spacebar. This can sometimes be a characteristic of the key stabilizer mechanism. While not affecting functionality, if persistent, it may diminish with continued use.
