

Blink Blink Video Doorbell + Outdoor 4

Blink Video Doorbell + Outdoor 4 Wireless Smart Security Camera System Instruction Manual

INTRODUCTION

This manual provides detailed instructions for the setup, operation, and maintenance of your Blink Video Doorbell and Outdoor 4 Wireless Smart Security Camera System. This system offers enhanced home security with features designed for ease of use and long-lasting performance.

Key Features:

- Up to two years of battery life for both devices.
- Head-to-toe HD viewing from the Video Doorbell.
- 1080p HD live view and infrared night vision from Outdoor 4.
- Crisp two-way audio for communication.
- Enhanced motion detection with dual-zone capabilities on Outdoor 4.
- Optional person detection alerts with a Blink Subscription Plan.
- Seamless integration with the Blink app and Alexa-compatible devices.

PACKAGE CONTENTS

Your Blink Video Doorbell + Outdoor 4 system includes the following components:

- 1 Blink Video Doorbell
- 1 Blink Outdoor 4 camera
- 1 Blink Sync Module Core
- 5 AA Energizer lithium batteries (3 for Doorbell, 2 for Outdoor 4)
- Mounting kits for each device
- 1 Wall plate (for Doorbell)
- 1 Doorbell removal tool
- 2 Wire extenders (for Doorbell)
- 1 Corner Mount Accessory (for Doorbell)
- 1 Drill template (for Doorbell)
- 1 Doorbell removal key
- 1 Power Adapter (for Sync Module Core)
- 1 USB-C Cable (for Sync Module Core)

SETUP GUIDE

1. Install the Blink App

Download the Blink Home Monitor app from your device's app store (iOS, Android, or Fire OS). Create an account or log in if you already have one.

2. Set up the Sync Module Core

The Sync Module Core is essential for connecting your Blink devices to the internet. Plug the Sync Module Core into a power outlet using the provided USB-C cable and power adapter. Ensure it is within Wi-Fi range (2.4 GHz 802.11b/g/n network required). Follow the in-app instructions to connect the Sync Module Core to your home Wi-Fi network.

Your browser does not support the video tag.

3. Install Batteries in Devices

Insert the provided AA 1.5V lithium metal batteries into your Blink Video Doorbell (3 batteries) and Blink Outdoor 4 camera (2 batteries). Ensure correct polarity.

4. Mount Your Devices

Use the provided mounting kits and drill template to securely install your Blink Video Doorbell and Outdoor 4 camera in desired locations. The Video Doorbell can be wired to existing chime wiring (8-24 VAC) or operate solely on battery power. The Outdoor 4 camera is battery-powered and can be mounted in various outdoor locations.

OPERATING YOUR BLINK SYSTEM

Live View and Two-Way Audio

Access live video streams from your Blink Video Doorbell and Outdoor 4 camera through the Blink Home Monitor app. Use the two-way audio feature to speak with visitors at your door or communicate with individuals near your Outdoor 4 camera.

See and speak with visitors on our easy-to-use Blink app or an Alexa-compatible device

Motion Detection and Alerts

Your Blink devices are equipped with motion detection. When motion is detected, you will receive alerts on your smartphone. The Outdoor 4 camera features enhanced dual-zone motion detection for improved accuracy. With a Blink Subscription Plan (sold separately), you can enable person detection for more specific alerts.

Video Storage

Securely store your footage in the cloud with a free 30-day trial of a Blink Subscription Plan. To retain videos beyond the trial period, a subscription is required. Videos can be stored for up to 60 days in the cloud, and important clips can be downloaded to your mobile device.

MAINTENANCE

Battery Life

Both the Blink Video Doorbell and Outdoor 4 camera offer up to two years of battery life under default settings. Actual battery life may vary based on device settings, usage frequency, and environmental factors. High activity levels or extended recording durations will consume battery power more quickly.

Weather Resistance

The Blink Outdoor 4 camera is designed to withstand various weather conditions, operating in temperatures ranging from -4°F to 113°F (-20°C to 45°C). The Blink Video Doorbell operates from -5°F to 113°F (-20°C to 45°C).

TROUBLESHOOTING

Connectivity Issues / Lag

If you experience lag in live view or delayed alerts, ensure your Sync Module Core is placed within optimal range of your Wi-Fi router and your Blink devices. A strong, stable 2.4 GHz Wi-Fi connection is crucial for optimal performance. Obstructions or distance can impact signal strength. Consider repositioning the Sync Module Core or your Wi-Fi router if issues persist.

Battery Depletion

If batteries deplete faster than expected, review your device settings in the Blink app. Frequent motion detection, long recording clips, and high sensitivity settings can increase battery consumption. Adjust these settings to optimize battery life.

SPECIFICATIONS

Feature	Blink Video Doorbell	Blink Outdoor 4	Sync Module Core
Video Resolution	1440 x 1440p	1080p HD video	N/A
Field of View	150° HV	143° diagonal	N/A
