

## STANLEY Quencher H2.0 Tumbler

# STANLEY Quencher H2.0 Tumbler User Manual

Model: Quencher H2.0 Tumbler | Brand: STANLEY

## 1. INTRODUCTION

The STANLEY Quencher H2.0 Tumbler is designed to keep your beverages at the perfect temperature for hours, whether hot, cold, or iced. Crafted from durable, recycled stainless steel, this tumbler features an advanced FlowState™ lid for versatile drinking options and an ergonomic handle for comfortable portability. It is built for a lifetime of use, supporting sustainable hydration.

## 2. PRODUCT OVERVIEW

Familiarize yourself with the components of your STANLEY Quencher H2.0 Tumbler:

Figure 2.1: STANLEY Quencher H2.0 Tumbler (Azure, 14 oz)

- **Tumbler Body:** Double-wall vacuum insulated stainless steel construction.
- **FlowState™ Lid:** Features a rotating cover with three positions for drinking.
- **Reusable Straw:** Designed to fit securely in the straw opening.
- **Comfort-Grip Handle:** Ergonomically designed for easy carrying.

Figure 2.2: Key Features of the Quencher H2.0 Tumbler

The tumbler is available in various sizes, including 14 oz, 20 oz, 30 oz, 40 oz, and 64 oz, each offering different temperature retention capabilities. The narrow base on most sizes (except 64 oz) ensures compatibility with car cup holders.

## 3. SETUP

### 3.1 Initial Cleaning

Before first use, wash the tumbler, lid, and straw thoroughly. All components are dishwasher safe. Place them on the top rack of your dishwasher for best results.

### 3.2 Lid and Straw Assembly

To assemble, align the FlowState™ lid with the tumbler opening and screw it on securely. Insert the reusable straw into the designated straw opening on the lid. The seal around the straw helps resist splashes and holds the straw in place.

## 4. OPERATING INSTRUCTIONS

### 4.1 Filling Your Tumbler

Unscrew the FlowState™ lid and fill the tumbler with your desired beverage. Do not overfill. Ensure there is adequate space for the lid to be securely attached without displacement of liquid.

### 4.2 Using the FlowState™ Lid

The FlowState™ lid offers three versatile positions:

- **Straw Opening:** For sipping with the reusable straw. This position is designed to resist splashes.
- **Drink Opening:** For direct sipping without the straw.
- **Full-Cover Top:** For added leak resistance during transport or when not in use. Rotate the cover to fully close both openings.

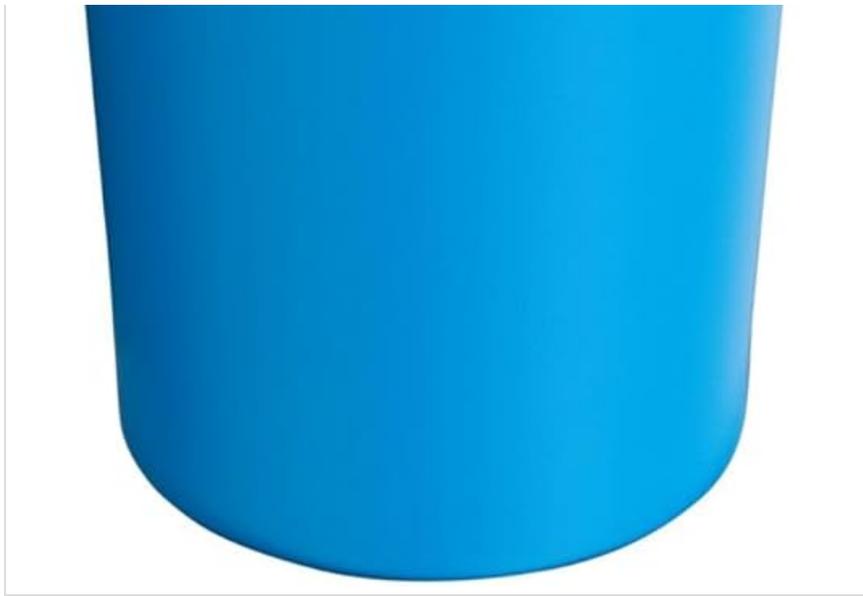

Figure 4.1: FlowState™ Lid Positions

### 4.3 Temperature Retention

The double-wall vacuum insulation ensures your drinks stay cold, iced, or hot for extended periods. For optimal performance, ensure the lid is securely closed in the full-cover position when not actively drinking.

### 4.4 Car Cup Holder Compatibility

The narrow base of the tumbler (for all sizes except 64 oz) is designed to fit most car cup holders, making it an ideal companion for travel and commutes.

## 5. MAINTENANCE AND CARE

### 5.1 Cleaning

The STANLEY Quencher H2.0 Tumbler, lid, and straw are all dishwasher safe. For thorough cleaning, disassemble the lid and straw from the tumbler. Place all parts on the top rack of your dishwasher. Unlike plastic bottles, the stainless steel construction resists stains and odors, ensuring a pristine clean after each wash.

### 5.2 Durability and Longevity

Constructed from 90% recycled, BPA-free stainless steel, your tumbler is built to withstand a lifetime of use. Avoid using abrasive cleaners or scrubbers that could damage the finish. Store with the lid off to allow for air circulation when not in use for extended periods.

## 6. TROUBLESHOOTING

- **Lid not sealing properly:** Ensure the lid is screwed on straight and fully tightened. Check for any debris or residue on the threads of the tumbler or lid gasket that might prevent a proper seal.
- **Temperature not holding as expected:** Verify that the FlowState™ lid is fully closed in the full-cover position when not in use. Extreme external temperatures can also affect internal temperature retention.
- **Straw difficult to insert or remove:** Ensure the straw opening on the lid is clear of any obstructions. If the straw is bent or damaged, it may need to be replaced.
- **Unusual odors or tastes:** Thoroughly clean all components, especially the lid and straw, as per the maintenance instructions. Ensure all parts are completely dry before reassembly and storage.

## 7. SPECIFICATIONS

Feature	Detail
Brand	STANLEY
Model	Quencher H2.0 Tumbler
Material	90% Recycled BPA-Free Stainless Steel
Insulation	Double-Wall Vacuum Insulated
Lid Type	FlowState™ 3-Position Lid
