MYATOTO CB6A-BK

MYATOTO CB6A AI Box User Manual

Model: CB6A-BK

INTRODUCTION

The MYATOTO CB6A AI Box is a versatile device designed to enhance your in-car infotainment system. It converts your existing wired CarPlay or Android Auto into a wireless connection and integrates a full Android 13.0 operating system directly onto your car's head unit. This allows for a wide range of applications, advanced connectivity options, and smart features to improve your driving experience.

Key features include 4G LTE SIM card support, dual-band Wi-Fi, Bluetooth tethering, built-in GPS with TrackHU, and the innovative DriveChat AI assistant powered by ChatGPT. The device is equipped with an octa-core processor (SD662/SM6115) and 4GB RAM + 64GB storage, expandable up to 256GB.

PACKAGE CONTENTS

Please verify that all items are present in your package:

- MYATOTO CB6A AI Box Carplay Adapter
- USB A to A Y-Cable
- USB A-to-C Cable
- USB C-to-C Cable

COMPATIBILITY

The MYATOTO CB6A AI Box is designed for broad compatibility with vehicles equipped with wired CarPlay. It supports:

- **Car Stereos:** Compatible with car stereos that come with only wired CarPlay, only wired Android Auto, both wired CarPlay and wired Android Auto, both wired CarPlay and wireless Android Auto, or both wireless CarPlay and wired Android Auto (requires pressing and holding the 'Reset' button to switch to Android Auto).
- **Phones:**
 - iPhone 5 or newer (iOS 9.0+) for wireless CarPlay.
 - Android 11.0+ for wireless Android Auto.
 - Google/Samsung phones with Android 10.0, and Samsung Galaxy S8/S8+/Note 8 with Android 9.0 are also supported.

Note: Not compatible with car stereos that only have wireless CarPlay or only wireless Android Auto. A USB power cable may be needed for some car models to ensure stable operation. This device is compatible with approximately 98% of car models that have car stereos, but is not compatible with BMW series. Some 2016-2020 Nissan, Isuzu, Camry, 2023 TOYOTA Crown, 2023 Lexus NX, and some Volkswagen models may require the included USB A to A Y-Cable for sufficient power.

Stable Internet Connection on the Go

4G LTE

Plug a Micro Sim Card

Bluetooth 4.2 Tethering

Dual Bluetooth 5.0 & 4.2: 5.0 for calls, music, etc.

WiFi

2.4 & 5GHz Dual-band WiFi

WiFi not supported for Internet when using wireless CarPlay/Android Auto

SETUP

Follow these steps for initial setup of your MYATOTO CB6A AI Box:

1. **Connect the CB6A to Your Car:** Plug the CB6A AI Box into your car's USB port using the appropriate cable (USB A-to-C or USB C-to-C). For some car models, if you experience instability, use the included USB A to A Y-Cable to boost power from two USB ports or a USB charger.
2. **Insert SIM Card (Optional):** If you plan to use 4G LTE connectivity, insert a micro SIM card into the designated slot on the device. Ensure the chip faces up and the card is inserted in the correct direction to avoid damage.
3. **Enable Bluetooth and Wi-Fi on Your Phone:** On your smartphone, enable both Bluetooth and Wi-Fi. Connect to the CB6A's Bluetooth network. The Wi-Fi connection will typically establish automatically after the Bluetooth pairing.

OPERATING INSTRUCTIONS

Internet Access

The CB6A AI Box offers multiple ways to access the internet:

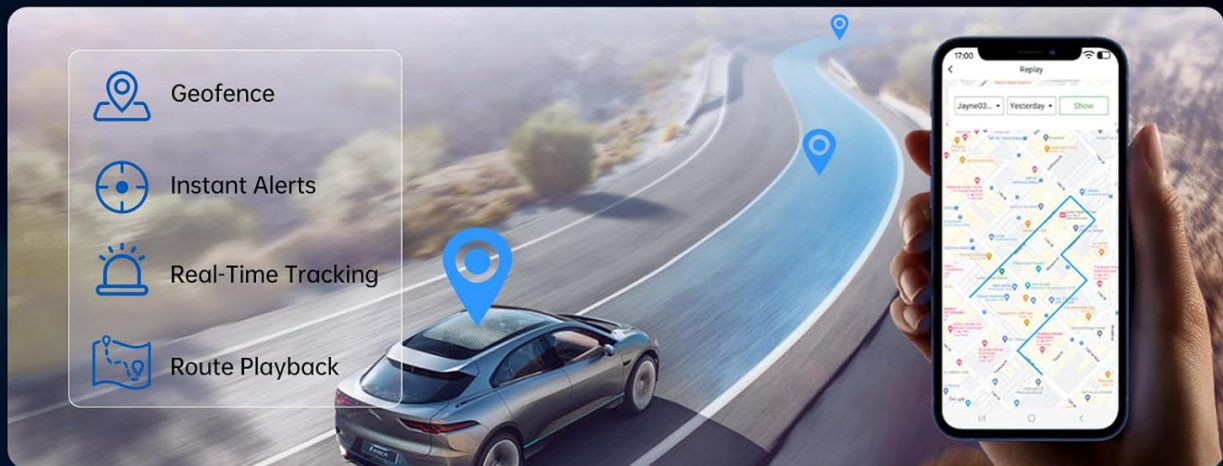

- **4G LTE SIM Card:** Insert a micro SIM card for direct cellular data connectivity.
- **2.4GHz & 5GHz Dual-band Wi-Fi:** Connect to a Wi-Fi hotspot (e.g., from your phone or a portable hotspot).
- **Bluetooth Tethering:** Use your phone's Bluetooth connection for internet access.

Note: When using wireless CarPlay or Android Auto, the CB6A's direct Wi-Fi internet access is not supported. Please use the built-in 4G LTE or Bluetooth tethering for internet connectivity during these sessions.

TrackHU - Built-in GPS Tracker

ATOTO's Featured App for Real-time GPS Tracking

On-Board Diagnostics (OBD II)

You can view car diagnostics directly on the head unit.

MAINTENANCE

OTA Updates

The CB6A AI Box supports FOTA (Firmware Over-The-Air) online upgrades. System updates can be performed directly from the device with a few taps on the screen, eliminating the need for a computer or SD card.

General Care

To ensure the longevity and optimal performance of your device, keep it in a clean, dry environment. Avoid exposing it to extreme temperatures, direct sunlight for prolonged periods, or excessive moisture. Clean the exterior with a soft, dry cloth.

TROUBLESHOOTING

If you encounter issues with your MYATOTO CB6A AI Box, consider the following common solutions:

- **Device Restarts or Instability:** If the device restarts unexpectedly, especially in areas with poor cellular signal, it may be due to insufficient power. Ensure you are using the included USB A to A Y-Cable to provide adequate power from your car's USB ports or a cigarette lighter adapter.
- **No Internet During Wireless CarPlay/Android Auto:** As noted in the operating instructions, direct Wi-Fi internet access is not supported when wireless CarPlay or Android Auto is active. Switch to using the built-in 4G LTE SIM card or Bluetooth tethering from your phone for internet connectivity.
- **SIM Card Not Recognized:** Before installing the SIM card into the CB6A, some operators' SIM cards may need to be activated using another device, such as a mobile phone. Ensure the SIM card is inserted correctly with the chip facing up.
- **Connection Issues:** Verify that your car's wired CarPlay or Android Auto is functioning correctly before connecting the AI Box. Ensure Bluetooth and Wi-Fi are enabled on your phone and correctly paired with the CB6A.

For further assistance, refer to the product pamphlet or contact customer support.

SPECIFICATIONS
