2. SAFETY INFORMATION

Operating heavy machinery requires strict adherence to safety protocols. Failure to follow these guidelines can result in serious injury or death.

- Always wear appropriate personal protective equipment (PPE), including a hard hat, safety glasses, hearing protection, and sturdy footwear.
- Ensure the work area is clear of bystanders, especially children and pets.
- Inspect the machine before each use for any signs of damage, leaks, or loose components.
- Never operate the loader under the influence of alcohol or drugs.
- Familiarize yourself with all controls and emergency shutdown procedures.
- Maintain a safe distance from slopes, trenches, and unstable ground.
- Do not exceed the rated load capacity of the machine.
- Always lower the bucket to the ground and engage the parking brake before leaving the operator's seat.

3. SETUP AND PRE-OPERATION CHECKS

Before operating your HY480D, perform the following setup and checks:

1. **Unpacking and Initial Assembly:** The mini skid steer loader arrives on a pallet. Install the roof structure if it was shipped separately. Ensure all fasteners are securely tightened.
2. **Fluid Checks:** Verify engine oil, hydraulic fluid, and fuel levels are at their recommended marks. Refer to the specifications section for capacities.
3. **Hydraulic System Bleeding:** After initial setup or maintenance, it is recommended to bleed the hydraulic system. Start the engine at a slow idle and operate the controls back and forth to remove any air in the lines.
4. **Control Familiarization:** Sit in the operator's seat and familiarize yourself with the location and function of all controls, gauges, and indicators.

4. OPERATING INSTRUCTIONS

4.1 Starting the Engine

1. Ensure the power switch is engaged.
2. Insert the key into the ignition and turn it to the 'ON' position.
3. Adjust the throttle to the desired setting.
4. Turn the key further to the 'START' position to crank the engine. Release once the engine starts.
5. Allow the engine to warm up for a few minutes before engaging in heavy work.

4.2 Controls and Movement

The HY480D features intuitive hand controls for steering, lifting, and tilting. The seated central position provides excellent visibility and stability.

MULTI FUNCTIONAL SKID STEER LOADER

Suitable for various narrow spaces

- ✓ Strong power
- ✓ Sturdy structure
- ✓ Thick tires

- **Steering:** Use the left and right control levers to steer the machine. Pushing both forward moves the loader forward; pulling both back moves it backward. Pushing one forward and pulling the other back allows for turning.
- **Lifting/Lowering:** The hydraulic cylinder controls the lift arm. Use the appropriate lever to raise or lower the bucket.
- **Tilting:** The bucket can be tilted up or down using a separate control lever for precise material handling.

HYDRAULIC CYLINDER

The lifting and lowering of the large arm through hydraulic operation is very easy and convenient.

4.3 General Operation Tips

- Operate the machine smoothly, avoiding sudden movements.
- When traveling, keep the bucket low to the ground for stability.
- Always maintain a clear view of your surroundings and the attachment.
- On hard surfaces like concrete and asphalt, the wheeled design provides optimal performance.
