Calvin Klein 25200508

Calvin Klein Distinguish Quartz Multifunction Men's Watch

Instruction Manual - Model 25200508

INTRODUCTION

This manual provides essential instructions for the proper use, setup, and maintenance of your Calvin Klein Distinguish Quartz Multifunction Men's Watch, Model 25200508. Please read this manual thoroughly to ensure optimal performance and longevity of your timepiece. This watch features a gunmetal round dial, quartz multifunction movement, and a leather strap.

SETUP

Initial Inspection

Upon unboxing, inspect the watch for any visible damage. Ensure all protective films are removed from the crystal and case back. The watch comes with a battery installed.

Setting Time and Date

1. **Pull out the crown:** Gently pull the crown (the knob on the side of the watch) to the first or second click position, depending on your model's specific functions.
2. **Adjust the time:** Rotate the crown to set the hour and minute hands. For multifunction models, ensure the AM/PM is correctly set if applicable, by observing the date change.
3. **Adjust the date/day:** If your watch has a date or day display, rotate the crown in the opposite direction or pull it to a different click position (refer to specific model instructions if available) to set the correct date and day.
4. **Push in the crown:** Once time and date are set, push the crown back into its normal operating position to start the watch.

OPERATING THE WATCH

Quartz Multifunction Movement

Your Calvin Klein Distinguish watch is equipped with a quartz multifunction movement. This means it is powered by a battery and typically includes additional subdials for day, date, or 24-hour display. These functions operate automatically once the time is set. The chronograph feature, if present, functions as a stopwatch, controlled by the pushers adjacent to the crown.

Water Resistance

This watch is water-resistant up to 30 meters (3 ATM). This rating means the watch is suitable for everyday use and can withstand splashes or brief immersion in water. It is **not** suitable for swimming, showering, or diving. Always ensure the crown is fully pushed in before any contact with water.

MAINTENANCE

Cleaning Your Watch

- For the case and crystal: Use a soft, dry cloth to wipe away dust and smudges. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying.
- For the leather strap: Avoid prolonged exposure to water, direct sunlight, and harsh chemicals. Clean with a soft, dry cloth. Leather conditioners specifically designed for watch straps can be used sparingly to maintain flexibility and appearance.

Battery Replacement

The watch is powered by a standard A battery. When the watch stops or the second hand begins to skip, it indicates a low battery. Battery replacement should be performed by a qualified watch technician to ensure

proper sealing and maintain water resistance.

TROUBLESHOOTING

- **Watch not running:** Check if the crown is fully pushed in. If it is, the battery may need replacement.
- **Incorrect time/date:** Refer to the "Setting Time and Date" section to re-adjust.
- **Condensation under crystal:** This indicates a breach in water resistance. Immediately seek professional service to prevent further damage.
- **Strap discomfort:** Ensure the strap is not too tight or too loose. Leather straps may require a break-in period.

For issues not covered here, please contact customer support or an authorized service center.

SPECIFICATIONS

Model Name	Distinguish
-------------------	-------------

Model Number	25200508
Movement Type	Quartz Multifunction
