## CKNET AirFit N20

# CKNET Replacement Elbow and Short Tube for ResMed AirFit N20 and AirTouch N20

User Manual

### Introduction

This manual provides instructions for the proper use, installation, and maintenance of the CKNET Replacement Elbow and Short Tube, designed for compatibility with ResMed AirFit N20 and AirTouch N20 CPAP masks. Adhering to these guidelines will help ensure optimal performance, reduce noise, and prevent air leakage.

### Safety Information

- Always inspect the elbow and short tube for any signs of damage or wear before each use. Replace immediately if damage is observed.
- Ensure all connections are secure to prevent air leakage, which can affect therapy effectiveness.
- Clean components regularly as instructed in the Maintenance section to maintain hygiene and performance.
- This product is intended for use with compatible ResMed AirFit N20 and AirTouch N20 CPAP masks. Do not attempt to use with incompatible equipment.

### Package Contents

Each package contains the following items:

- 2 x Replacement Short Tubes for AirFit N20
- 2 x Replacement Elbows for AirFit N20

### Setup and Installation

Follow these steps to properly install the replacement elbow and short tube:

1. **Disconnect Existing Components:** Carefully detach the existing elbow and short tube from your ResMed AirFit N20 or AirTouch N20 mask frame and your main CPAP hose.
2. **Attach New Elbow to Mask Frame:** Align the new replacement elbow with the connection point on your mask frame. Push

firmly until it clicks securely into place. Ensure a snug fit to prevent air leaks.

3. **Attach Short Tube to Elbow:** Connect one end of the replacement short tube to the elbow. The connection should be firm and secure.
4. **Connect to Main CPAP Hose:** Connect the other end of the short tube to your main CPAP air delivery hose. This product is compatible with various 22mm diameter hoses.

Figure 1: The replacement short tube and elbow connected to a CPAP mask, illustrating the overall assembly.

Figure 2: The elbow features a 360-degree rotatable design for flexible positioning and comfort.

Figure 3: The short tube and elbow are designed for compatibility with standard 22mm diameter CPAP hoses.

## Operating Instructions

Once installed, the replacement elbow and short tube function similarly to the original components. Ensure the mask is properly fitted to your face to create a seal. The improved design aims to reduce noise and prevent air leakage, contributing to a more effective and comfortable therapy experience. Adjust the mask and headgear as needed to achieve a secure, yet comfortable, fit without overtightening.

## Maintenance

Regular cleaning of your CPAP mask components, including the elbow and short tube, is essential for hygiene and optimal performance.

1. **Daily Cleaning:** Disconnect the short tube and elbow from the mask and main hose. Wash them in warm water with a mild soap. Rinse thoroughly with clean water.

2. **Drying:** Allow all components to air dry completely out of direct sunlight before reassembling.
3. **Inspection:** Periodically inspect the components for any signs of wear, cracks, or discoloration. Replace if necessary.

## Troubleshooting

- **Air Leakage:** If you experience air leakage, check that the elbow is securely attached to the mask frame and the short tube is firmly connected to both the elbow and the main CPAP hose. Ensure the mask itself is properly sealed on your face.
- **Increased Noise:** Excessive noise can indicate a loose connection or a component that is not fully seated. Recheck all connections. The improved design of this product is intended to reduce noise, so persistent noise may indicate an issue with other parts of your CPAP system or an improper fit.
- **Difficulty Connecting:** Ensure you are using the correct replacement parts for your ResMed AirFit N20 or AirTouch N20 mask. The connections should fit snugly but not require excessive force.

## Specifications

| Feature | Detail |
|---|---|
| Brand | CKNET |
| Material | Plastic |
| Color | White |
| Item Weight | 0.06 Kilograms |
| Outside Diameter | 0.47 Inches |
| Item Length | 12 Inches |
| UPC | 745431499329 |
| Number of Packs | 2 |

## Customer Support

CKNET is committed to product quality and customer satisfaction. If you have any questions, concerns, or require assistance with your replacement elbow and short tube, please contact our customer service team.
