## Zadro ZVLV

# Zadro Lighted Makeup Mirror

Model: ZVLV

## INTRODUCTION

---

The Zadro Lighted Makeup Mirror (Model ZVLV) is a versatile, 2-sided LED lighted vanity mirror designed for detailed cosmetic application and grooming. It features 5X and 1X magnification, a 360-degree swiveling mirror head, and cordless operation using AAA batteries. This manual provides essential information for the safe and effective use of your mirror.

## **SAFETY INFORMATION**

---

Please read and understand all safety instructions before using the mirror.

- Handle the mirror with care to avoid sharp edges and potential breakage.
- Do not immerse the mirror in water or other liquids.
- Keep the mirror away from direct sunlight to prevent fire hazards from magnified light.
- Ensure batteries are inserted with correct polarity. Do not mix old and new batteries or different types of batteries.
- Remove batteries if the mirror will not be used for an extended period.

## **PACKAGE CONTENTS**

---

Verify that all items are present in the package:

- 1 x Zadro Lighted Makeup Mirror (Model ZVLV)
- 1 x User Manual (this document)

**Note:** 5 AAA batteries are not included and must be purchased separately.

## SETUP

---

### Battery Installation

The mirror requires 5 AAA batteries for operation of the LED light.

1. Carefully locate the battery compartment. It is typically integrated into one side of the mirror head or base, requiring the removal of a mirror face or cover.
2. Gently remove the designated mirror face or cover to access the battery slots.
3. Insert 5 AAA batteries into the slots, ensuring that the positive (+) and negative (-) terminals align correctly with the markings in the compartment.
4. Replace the mirror face or cover securely until it clicks into place.

## OPERATING INSTRUCTIONS

---

### Powering On/Off the LED Light

1. Locate the power button on the side of the mirror frame.
2. Press the button once to turn the LED light on. The light will illuminate the mirror surface.
3. Press the button again to turn the LED light off.

*Image: A hand demonstrating how to press the power button to turn on the LED light.*

## **Using Magnification**

The Zadro Lighted Makeup Mirror features two distinct mirror surfaces:

- **1X Magnification:** Provides a true, unmagnified reflection for general viewing.
- **5X Magnification:** Offers a magnified view for detailed tasks such as makeup application, tweezing, or skincare.

To switch between the 1X and 5X magnification sides, simply rotate the mirror head 360 degrees horizontally.

### **Adjusting Mirror Angle**

The mirror head can be tilted vertically to achieve your preferred viewing angle. Gently hold the mirror frame and tilt it forward or backward to adjust.

## MAINTENANCE

---

### Cleaning

To maintain the clarity and appearance of your mirror:

- **Mirror Surface:** Use a soft, lint-free cloth. For stubborn spots, dampen the cloth with water or a mild, non-abrasive glass cleaner. Wipe gently.
- **Frame:** Wipe the mirror frame with a soft, dry cloth.
- **Avoid:** Do not use abrasive cleaners, harsh chemicals, or rough materials, as these can scratch the mirror surface or damage the finish and LED components.

### Battery Replacement

When the LED light dims significantly or stops working, it is time to replace the batteries.

1. Follow the battery installation steps outlined in the 'Setup' section.
2. Always replace all 5 AAA batteries at the same time with new ones.
3. Dispose of used batteries responsibly according to your local regulations.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
LED light does not turn on or is dim.	Batteries are dead, incorrectly installed, or power button is stuck.	Check battery polarity. Replace all 5 AAA batteries with new ones. Ensure the power button is not stuck and press firmly.
Mirror appears flimsy or unstable.	Mirror not on a flat surface, or general product design.	Ensure the mirror is placed on a flat, stable surface. The frame is made of plastic and designed for tabletop use; handle with care.
Distortion on 5X magnified side.	Incorrect viewing distance for high magnification.	The 5X magnification is designed for close-up viewing. Move closer to the mirror (typically within 4-6 inches) for a clear, undistorted image.

## SPECIFICATIONS

Image: Dimensional overview of the Zadro Lighted Makeup Mirror.

- **Brand:** Zadro

- **Model:** ZVLV
- **Magnification:** 5X / 1X
- **Mirror Surface Diameter:** 5.75 inches
