LocoLee 77251

LocoLee LED Light Kit Instruction Manual for LEGO 77251 McLaren F1 Team MCL38 Race Car

Model: 77251

1. INTRODUCTION

This manual provides instructions for installing and operating your LocoLee LED Light Kit, designed specifically for the LEGO 77251 McLaren F1 Team MCL38 Race Car model. Please note that this product includes **only the light kit**; the LEGO model itself is not included and must be purchased separately.

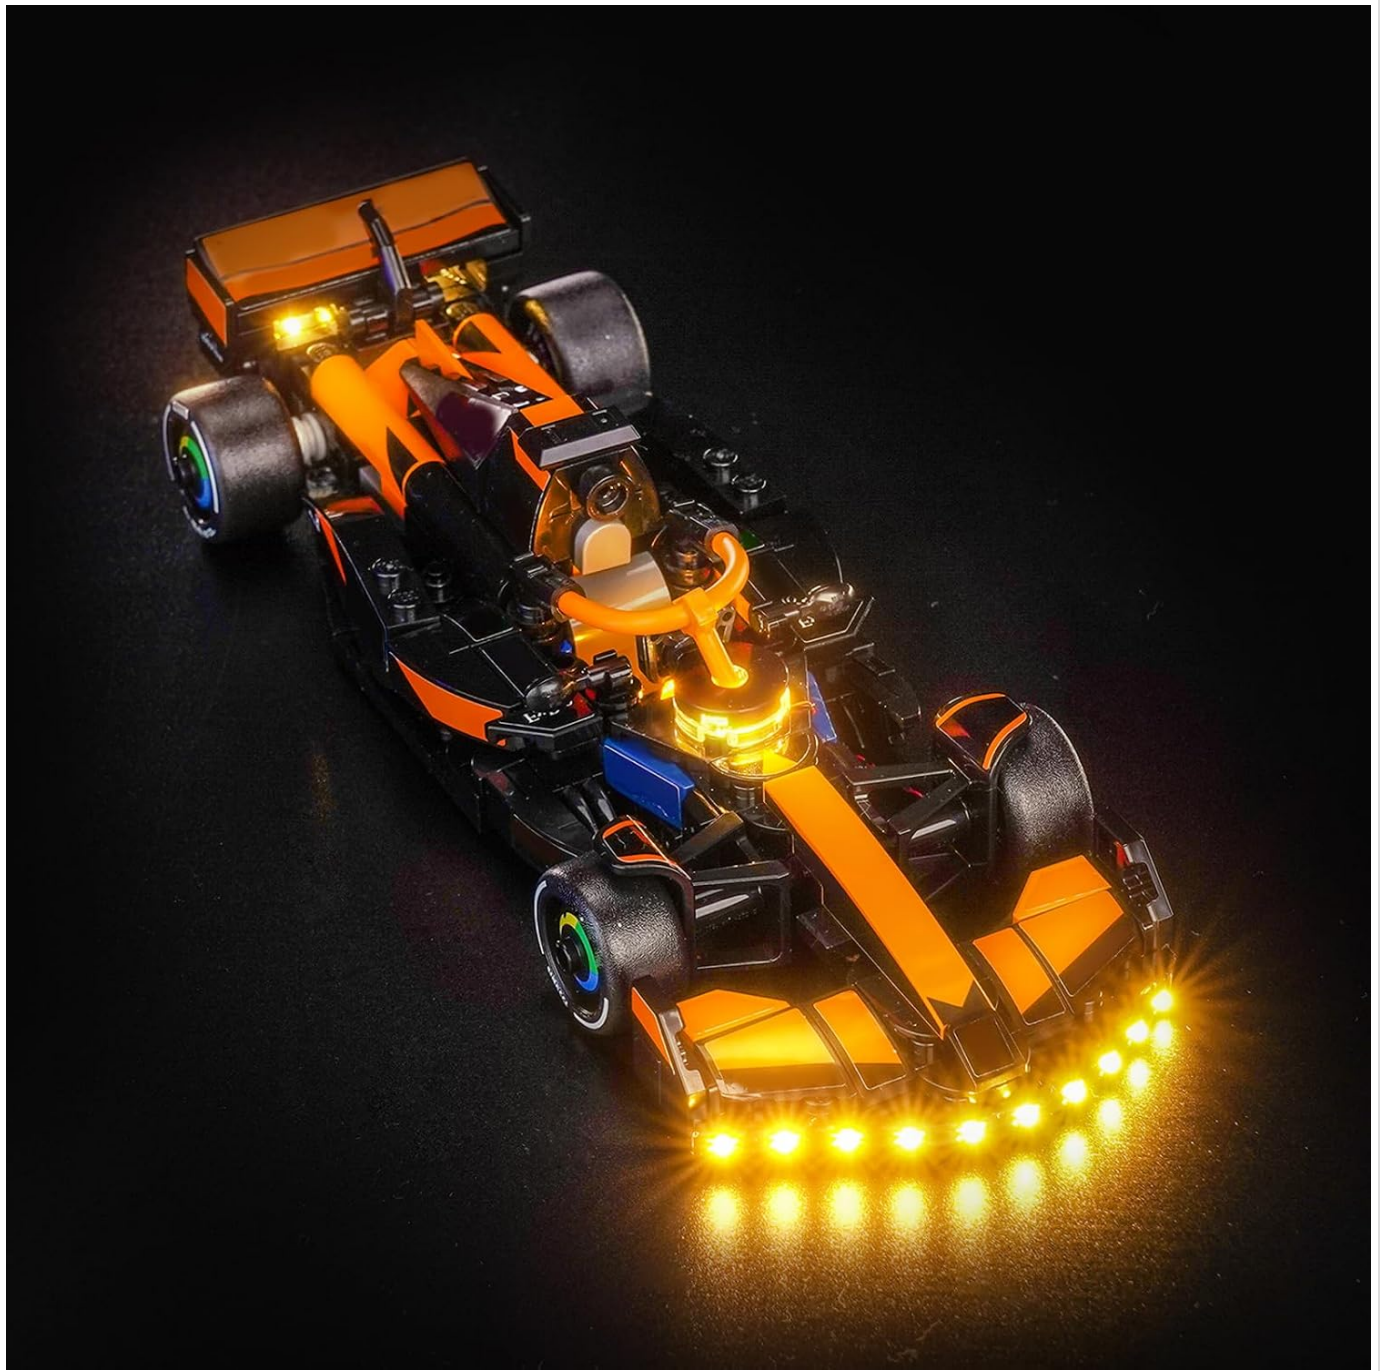

No Lego Model !

Only Led Light, Blocks Need To Be Purchased Separately

NO LEGO's with light kit

Important clarification: The LEGO model is not included with this light kit.

The LocoLee LED Light Kit enhances your LEGO model by illuminating its details, making it a more vibrant display piece. For optimal performance and longevity, please follow all instructions carefully.

- 1 x Light - 15CM Warm White
- 1 x High-Brightness Light 15CM - Warm White
- 1 x Light Strip Warm White
- 1 x LED Strip Warm White
- 1 x Connecting Cable 10CM
- 1 x 6 Expansion Board
- 1 x Power Cable

3. SAFETY INFORMATION

Please observe the following safety guidelines:

- Keep small parts away from young children to prevent choking hazards.
- Do not pull wires too hard during installation to avoid damage.
- Ensure the power source voltage is less than 5V when using USB power.
- This product is not a toy. Adult supervision is recommended during assembly.

4. SETUP AND INSTALLATION

Detailed installation instructions are provided online to guide you through the process. These instructions include both video and PDF formats for clarity.

Accessing the online installation guide for your light kit.

To access the installation guide:

1. Visit the website printed in the instruction booklet.
2. Enter the model number (77251) or the code found on the back of the packing box into the search bar.
3. Select the appropriate guide to view the PDF or video instructions.

The installation process involves disassembling a few bricks of your LEGO model to integrate the light fixtures. The parts are small and designed to be discreetly hidden within the model. It is recommended to test each light component before full assembly.

Your browser does not support the video tag.

Video demonstrating the illuminated LEGO 77251 McLaren F1 Team MCL38 Race Car model with the LocoLee LED Light Kit installed.

5. OPERATING INSTRUCTIONS

Once installed, your LocoLee LED Light Kit can be powered via USB. For brighter illumination, it is recommended to use a USB power source. Please ensure the voltage is less than 5V.

Before and after comparison of the model with and without the light kit.

The light kit is designed to bring your LEGO model to life, highlighting its intricate details and making it stand out, especially in low-light conditions.

6. MAINTENANCE

To maintain your LocoLee LED Light Kit:

- Keep the light components and wiring clean and free from dust.
- Avoid exposing the kit to excessive moisture or extreme temperatures.
- Handle the wired connections gently to prevent damage.

7. TROUBLESHOOTING

If you encounter any issues with your light kit, consider the following:

- **Lights not working:** Ensure all connections are secure and the power source is functioning correctly. Verify the USB power

voltage is less than 5V.

- **Dim lights:** Check the power source. USB power generally provides brighter illumination than battery power (if applicable).
- **Damaged wires:** Avoid pulling wires too hard during installation. If a wire is damaged, contact customer support.
- **Installation difficulties:** Refer to the detailed online video/PDF instructions.

For further assistance, please contact LocoLee customer support.
