caramco Wireless CarPlay & Android Auto Module

caramco Wireless CarPlay & Android Auto Module User Manual

Model: Wireless CarPlay & Android Auto Module

Brand: caramco

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and troubleshooting of your caramco Wireless CarPlay & Android Auto Module. This module upgrades your vehicle's infotainment system with seamless wireless smartphone integration.

Image: The caramco Wireless CarPlay & Android Auto Module shown alongside a vehicle's infotainment screen displaying the CarPlay interface.

COMPATIBILITY

This module is designed for specific Infiniti and Nissan models. It is crucial to verify your vehicle's compatibility before installation.

- **Compatible Models:** Infiniti JX35, M25, M35, M37, M56, Q70, QX56, QX60, QX80, and Nissan Armada, Quest.
- **Requirement:** Your vehicle must have an "INFO" button on the control panel.
- **Note:** This is a Linux-based system, not an Android radio replacement.

⚠️ **IMPORTANT COMPATIBILITY NOTICE**

1. NOT for all Infiniti models !

Example: The QX60 alone has 3 screen types–this fits ONLY 2.

2. MUST CHECK before ordering !

Compare the pictures to your car's screen. No match? DO NOT order. Wrong part wastes your time & money.

3. Still unsure?

Message us FIRST–we'll confirm compatibility.

✓ **"INFO" is Compatible**

✓ **"TEL" is Compatible**

✗ **"DISP" NOT Compatible**

✗ **"APPS" NOT Compatible**

INSTALLATION

Plug-and-Play Installation:

The module features a 100% plug-and-play design with dedicated connectors, eliminating the need for cutting or splicing wires. Detailed installation steps are typically provided in a separate guide or video. For optimal results, professional installation is recommended.

General Installation Overview:

1. Access the vehicle's infotainment system area.
2. Disconnect the necessary factory cables.
3. Connect the provided module cables in line with the factory wiring.
4. Connect the module, LVDS video cable, USB/Camera cable, and antenna.
5. Secure the module in a suitable location within the dashboard.
6. Reassemble the vehicle's dashboard components.

Note: Always disconnect the vehicle's battery before beginning any electrical installation.

OPERATING INSTRUCTIONS

Smart Wireless Integration (CarPlay & Android Auto)

Once installed, the module enables wireless CarPlay and Android Auto. This allows you to mirror your smartphone applications directly to your car's display for navigation, hands-free communication, and music streaming.

Wireless CarPlay

Wireless Android auto

Image: Side-by-side comparison of the Wireless CarPlay and Wireless Android Auto interfaces displayed on a vehicle's infotainment screen.

Dual-System Operation

Your factory infotainment system remains fully accessible. To switch between the factory system and the CarPlay/Android Auto interface, hold the 'Back' button on your vehicle's control panel for approximately 3 seconds.

Native Vehicle Integration

The module maintains complete OEM protocol compatibility. This ensures that all built-in vehicle controls, including the steering wheel buttons, control knob, and touchscreen (if applicable), function perfectly with the new interface.

Works with - Knob, Touchscreen Keep Your Original 360 Camera
Steering Wheel -Use It as Always

Image: Demonstrates the use of the vehicle's original control knob, touchscreen, steering wheel controls, and 360-degree camera system with the installed module.

Audio Integration

- **Original Microphone:** The module utilizes your vehicle's original microphone, eliminating the need for an external mic.
- **Bluetooth Audio:** Audio streams directly through your car's factory Bluetooth system, providing superior sound quality compared to AUX-only solutions.

Use Your Original Mic
-No External Mic Needed

Original Bluetooth Audio
-Better Sound Than AUX

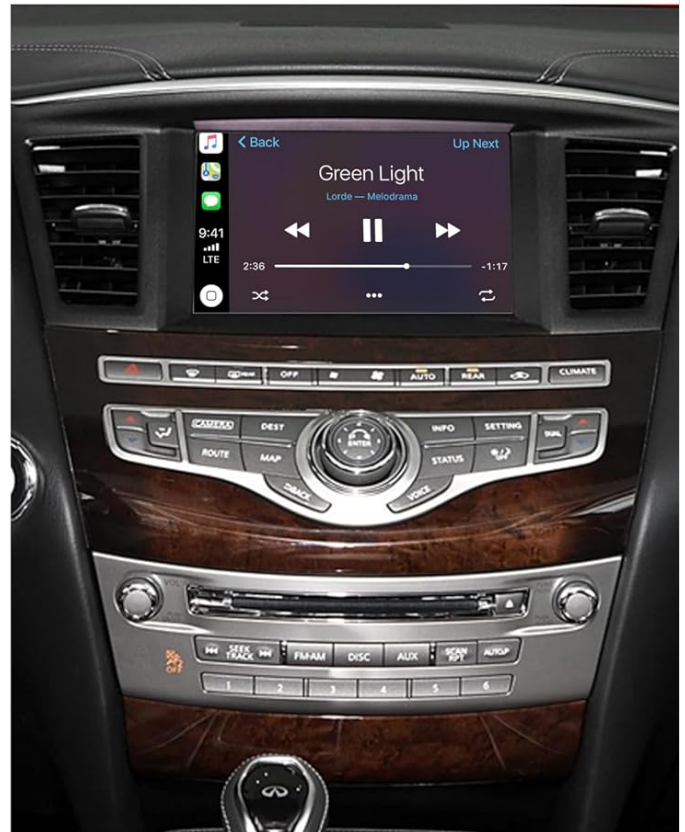

Image: Illustrates the use of the vehicle's original microphone for calls and the integration of original Bluetooth audio for music streaming.

Camera Compatibility

The module is compatible with both factory-installed rear and 360-degree cameras, as well as aftermarket camera systems, offering versatile installation options.

TROUBLESHOOTING

Airbag Warning Light Flashing After Installation

If the airbag warning light flashes after installation, perform the following reset procedure:

Airbag warning light flash after installation?

Core Action: Operate the ignition button without pressing the brake pedal or starting the engine.

Steps:

1. Press ignition button: Turn on electrical system (dashboard lights illuminate, including airbag light) → Immediately turn off.
2. Press again: Turn on → Immediately turn off.
3. Press third time: Turn on → Immediately turn off.
4. Press fourth time: Turn on → Airbag light extinguishes after self-check (reset complete).

 **Key Notes:**

- Complete each step within 1-2 seconds of lights turning on/off.

If light persists:

Contact support for a video demonstration or professional diagnosis

Image: Instructions for resetting the airbag warning light after installation.

Core Action:

Operate the ignition button without pressing the brake pedal or starting the engine.

1. **Step 1:** Press the ignition button. The electrical system will turn on (dashboard lights illuminate, including the airbag light). Immediately turn it off.
2. **Step 2:** Press the ignition button again to turn on the electrical system. Immediately turn it off.
3. **Step 3:** Press the ignition button a third time to turn on the electrical system. Immediately turn it off.
4. **Step 4:** Press the ignition button a fourth time to turn on the electrical system. The airbag light should extinguish after a self-check, indicating the reset is complete.

Key Notes:

- Complete each step within 1-2 seconds of the lights turning on/off.
- If the light persists after following these steps, contact customer support for further assistance or professional diagnosis.
