### 3.2 Connecting to Device

The connection method may vary depending on your gaming platform (PC, Switch, Android, etc.). Generally, controllers can be connected via Bluetooth or a USB cable. Refer to your device's pairing instructions and the controller's specific mode switching (if applicable) for successful connection.

- **Bluetooth Pairing:** Press and hold the pairing button on the controller until the indicator lights flash rapidly. Then, search for the controller on your device's Bluetooth settings and select it to pair.
