2. SAFETY INFORMATION

Please observe the following safety precautions to prevent injury or damage to the product:

- **Handle with care:** Always handle all components with care to avoid damaging items or causing injury.
- **Assembly:** Assemble the bed frame on a soft, clean surface to prevent scratches. Ensure all bolts and screws are securely tightened before use.
- **Weight Limit:** Do not exceed the recommended weight capacity of the bed frame. Distribute weight evenly.
- **Children:** Keep small parts away from children during assembly. This product is not a toy.
- **Inspection:** Regularly inspect the bed frame for loose connections or damaged parts. Do not use if damaged.

3. PACKAGE CONTENTS

The delivery includes the bed frame components only. Mattresses are not included and must be purchased separately.

Please verify that all parts are present and undamaged before beginning assembly. If any parts are missing or damaged, do not proceed with assembly. Contact customer support immediately.

- Headboard section
- Footboard section
- Side rails (2 pieces)
- Bed slats and support beams
- Center support legs
- Assembly hardware (bolts, washers, nuts, Allen key)

4. SETUP AND ASSEMBLY INSTRUCTIONS

Assembly typically requires two adults. Please follow these steps carefully:

1. **Unpack Components:** Carefully unpack all parts and lay them out on a clean, soft surface (e.g., a carpet or blanket) to prevent scratches. Identify each component using the parts list (if provided in your package).
2. **Attach Side Rails to Headboard:** Connect the two side rails to the headboard section using the provided bolts and an Allen key. Do not fully tighten the bolts yet.
3. **Attach Side Rails to Footboard:** Connect the other ends of the side rails to the footboard section. Again, hand-tighten the bolts initially.
4. **Install Center Support Beam and Legs:** Place the center support beam(s) into the designated slots or brackets along the length of the bed frame. Attach any center support legs to these beams or directly to the frame, ensuring they are securely fastened and adjusted to touch the floor.
5. **Insert Bed Slats:** Lay the bed slats across the side rails, fitting them into the pre-drilled holes or plastic caps. Ensure all slats are evenly spaced and securely seated.
6. **Final Tightening:** Once all components are in place and the frame is aligned, systematically tighten all bolts and screws using the Allen key. Ensure all connections are firm and secure.
7. **Position Bed Frame:** Carefully move the assembled bed frame to its desired location.

5. OPERATING INSTRUCTIONS

Once assembled, the bed frame is ready for use. Follow these guidelines for optimal performance:

- **Mattress Placement:** Carefully place your Super King size mattress (180x200 cm) onto the bed slats. Ensure it is centered and fully supported by the frame.
- **Even Weight Distribution:** Avoid concentrating heavy loads on a single point of the bed frame. Distribute weight as evenly as possible.
- **Movement:** When moving the bed frame, lift it rather than dragging it to prevent damage to the frame or your flooring.

6. MAINTENANCE

Regular maintenance will help prolong the life and appearance of your bed frame:

- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the powder-coated finish.
- **Inspection:** Periodically check all bolts and connections to ensure they remain tight. Re-tighten if

necessary.

- **Rust Prevention:** Keep the bed frame in a dry environment to prevent rust. If minor scratches occur, touch up with appropriate paint to prevent rust.

7. TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common solutions:

- **Squeaking Noises:** Squeaking often indicates loose connections. Re-tighten all bolts and screws, especially those connecting the side rails to the headboard and footboard, and the center support legs.
- **Instability/Wobbling:** Ensure all legs are firmly on the ground and adjusted correctly. Verify that all assembly hardware is fully tightened. Check for any bent or damaged components.
- **Slats Falling Out:** Ensure the mattress is properly centered and not putting uneven pressure on the slats. Verify that all slats are correctly seated in their designated slots or caps.
