Introduction

Thank you for choosing the Muphyers 10x10FT Heavy-Duty Outdoor Dog Kennel. This manual provides essential instructions for the safe assembly, operation, and maintenance of your new dog kennel. Please read this manual thoroughly before assembly and retain it for future reference.

Intended Use

This outdoor kennel is designed to provide a secure and spacious enclosure for dogs and other suitable small to medium-sized animals. Its robust construction and protective roof make it ideal for various outdoor environments.

Figure 1: Suitable for Various Animals. This image illustrates the versatility of the kennel, indicating it can house not only dogs but also other small to medium-sized pets like rabbits, chickens, ducks, and lambs.

Safety Information

- Always ensure all connections are securely fastened before allowing pets into the kennel.
- Regularly inspect the kennel for any signs of wear, damage, or loose components.
- Do not allow children to play unsupervised near or inside the kennel.
- Ensure the kennel is placed on a level surface to prevent instability.
- The roof cover provides shade and rain protection; however, it is not designed to withstand extreme weather conditions such as heavy snow loads or hurricane-force winds.
- This kennel is designed for pets. Do not use it for purposes other than its intended use.

Key Features

- **Spacious Design:** Measuring 10x10x6FT, this kennel offers ample space for pets to move and relax.
- **Enhanced Security:** Features a robust double-lock system on the main door to prevent accidental openings.
- **Durable Construction:** Built from high-quality metal iron with a protective spray coating for resistance against rust and wear. The 3x2 inch wire mesh is designed to be chew and claw resistant.
- **All-Weather Protection:** Includes a premium, weatherproof, and UV-resistant roof cover to shield pets from sun, rain, and wind.
- **Convenient Feeding:** An integrated small feeder door allows for easy access to food and water bowls.

Package Contents

Please verify that all components are present before beginning assembly. If any parts are missing or damaged, please contact customer support.

- Kennel Panels (various sizes, including door panel)

- Roof Frame Components
- Roof Cover (Weatherproof and UV-resistant fabric)
- Assembly Hardware (Screws, bolts, clips, brackets)
- Ground Nails/Anchors
- Cord Locks for Roof Cover
- Feeder Door (integrated into a panel)
- Double Lock Mechanism
- Basic Assembly Tools (Allen wrench, spanner - *Note: Personal tools are recommended for easier assembly*)

Setup and Assembly

Assembly typically requires two people. Ensure you have adequate space and a level surface for construction.

1. **Prepare the Area:** Choose a flat, level outdoor area for the kennel. Clear any debris or obstacles. Consider laying down a weed barrier and gravel for optimal ground conditions.
2. **Unpack and Identify Parts:** Carefully unpack all components and lay them out. Refer to the parts list to ensure everything is present. Identify the different panel types (e.g., door panel, solid panels).
3. **Assemble Side Panels:** Connect the one-piece side mesh panels using the provided clips and screws. Ensure the bolt holes for the roof supports are oriented correctly. Assemble the structure loosely at first.
4. **Install Ground Nails:** Once the base structure is formed, secure the kennel to the ground using the provided ground nails/anchors. This enhances stability, especially in windy conditions.
5. **Construct the Roof Frame:** Assemble the roof frame components according to the diagrams. Attach the roof frame to the top of the assembled side panels.
6. **Attach the Roof Cover:** Drape the weatherproof roof cover over the assembled roof frame. Secure it using the cord locks, ensuring it is taut and evenly distributed to prevent water pooling.
7. **Final Tightening:** Once the entire structure is assembled, go back and securely tighten all screws and bolts. Do not overtighten, but ensure all connections are firm.

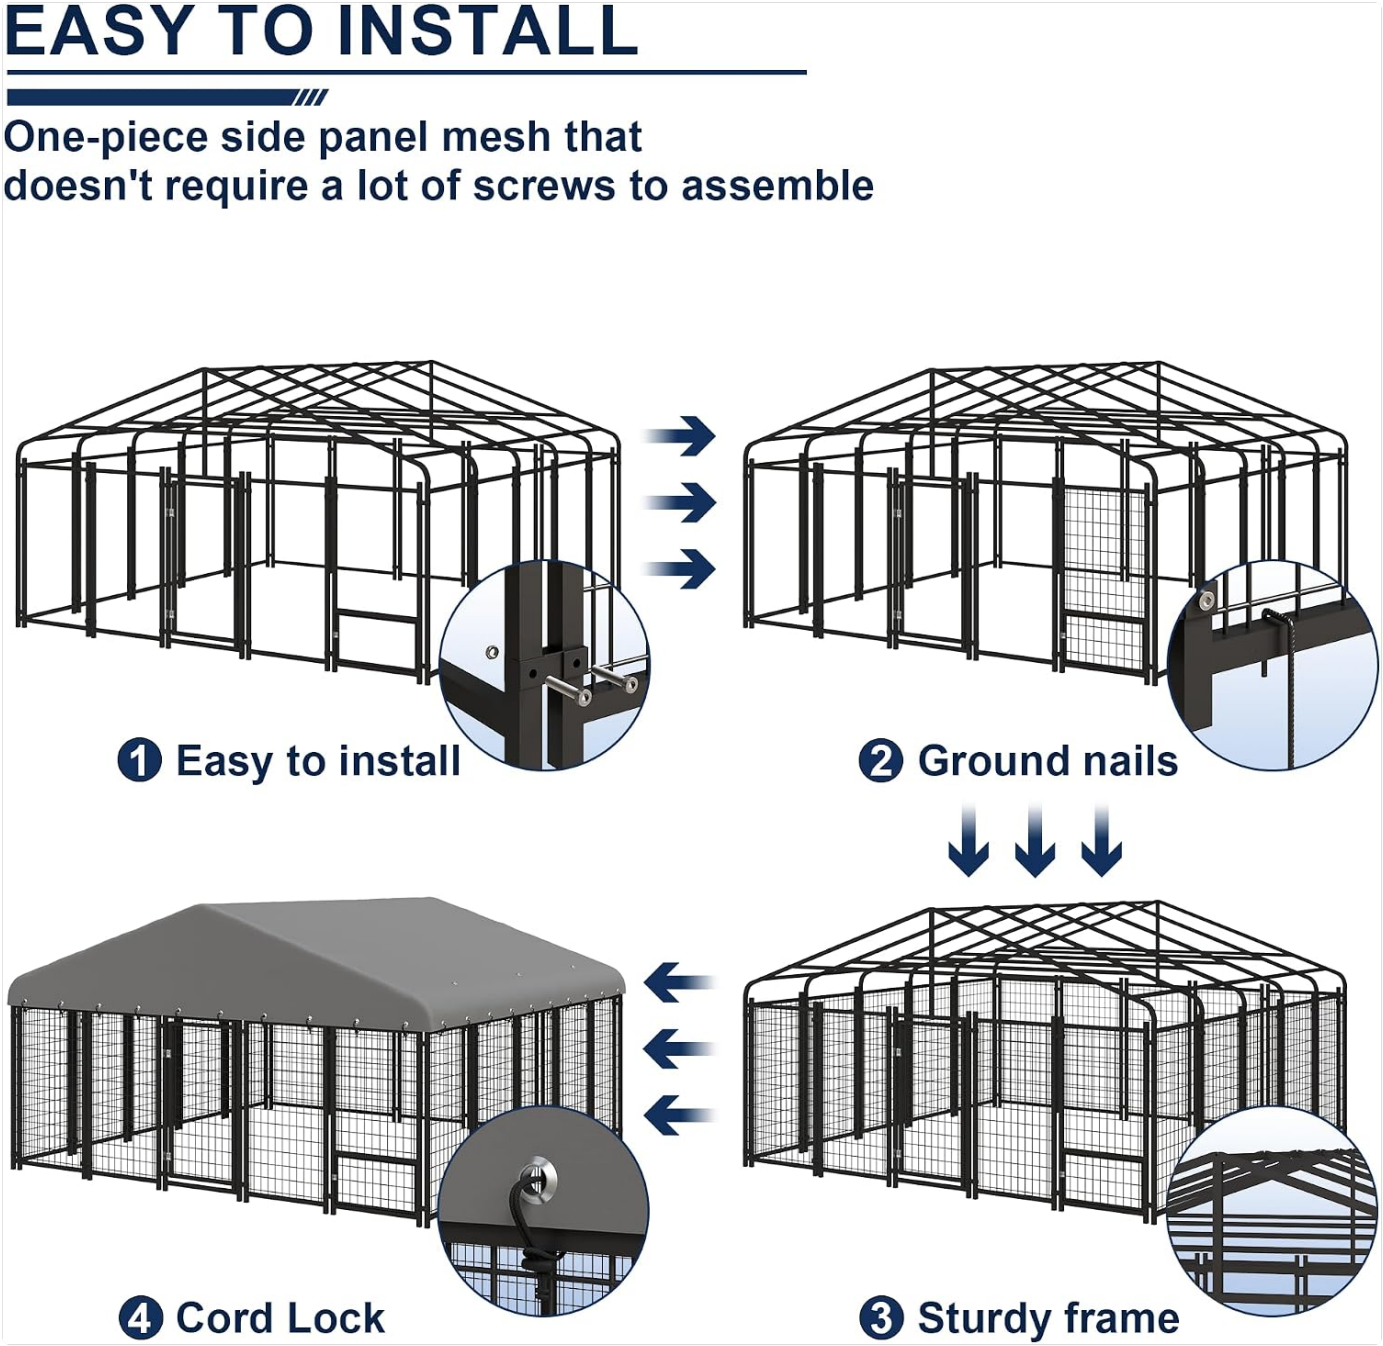

Figure 3: Assembly Steps. This diagram illustrates the four main stages of kennel construction: 1) Connecting the one-piece side panels, 2) Securing the base with ground nails, 3) Forming the sturdy frame, and 4) Attaching the roof cover using cord locks.

Operation

Accessing the Kennel

The main door features a **double-lock system** for enhanced security. To open, disengage both locking mechanisms and pull the door outwards. Ensure both locks are engaged when the door is closed to prevent accidental openings.

Using the Feeder Door

A convenient small feeder door is integrated into one of the panels. This allows for easy access to provide food and water to your pet without needing to enter the main kennel area. Simply unlatch the feeder door, place or remove bowls, and securely re-latch it.

Figure 4: Kennel Features. This image highlights the integrated feeder door for convenient feeding and the robust double-lock system on the main entrance for enhanced security.

Maintenance

- **Regular Cleaning:** Clean the kennel regularly with mild soap and water. Rinse thoroughly and allow to air dry. Avoid harsh chemicals that could damage the protective coating or harm your pet.
- **Inspect for Wear:** Periodically check all panels, welds, and connections for any signs of rust, damage, or loosening. Tighten any loose screws or bolts immediately.
- **Roof Cover Care:** Ensure the roof cover remains taut to prevent water accumulation. Clean the roof cover as needed to remove dirt or debris. In extreme weather conditions (e.g., heavy snow), consider removing the roof cover to prevent damage.
- **Ground Anchors:** Verify that the ground anchors remain securely in place, especially after heavy rains or strong winds.

Troubleshooting

Problem	Possible Cause	Solution
Difficulty during assembly	Instructions unclear, parts not aligning, or attempting assembly alone.	Review the assembly diagrams carefully. Ensure all panels are oriented correctly. It is highly recommended to have two people for assembly. Use your own tools (e.g., ratchet set) for easier tightening.
Kennel feels unstable after assembly	Not all bolts/screws are fully tightened, or ground anchors are not properly installed.	Go back and ensure all connections are securely tightened. Verify that all ground nails/anchors are firmly driven into the ground. Ensure the kennel is on a level surface.
Roof cover sags or collects water	Roof cover not taut enough or improperly secured.	Re-adjust the roof cover and tighten the cord locks to ensure it is stretched evenly and taut across the frame.
Feeder door or main door not closing properly	Misalignment or obstruction.	Check for any debris obstructing the latch. Ensure the panel is not bent or misaligned. If necessary, slightly adjust the panel or latch mechanism.
