

DARKBEAM B97-365

DARKBEAM UV Flashlight Instruction Manual

Model: B97-365

Brand: DARKBEAM

INTRODUCTION

This instruction manual provides comprehensive guidance for the safe and effective use of your DARKBEAM UV Flashlight, Model B97-365. This powerful 365nm ultraviolet flashlight is designed for various detection and inspection tasks, including mineral identification, pet urine detection, uranium glass verification, resin curing, and security code authentication. Please read this manual thoroughly before operating the device to ensure optimal performance and longevity.

PRODUCT OVERVIEW

Included Components

The DARKBEAM UV Flashlight B97-365 package includes the following items:

- B97 6xLED (quad-core) UV 365nm flashlight (battery pre-inserted)
- UV protective glasses
- Cloth holster
- Hand strap
- USB-C charging cable

Image: All components included with the DARKBEAM UV Flashlight B97-365, laid out for clear identification.

Key Features

- **High Intensity & Power:** Equipped with 6 quad-core P50 UV LEDs, providing 80W power and 8040mW radiant intensity for effective detection.
- **Professional Filtered 365nm UV Light:** Features a hard toughened black filter optical lens to block visible light, emitting purer invisible UV365 light for enhanced detection of fluorescent agents, security codes, and minerals.
- **Adjustable Brightness:** Offers infinitely adjustable brightness from 20% to 100% via a long-press function, allowing precise control for various applications.
- **USB-C Rechargeable & Power Bank Function:** Built-in high-capacity rechargeable battery provides 4-6 hours runtime. USB-C direct charging and USB output for emergency power supply to other devices.
- **Durable & Portable Design:** Constructed from high-quality aluminum alloy with IPX65 waterproof rating, ensuring durability against rain, snow, shock, and dust. Compact size (5.9"D x 1.8"W x 1.4"H) and lightweight (10.8 oz) for easy handling.

80W

Equipped with 6 P50 lamp beads each containing a quad-core lamp core, this flashlight has a power of 80W. Its light intensity is 24 times that of an ordinary single-core lamp bead. The 365nm UV light, filtered for long range, is suitable for more professional detection or diagnostic work.

High power

Strong penetrability

Professional level

6 HIGH-POWER LIGHTS, **24** - CORE UV LED CHIPS

Ordinary low-power UV light ☹️

The light experiences severe attenuation when irradiating from a long distance, which makes it impossible to clearly identify fluorescent substances. Moreover, the illumination range is small.

Our B97 UV 365nm flashlight 😊

Fluorescent substances can still be clearly detected when irradiated from a long distance, and the illumination range is wide.

UV BLACK FILTER LENS

Block visible interfering light and release pure invisible 365nm UV light. With a professional spectrum, it performs well in professional - level UV 365nm output.

EXCELLENT HEAT DISSIPATION DESIGN

Ensures the stability of UV output & the lifespan of the flashlight.

ORDINARY UV LIGHT

Visible purple light affects observation & judgment.

SETUP

Initial Charging

Your DARKBEAM UV Flashlight comes with a pre-inserted rechargeable battery. For optimal performance, it is recommended to fully charge the flashlight before its first use.

1. Locate the USB-C charging port on the flashlight.
2. Connect the provided USB-C cable to the flashlight's charging port.
3. Connect the other end of the USB-C cable to a compatible USB power source (e.g., wall adapter, computer USB port, power bank) with an output within 5V/2A.
4. The power indicator light on the switch will turn RED during charging.
5. Once fully charged, the indicator light will turn GREEN. Disconnect the cable.

INPUT & OUTPUT

5000 mAh

Built-in large-capacity battery

4 hours

Running time under high-brightness mode

Safety Precautions

- **DO NOT LOOK DIRECTLY AT UV LIGHT:** Direct exposure to UV light can cause eye damage. Always use the provided UV protective glasses when operating the flashlight.
- Keep out of reach of children.
- Do not disassemble the flashlight.
- Avoid exposing the flashlight to extreme temperatures or direct sunlight for prolonged periods.
- Ensure the charging port cover is securely closed when not charging to maintain waterproof integrity.

Power On/Off and Brightness Adjustment

The flashlight features a multi-gear switch design for easy operation.

1. **To Turn On/Off:** Press the power switch once to turn the flashlight on or off.
2. **Brightness Adjustment (Stepless Dimming):** While the flashlight is on, press and hold the power switch. The brightness will gradually adjust from 20% to 100%. Release the switch at your desired brightness level.

Applications

The DARKBEAM UV Flashlight is versatile and can be used for a variety of purposes:

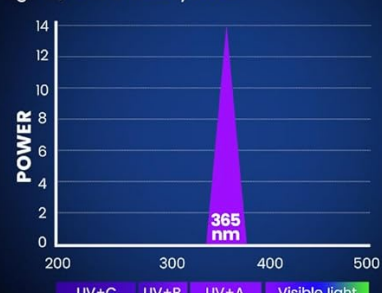

- **Mineral and Rock Identification:** Ideal for searching for fluorescent minerals and uranium glass.
- **Pet Urine and Stain Detection:** Helps reveal hidden pet stains on carpets, rugs, and furniture.
- **Currency and Document Verification:** Detects security features on banknotes, passports, and other official documents.
- **Resin Curing:** Suitable for curing UV-sensitive resins in 3D printing or nail art.
- **Leak Detection:** Can be used with fluorescent dyes to detect leaks in HVAC systems, automotive fluids, or plumbing.
- **Hotel Room Inspection:** Identify unhygienic spots or hidden stains.
- **Cat Ringworm Detection:** Aids in identifying fungal infections on pets.

PROFESSIONAL

UV IDENTIFICATION FLASHLIGHT

About UV-365NM (bluish) Light:

The UV 365nm light is invisible light (almost no interfering visible light), so the fluorescence effect would be better. It seems not as bright as 395nm light but better for demanding detection like cat ringworm, fluorescent agents, rocks or security code.

POWER

WAVELENGTH(NANOMETERS)

OPTIMAL PERFORMANCE AND SAFETY

Leak Detection

UV 365NM FLASHLIGHT

WIDELY APPLICABLE

Cat ringworm detection

Fluorescent agents

Ore identification

Currency identification

Discover hidden stains

Image: Examples of the wide applicability of the UV flashlight, demonstrating its use for detecting cat ringworm, fluorescent agents, identifying ores, verifying currency, and discovering hidden stains.

Emergency Power Supply (USB Output)

The flashlight can also function as an emergency power bank:

- Connect your electronic device (e.g., smartphone) to the USB-A output port on the flashlight using a compatible USB cable.
- The flashlight will begin charging your device.

MAINTENANCE

Cleaning

- Wipe the flashlight body with a soft, damp cloth.
- For the lens, use a lens cleaning cloth and solution to avoid scratches.
- Do not use abrasive cleaners or solvents.

Storage

- Store the flashlight in a cool, dry place away from direct sunlight.
- If storing for an extended period, ensure the battery is partially charged (around 50%) to preserve battery health. Recharge every 3-6 months.

Battery Care

- Avoid fully discharging the battery frequently.
- Do not overcharge the battery; disconnect once the indicator turns green.
- If the flashlight will not be used for a long time, charge it periodically to maintain battery life.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Flashlight does not turn on.	Battery is depleted.	Charge the flashlight using the provided USB-C cable. Check if the indicator light turns RED.
Flashlight does not charge.	Charging cable or adapter issue; port obstruction.	Ensure the USB-C cable is properly connected. Try a different USB power source or cable. Check the charging port for debris.
Light is dim or inconsistent.	Low battery; brightness setting too low.	Recharge the flashlight. Long-press the power switch to increase brightness.
USB output not charging devices.	Flashlight battery too low; incorrect cable.	Ensure the flashlight is sufficiently charged. Use a compatible USB-A cable for your device.

SPECIFICATIONS

Feature	Detail
---------	--------

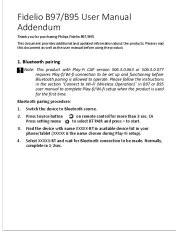

Feature	Detail
Model Number	B97-365
Light Source Type	UV (365nm)
LEDs	6x Quad-core P50 UV LEDs
Power	80W
Radiant Intensity	8040mW
Brightness Adjustment	20%-100% Stepless Dimming
Power Source	Battery Powered (Rechargeable Lithium Ion)
Battery Capacity	5000mAh (Built-in)
Runtime (High Brightness)	4-6 hours
Charging Port	USB-C Input (5V/2A max)
Output Port	USB-A Output (Emergency Power Supply)
Material	Aluminum Alloy
Water Resistance Level	IPX65 (Waterproof, Snowproof, Shockproof, Dustproof)
Product Dimensions	5.9"D x 1.8"W x 1.4"H
Item Weight	10.8 Ounces

WARRANTY AND SUPPORT

For warranty information or technical support, please contact DARKBEAM customer service through the retailer where the product was purchased or visit the official DARKBEAM website. Please have your model number (B97-365) and purchase details ready when contacting support.
