URnicehome 360° Rotating Auto Face Tracking Phone Holder UR-F2S Instruction Manual

1. INTRODUCTION

This manual provides detailed instructions for the URnicehome 360° Rotating Auto Face Tracking Phone Holder, model UR-F2S. This device is designed to enhance your video recording and live streaming experience by automatically tracking your face or body, ensuring you remain in frame without manual adjustments. Please read this manual thoroughly before use to ensure proper operation and longevity of your device.

2. KEY FEATURES

- **AI Cloud Eye Technology:** Utilizes real-time AI to automatically detect and follow your face or body, rotating 360° for stable tracking. Optimal following distance is 1.64 to 12 feet.
- **No App/Bluetooth Required:** Operates independently without the need for complex app installations or Bluetooth connections. Simply press the start button.
- **Wide Compatibility:** Adjustable device clamp accommodates smartphones and mini tablets from 1.6 to 11.8 inches, supporting devices up to 1.1 lbs.
- **Long-Lasting Battery:** Built-in 1800mAh rechargeable battery provides up to 5 hours of continuous use after a 2.5-hour Type-C fast charge. Includes a low-power reminder.
- **Portable Design:** Compact dimensions (3.5×3.5×5.43 inches) for easy portability.
- **Universal Screw Hole:** Features a 1/4" universal screw hole for mounting on a tripod (tripod not included).

3. WHAT'S IN THE BOX

- 1 × 360° Smart Tracking Gimbal Holder

- 1 × USB-Type-C Charging Cable

4. SETUP INSTRUCTIONS

1. **Charge the Device:** Before first use, fully charge the device using the provided USB-Type-C cable. The red indicator light will turn green when charging is complete.
2. **Mount Your Device:** Extend the adjustable device clamp and securely place your smartphone or mini tablet. Ensure the device is centered for optimal balance.
3. **Power On:** Press and hold the power button located on the front of the holder until the indicator light illuminates.
4. **Optional Tripod Mounting:** If desired, screw the holder onto a compatible tripod using the 1/4" universal screw hole at the base.

5. OPERATING INSTRUCTIONS

5.1. Automatic Face and Body Tracking

Once powered on, the integrated AI cloud eye technology will automatically begin scanning for faces or bodies within its optimal tracking range (1.64 to 12 feet). Position yourself within this range, and the holder will rotate 360° to keep you centered in the frame.

5.3. Usage Scenarios

The UR-F2S is suitable for various applications:

- **Selfies:** Capture perfect self-portraits with automatic framing.
- **Vlog Recording:** Maintain consistent framing while moving during vlogs.
- **Live Streaming:** Engage with your audience without worrying about staying in frame.
- **Video Calls:** Enjoy hands-free video conversations.

6. CHARGING THE DEVICE

The UR-F2S features a built-in 1800mAh rechargeable battery. To charge, connect the provided USB-Type-C cable to the charging port on the device and to a suitable power source. The charging process takes approximately 2.5 hours for a full charge, providing up to 5 hours of continuous usage. A red indicator light signifies charging, turning green upon completion. A flashing red light indicates a low battery.

7. DEVICE COMPATIBILITY

The auto face tracking stand is designed to be compatible with a wide range of devices. Its adjustable clamp can hold smartphones and mini tablets with widths ranging from 1.6 to 11.8 inches and a maximum weight of 1.1 lbs. This ensures compatibility with most modern mobile devices.

8. PORTABILITY AND TRIPOD MOUNTING

With compact dimensions of 3.5×3.5×5.43 inches, the UR-F2S is highly portable and can be easily carried in one hand or stored in a bag. For extended use or specific shooting angles, the device includes a 1/4" universal screw hole at its base, allowing it to be mounted on most standard tripods (tripod sold separately).

9. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the device. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the device in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** To prolong battery life, avoid fully discharging the device frequently. Charge it regularly, even if not in use for extended periods.

10. TROUBLESHOOTING

Problem	Possible Cause	Solution
Device does not power on.	Low battery.	Charge the device fully.
Tracking is inconsistent or stops.	Subject out of optimal range (1.64-12 ft); Obstruction of AI lens; Rapid movement.	Ensure subject is within range and AI lens is clear. Reduce speed of movement.
Device does not rotate smoothly.	Phone not balanced in clamp; Obstruction.	Re-center the phone in the clamp. Check for any physical obstructions.
