ZEEGMA HEPA Filter for Zonder Wash and Zonder Pro Aqua Vacuum Cleaners: Instruction Manual

Model: ZE-ZONDER WASH & PRO AQUA HEPA FILTER

1. PRODUCT OVERVIEW

The ZEEGMA HEPA Filter is an essential component designed to enhance the air quality in your home by effectively capturing allergens and fine impurities. This reusable and washable filter is engineered for high efficiency and durability, making it an ideal solution for individuals with allergies and anyone prioritizing clean indoor air.

- **High Efficiency Filtration:** Captures microscopic particles such as dust, pollen, and bacteria, contributing to a hygienic home environment.
- **Reusable and Washable:** Designed for repeated use, simply clean under running water to restore efficiency, reducing the need for frequent replacements.
- **Robust Construction:** Manufactured from durable, damage-resistant materials to ensure a long operational lifespan.
- **Easy Installation:** Features a stable fixing cap for quick and secure mounting within your vacuum cleaner.

2. COMPATIBILITY

This ZEEGMA HEPA Filter is specifically designed for use with the following vacuum cleaner models:

- ZEEGMA Zonder Wash
- ZEEGMA Zonder Pro Aqua

Ensure your vacuum cleaner model matches one of the listed compatible models for proper fit and optimal performance.

3. SETUP AND INSTALLATION

Follow these steps to correctly install the ZEEGMA HEPA Filter into your compatible vacuum cleaner:

1. **Preparation:** Before installation, ensure your vacuum cleaner is turned off and unplugged from the power outlet to prevent accidental activation.
2. **Locate Filter Compartment:** Refer to your vacuum cleaner's user manual to locate the HEPA filter compartment. This is typically found near the dustbin or motor housing.
3. **Remove Old Filter (if applicable):** If replacing an existing filter, carefully remove the old filter. Dispose of it according to local regulations.
4. **Insert New Filter:** Position the new ZEEGMA HEPA Filter into the compartment. The filter is equipped with a stable fixing cap and a securing nut. Ensure the nut aligns correctly with the housing for a secure fit.
5. **Secure the Filter:** Gently push and twist the filter until the fixing cap and nut are firmly seated, ensuring the filter is stable and properly sealed. This prevents air leakage and ensures efficient filtration.
6. **Close Compartment:** Close the filter compartment cover securely.

4. OPERATING TIPS FOR OPTIMAL PERFORMANCE

To ensure your ZEEGMA HEPA Filter provides the best possible air filtration and extends the lifespan of your vacuum cleaner, consider the following:

- **Regular Cleaning:** Clean the filter regularly as described in the Maintenance section to prevent clogging and maintain suction power.
- **Timely Replacement:** While reusable, the filter's efficiency may decrease over time. Replace the filter if you

notice a significant drop in vacuum performance or if the filter appears damaged or excessively worn.

- **Proper Sealing:** Always ensure the filter is securely installed and the compartment is properly closed to prevent unfiltered air from bypassing the filter.

5. MAINTENANCE AND CLEANING

The ZEEGMA HEPA Filter is designed to be reusable and washable, offering an economical and environmentally friendly solution. Follow these steps for proper cleaning:

1. **Remove Filter:** Turn off and unplug your vacuum cleaner. Carefully remove the HEPA filter from its compartment as described in the Setup section.
2. **Rinse Under Running Water:** Hold the filter under cool, running tap water. Gently rinse the pleated surface until the water runs clear. Avoid using hot water or harsh detergents, as these can damage the filter material.
3. **Shake Off Excess Water:** After rinsing, gently shake the filter to remove any excess water.
4. **Air Dry Completely:** Place the filter in a well-ventilated area to air dry completely. This may take 24 to 48 hours. **It is crucial that the filter is completely dry before reinstallation to prevent mold growth and damage to your vacuum cleaner.** Do not use a dryer or other heating devices to speed up the drying process.
5. **Reinstall Filter:** Once completely dry, reinstall the filter into your vacuum cleaner following the installation steps.

***Note:** Regular cleaning helps maintain the filter's efficiency and prolongs its lifespan. The frequency of cleaning depends on usage and the level of dust/debris in your environment.*

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your ZEEGMA HEPA Filter. If you experience problems not listed here, please refer to your vacuum cleaner's main instruction manual or contact customer support.

- **Reduced Suction Power:**
 - **Cause:** Filter is clogged with dust and debris.
 - **Solution:** Clean the HEPA filter thoroughly as per the Maintenance section. Ensure it is completely dry before reinstallation.
- **Unpleasant Odor from Vacuum:**
 - **Cause:** Filter was reinstalled while still damp, leading to mold or mildew growth.
 - **Solution:** Remove and thoroughly clean the filter. Ensure it is completely air-dried before reinstallation. If the odor persists, the filter may need to be replaced.
- **Filter Does Not Fit Securely:**
 - **Cause:** Incorrect filter model or improper installation.
 - **Solution:** Verify that you have the correct ZEEGMA HEPA Filter for Zonder Wash or Zonder Pro Aqua models. Re-attempt installation, ensuring the fixing cap and nut are correctly aligned and secured.

7. SPECIFICATIONS

Brand	Zeegma
Model Number	ZE-ZONDER WASH & PRO AQUA HEPA FILTER
Item Weight	200 grams
Material	Plastic, Non-woven HEPA Fabric
Product Dimensions	12L x 7W x 10H centimeters
Components Included	ZEEGMA HEPA Filter, Fixing Cap
