3. INSTALLATION (SETUP)

The atomberg Erica Artesta ceiling fan is designed for easy installation on various ceiling types. Professional installation services are available at a nominal cost across India if required. Contact customer support for assistance.

Ceiling Compatibility:

This fan is compatible with both standard and false/low-height ceilings. For false ceilings or low heights, use the provided ceiling plate with the bottom canopy. For full height availability, both the bottom and top canopies can be used.

Suits every ceiling

Wiring Instructions:

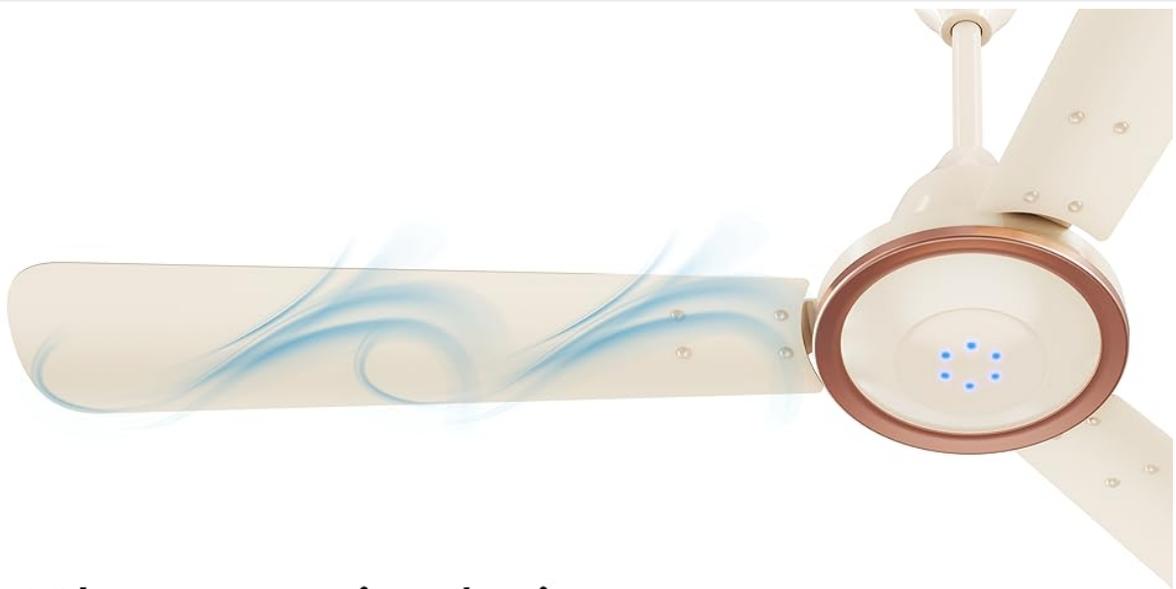

Ensure the electricity flows directly to the fan. If an existing regulator is present, it should be disconnected from the electrical board to ensure optimal performance of the BLDC motor.

Blade Attachment:

Attach the blades securely to the motor. Ensure all screws are tightened with equal torque to prevent wobbling during operation. If wobbling occurs, check blade attachment and consider using insulation tape on the ceiling mount before fixing the downrod to minimize movement.

4. OPERATING INSTRUCTIONS

The fan is operated using the included Smart IR Remote. The remote is universal across atomberg fans and does not require pairing.

Where superior design meets best-in-class air delivery

Image 4.1: Smart IR Remote control functions.

Remote Control Functions:

- **Power On/Off:** Press the power button to turn the fan on or off.
- **Speed Adjustment:** Use the speed buttons (1-6) to select the desired fan speed. The fan has 6 power levels.
- **Boost Mode:** Activates the highest fan speed for maximum airflow.
- **Timer Mode:** Set the fan to switch off after a pre-set number of hours.
- **Sleep Mode:** Gradually decreases the fan's speed over time, typically every two hours, for comfortable sleep.
- **LED Light Control:** Turn the integrated LED light on or off.

LED Speed Indicator:

The fan features an LED light that provides visual feedback for various operations, such as turning the fan on/off, adjusting speed, or setting timer/sleep modes.

5. MAINTENANCE

To ensure optimal performance and longevity of your atomberg Erica Artesta ceiling fan, regular maintenance is recommended.

- **Cleaning:** Periodically clean the fan blades and motor housing with a soft, dry cloth to remove dust accumulation. Do not use abrasive cleaners or solvents.
- **Blade Inspection:** Check the fan blades for any signs of damage or imbalance. Ensure all blade screws remain tight.
- **Mounting Check:** Annually inspect the ceiling mount and downrod for secure attachment.

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your ceiling fan.

Fan Wobbling:

- Ensure all blade screws are securely tightened with equal torque.
- Verify that the downrod is firmly attached to the ceiling mount. Applying a few rounds of insulation tape on the ceiling mount before fixing the downrod can help reduce movement.

Fan Not Responding to Remote:

- Check the batteries in the remote control and replace them if necessary.
- Ensure there are no obstructions between the remote and the fan's receiver.

Reduced Airflow or Unusual Noise:

- Clean the fan blades and motor housing to remove dust buildup.
- Inspect blades for any damage or bending.
- Ensure the fan is operating at a sufficient speed setting.

Power Fluctuations:

The fan is designed to maintain consistent speed during voltage fluctuations between 165V-285V. If issues persist outside this range, consult an electrician.

7. SPECIFICATIONS

Detailed technical specifications for the atomberg Erica Artesta 1200mm BLDC Ceiling Fan.

The image displays three feature cards for the Atomberg BLDC ceiling fan. Each card has a yellow background and a white circular icon.
