(Adapter kit required)**

This diagram illustrates how the SwitchBot Lock Ultra can be installed on different lock types, specifically highlighting the need for the accessory kit for Jimmy Proof and Mortise locks.

SETUP AND INSTALLATION

Before beginning installation, ensure you have your SwitchBot Lock Ultra ready and charged. A Phillips head screwdriver may be required.

1. Prepare Your Door Lock

Ensure your existing Jimmy Proof or Mortise lock is in good working condition. The accessory kit will attach to the interior side of your lock.

2. Attach the Adapter Base

Position the adapter base of the accessory kit over the interior mechanism of your Jimmy Proof or Mortise lock. Align the mounting holes with the existing screw points or use the provided adhesive if applicable and recommended by the main Lock Ultra manual.

Hands Full? Let Your Door Unlock Itself

Auto Unlock detects when you're near with GPS and Bluetooth—and unlocks the door before you even reach for your keys.

This image details the adjustable latch claw and raised base features of the adapter kit, designed to accommodate various lock knob widths and door lock heights for a precise fit.

3. Secure the Adapter

Use the provided screws to firmly attach the adapter base to your door. Ensure it is securely fastened and does not wobble.

4. Mount the SwitchBot Lock Ultra

Once the accessory kit is securely installed, follow the instructions provided with your SwitchBot Lock Ultra to attach it to the newly installed adapter base. The Lock Ultra should fit snugly onto the adapter.

Seamless Upgrade Supports Original Keys

5. Calibration and Testing

Refer to your SwitchBot Lock Ultra user manual for instructions on calibrating the lock after installation. Test the lock's operation manually and via the SwitchBot app to ensure proper functionality.

OPERATING THE ACCESSORY KIT

The accessory kit itself does not have operational controls. Its function is to enable the SwitchBot Lock Ultra to operate with Jimmy Proof and Mortise locks. All operations, including locking, unlocking, and smart features, are controlled via the SwitchBot Lock Ultra and its associated mobile application.

For detailed operating instructions, please refer to the SwitchBot Lock Ultra user manual.

MAINTENANCE

The SwitchBot Lock Ultra Accessory Kit requires minimal maintenance.

- **Cleaning:** Wipe the surface with a soft, dry cloth. Avoid abrasive cleaners or solvents.
- **Inspection:** Periodically check the screws and mounting for tightness. Ensure the adapter remains securely attached to the door and the main lock.
- **Lubrication:** Do not lubricate the accessory kit components. If your existing Jimmy Proof or Mortise lock requires lubrication, follow the manufacturer’s guidelines for that specific lock.

TROUBLESHOOTING

If you encounter issues with the accessory kit, consider the following:

Lock Not Engaging Properly

- **Check Alignment:** Ensure the accessory kit is perfectly aligned with your existing lock mechanism. Misalignment can prevent smooth operation.
- **Tighten Screws:** Verify that all installation screws are tight. Loose screws can cause movement and affect performance.
- **Obstructions:** Check for any physical obstructions preventing the lock from engaging or disengaging fully.

Accessory Kit Feels Loose

- **Re-tighten:** Re-tighten all mounting screws.
- **Adhesive (if used):** If adhesive was used for initial positioning, ensure it has fully cured and provides adequate hold.

General Lock Ultra Issues
