3. KEY FEATURES

- **Tri-Mode Connection:** Supports 2.4G wireless, BT5.0 wireless, and USB-C wired connections. Capable of saving up to 4 devices for quick switching.
- **High Capacity Battery:** Built-in 800mAh rechargeable battery provides up to 130 hours of continuous use (based on 5 hours daily use for 20 days). Features primary sleep mode for power saving.
- **Lightweight Design:** Weighs approximately 49g, reducing hand fatigue during extended use. Includes 6 pieces of non-slip stickers for enhanced grip.
- **Adjustable DPI:** Offers 6 DPI levels (800-1600-2400-3200-6400-12,000) adjustable via a bottom button or custom driver software.
- **Adjustable Polling Rate:** Four adjustable polling rates (125Hz-250Hz-500Hz-1000Hz) for smooth and accurate tracking.
- **Programmable Buttons:** Features 6 customizable buttons, supporting macro programming for personalized commands.
- **Wide Compatibility:** Compatible with Windows 7/8/10/XP/Vista, Mac OS, Linux, and Android systems.

4. SETUP GUIDE

4.1. Initial Charging

Before first use, it is recommended to fully charge the mouse. Connect the included USB-C cable to the mouse's Type-C interface and the other end to a USB power source (e.g., computer USB port, wall adapter). The indicator light will show charging status.

4.2. Connecting the Mouse

The X23Pro mouse offers three connection modes:

1. 2.4G Wireless Mode:

- Locate the USB receiver in the compartment on the bottom of the mouse.
- Plug the USB receiver into an available USB port on your computer.
- Slide the switch on the bottom of the mouse to the '2.4G' position.
- Long press the 'Code Key' (located on the bottom) until the top indicator light flashes green, indicating pairing mode. The mouse should connect automatically.

2. Bluetooth 5.0 Mode:

- Slide the switch on the bottom of the mouse to the 'BT' position.
- Long press the 'Code Key' until the top indicator light flashes blue, indicating pairing mode.
- On your device (PC, laptop, Mac, Android), go to Bluetooth settings and search for 'X23Pro'. Select it to pair.

3. USB-C Wired Mode:

- Connect the USB-C cable to the mouse and the other end to your computer's USB port.
- The mouse will automatically switch to wired mode and function without needing to select a wireless mode.

4.3. USB Receiver Storage

The USB receiver is conveniently stored in a dedicated compartment on the bottom of the mouse for portability and to prevent loss. To access it, gently open the small cover on the bottom.

5. OPERATING INSTRUCTIONS

5.1. Button Functions

The EWEADN X23Pro mouse features 6 buttons, each with a default function:

- **Left Button:** Primary click function.
- **Right Button:** Secondary click function (context menu).
- **Scroll Wheel:** Scroll up/down. Click for middle button function.
- **Forward Button:** Navigates forward in web browsers/applications.
- **Backward Button:** Navigates backward in web browsers/applications.
- **DPI Button (bottom):** Cycles through DPI settings.
- **Code Key (bottom):** Used for pairing in wireless modes.

MULTI-FUNCTION BUTTONS

5.2. Adjusting DPI

The mouse has 6 preset DPI levels: 800, 1600 (default), 2400, 3200, 6400, and 12,000. To change DPI, press the DPI toggle button located on the bottom of the mouse. The indicator light may change color to reflect the current DPI setting. For custom DPI values, use the dedicated driver software.

SIX SPEED DPI FREE CHANGE

Users can set different DPI by the DPI button or custom software

DPI: 800-1600-2400-3200-6400-12000

12000

Image: The EWEADN X23Pro mouse with a large '12000' overlay, illustrating its maximum DPI capability and adjustable settings.

5.3. Adjusting Polling Rate

The mouse supports 4 adjustable polling rates: 125Hz, 250Hz, 500Hz, and 1000Hz. These can be adjusted via the driver software to optimize responsiveness for different tasks or games.

1000Hz POLLING RATE

6. MAINTENANCE

6.1. Cleaning

To maintain optimal performance and appearance, regularly clean your mouse. Use a soft, dry cloth to wipe the surface. For stubborn dirt, a slightly damp cloth with mild soap can be used, ensuring no liquid enters the mouse. Avoid harsh chemicals or abrasive materials.

6.2. Battery Care

To prolong battery lifespan:

- Avoid fully discharging the battery frequently.
- Store the mouse in a cool, dry place when not in use for extended periods.
- If storing for a long time, charge the battery to about 50% before storage.

7. TROUBLESHOOTING

If you encounter issues with your EWEADN X23Pro mouse, please refer to the following common solutions:

- **Mouse not responding:**
 - Ensure the mouse is charged.
 - Check the connection mode switch (2.4G/BT/OFF).
 - For 2.4G, ensure the USB receiver is securely plugged in. Try a different USB port.
 - For Bluetooth, ensure Bluetooth is enabled on your device and the mouse is paired. Try re-pairing.
 - Try connecting via USB-C wired mode to confirm basic functionality.
- **Lag or erratic movement:**
 - Ensure the mouse is on a clean, non-reflective surface.

- Check for interference from other wireless devices (for 2.4G/BT modes).
- Adjust the polling rate via the software to a lower setting if experiencing instability.
- Clean the optical sensor on the bottom of the mouse.

- **Buttons not working or unresponsive:**

- Ensure the mouse is fully charged.
- If using custom software, reset button assignments to default and test.
- Update the mouse driver software to the latest version.

- **Mouse enters sleep mode too quickly:**

- The mouse enters primary sleep mode after 1 minute of inactivity. This is normal behavior to conserve battery. Movement or a button press will wake it up.

If these steps do not resolve the issue, please contact customer support.
