7. TROUBLESHOOTING

Most common concerns with your new sofa can be easily addressed:

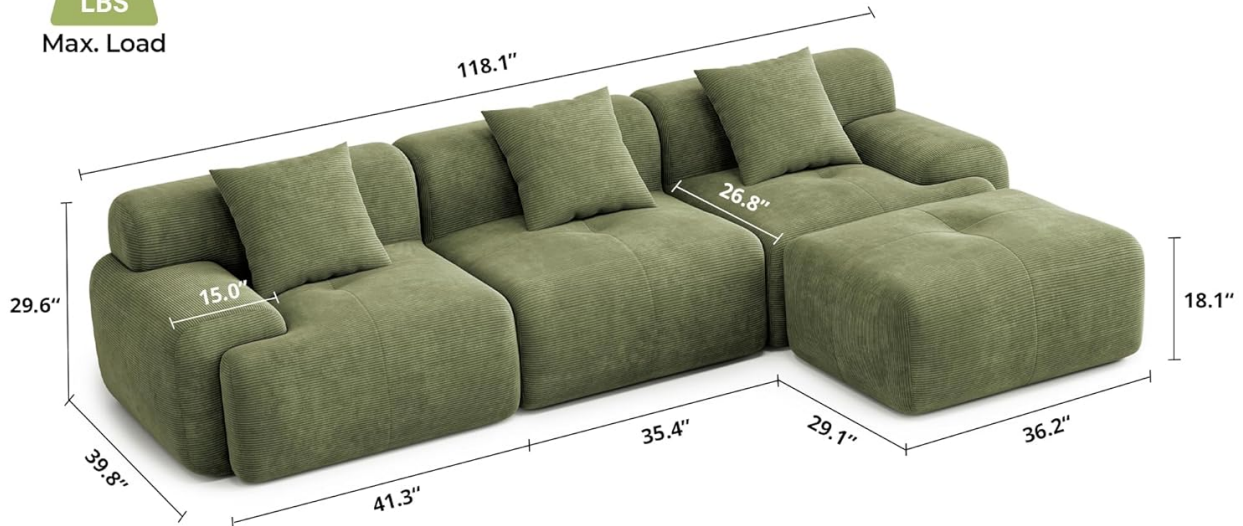

- **Sofa Not Fully Expanded:** If the sofa modules appear compressed or not fully shaped upon unboxing, this is normal. The foam requires time to expand after being vacuum-packed. Allow at least 72 hours for initial expansion, and up to 3-7 days for full loft and comfort.
- **Uneven Appearance:** Minor wrinkles or unevenness in the fabric may occur due to packaging. These should smooth out as the foam expands and with light use. A fabric steamer can also help to gently smooth out wrinkles.
- **Modules Shifting:** Ensure all modules are securely connected using the integrated anti-slip features and straps provided. Place the sofa on a rug or carpet for added stability if on hard flooring.
