7. MAINTENANCE

Regular maintenance helps ensure optimal performance and longevity of your projector:

- **Lens Cleaning:** Use a soft, lint-free cloth specifically designed for optical lenses to gently wipe the projector lens. Do not use abrasive cleaners or excessive force.
- **Ventilation:** Periodically check that the ventilation openings are clear of dust and debris. Use a soft brush or compressed air to clean them.
- **Storage:** When not in use, store the projector in a cool, dry place, away from direct sunlight and extreme temperatures.

8. TROUBLESHOOTING

If you encounter issues with your projector, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No Power	Power cord not connected; Power outlet faulty; Projector off.	Ensure power cord is securely connected. Test outlet with another device. Press power button.
No Image	Input source incorrect; Cable loose; Lens cap on.	Select correct input source (HDMI, USB). Check cable connections. Remove lens cap.
Blurry Image	Focus not adjusted; Keystone incorrect; Projector too close/far.	Adjust focus ring. Check auto keystone correction or manually adjust. Adjust projection distance.
No Sound	Volume too low; Muted; External audio device not connected/paired.	Increase volume. Unmute. Ensure Bluetooth device is paired or wired device is connected.
Wi-Fi Connection Issues	Incorrect password; Router too far; Network interference.	Verify Wi-Fi password. Move projector closer to router. Restart router and projector.
