4. SETUP AND INSTALLATION

4.1 General Installation

Professional installation is recommended. Ensure the vehicle's power is disconnected before beginning installation. Refer to your vehicle's service manual for specific dashboard removal procedures.

4.2 Reversing Camera Installation

The reversing input must be connected even if the reversing camera is not used, to ensure proper functionality of the head unit.

1. Connect the red wire (positive) of the camera to the positive pole of the car's reversing light.
2. Connect the black wire (negative) of the camera to the negative pole of the car's reversing light.
3. The reversing trigger is controlled by the stereo; therefore, the third wire (trigger wire) does not require a separate connection.

Note: The white plug from the camera input cable must be connected to the main device for Bluetooth and Wi-Fi signals to function correctly.

6. MAINTENANCE

To ensure the longevity and optimal performance of your car stereo, follow these maintenance guidelines:

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touch screen. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner. Avoid harsh chemicals or abrasive materials.
- **General Cleaning:** Keep the unit free from dust and debris. Use a soft brush or compressed air to clean vents and button areas.
- **Software Updates:** Periodically check for available software updates to ensure you have the latest features and bug fixes. Refer to the manufacturer's website or the unit's settings for update procedures.
- **Avoid Extreme Temperatures:** Do not expose the unit to extreme heat or cold for extended periods, as this can affect its electronic components.

7. TROUBLESHOOTING

7.1 No Audio Output

If you experience no audio from the car stereo, check the following connections:

1. Ensure the AUX IN R/L on the Voice-Frequency Adapter is correctly connected to the Audio Out R/L on the RCA cable (red to red, white to white).
2. Verify that the small speaker (included in the package) is connected to the power cable.

Image: Solutions for no audio output.

7.2 Steering Wheel Controls Not Responding

If your steering wheel controls are not functioning, ensure they have been properly configured. Refer to section 4.3 "Steering Wheel Control Setup" for detailed instructions. Re-learn the buttons if necessary.

7.3 GPS Signal Issues

Ensure the GPS antenna is properly installed and has a clear line of sight to the sky. Obstructions or poor placement can affect signal reception.

7.4 Wi-Fi/Bluetooth Connectivity Problems

Check that the white plug from the camera input cable is securely connected to the main device, as this connection is crucial for Wi-Fi and Bluetooth signals.
