MAINTENANCE

Cleaning the Monitor

To maintain the display's clarity and longevity, follow these cleaning guidelines:

- Always power off the monitor and unplug it from the power outlet before cleaning.
- Use a soft, lint-free cloth slightly dampened with water or a non-abrasive screen cleaner.
- Gently wipe the screen and exterior surfaces. Avoid spraying liquid directly onto the screen or into openings.
- Do not use benzene, thinner, ammonia-based cleaners, or abrasive cleaning agents.

Storage

If storing the monitor for an extended period, use the original packaging to protect it from dust and physical damage. Store in a cool, dry place.

TROUBLESHOOTING

This section addresses common issues you might encounter with your Dell S2725QS monitor.

Problem	Possible Cause	Solution
No image on screen	No power; Incorrect input source; Loose video cable	Ensure power cable is securely connected and power outlet is active. Select correct input source via OSD menu. Check video cable connections at both monitor and computer.
Image is blurry or distorted	Incorrect resolution; Graphics driver issue	Set display resolution to 3840 x 2160. Update graphics drivers on your computer.
No sound from speakers	Volume too low; Incorrect audio output selected; Cable issue	Increase monitor volume via OSD. Ensure Dell S2725QS is selected as audio output device on your computer. Verify HDMI cable is fully seated.
Screen flickering	Refresh rate mismatch; Cable quality; Interference	Adjust refresh rate to 120Hz in your computer's display settings. Use a high-quality HDMI cable. Move monitor away from other electronic devices.

If the issue persists after trying these solutions, please refer to the Warranty & Support section for further assistance.
