BUSP-HYY B-3576

BUSP-HYY B-3576 Computer Speaker Instruction Manual

Model: B-3576

INTRODUCTION

Thank you for choosing the BUSP-HYY B-3576 Computer Speaker. This speaker is designed to provide clear stereo sound with dynamic LED lighting, offering both wired USB and wireless Bluetooth connectivity. This manual provides essential information for setting up, operating, and maintaining your speaker to ensure optimal performance. The speaker features upgraded 2x3W technology for a wide dynamic range, improved bass, and lower distortion. It includes 4 LED modes and is compatible with various devices and operating systems.

PACKAGE CONTENTS

Please verify that all items are present in your package:

- 1 x BUSP-HYY B-3576 Computer Speaker
- 1 x USB-C Adapter
- 1 x User Manual (this document)

SETUP INSTRUCTIONS

1. Wired USB Connection (PC Mode)

This method provides both power and audio through a single USB cable, offering a plug-and-play experience without requiring additional drivers.

1. Connect the USB cable from the speaker to an available USB port on your computer (laptop, desktop PC, etc.). The speaker will automatically power on.
2. If connecting to a device with a USB-C port (e.g., MacBook Pro/Air), use the provided USB-C adapter.
3. Press the "M" button on the speaker to switch to PC (USB) mode.
4. Ensure your computer's sound settings are configured to output audio through the connected USB speaker.
5. Adjust the volume on both your computer and the speaker to your desired level.

Image: USB with Type C Adapter. The speaker connected to a laptop using the included USB-C adapter, demonstrating compatibility with various devices.

2. Bluetooth Connection

The speaker features built-in V5.3 Bluetooth technology for wireless audio streaming from compatible devices. Note: The speaker still requires USB power in Bluetooth mode.

1. Plug the USB connector into a power source (e.g., a USB wall adapter, power bank, or computer USB port). The

speaker will power on.

2. Press the "M" button on the speaker to change to Bluetooth mode. You will hear an audible prompt or see an indicator light change.
3. On your smartphone, tablet, or other Bluetooth-enabled device, open the Bluetooth settings.
4. Search for available devices and select "E-3576" to pair.
5. Once connected, adjust the volume on both your device and the speaker.

Dynamic Light Effects

The speaker features integrated LED lights with multiple modes to enhance your listening experience. There are 4 primary LED modes:

- Rainbow Color Flowing
- Changing Color Pulsing
- Single Color Changing
- Solid Color
- Lights Off

To cycle through these light effects or turn the lights on/off, perform **long press** on the "M" button.

MAINTENANCE

To ensure the longevity and optimal performance of your BUSP-HYY B-3576 speaker, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the speaker's surface. Do not use liquid cleaners, aerosols, or solvents, as these may damage the finish or internal components.
- **Storage:** When not in use for extended periods, store the speaker in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping the speaker or subjecting it to strong impacts.
- **Environment:** Keep the speaker away from water, excessive dust, and high humidity.

TROUBLESHOOTING

If you encounter issues with your speaker, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No sound or low volume	◦ Speaker not powered on. ◦ Volume too low on speaker or connected device. ◦ Incorrect audio output selected on computer. ◦ Incorrect mode selected (USB/Bluetooth).	◦ Ensure USB cable is securely connected to a power source. ◦ Increase volume on both the speaker and your computer/device. ◦ Check your computer's sound settings and select the BUSP-HYY speaker as the output device. ◦ Press the "M" button to switch to the correct mode (USB or Bluetooth).

Problem	Possible Cause	Solution
Bluetooth pairing failure	◦ Speaker not in Bluetooth pairing mode. ◦ Device Bluetooth is off. ◦ Speaker too far from device.	◦ Press the "M" button to ensure the speaker is in Bluetooth mode. ◦ Enable Bluetooth on your device. ◦ Move the speaker closer to your device (within 10 meters). ◦ Forget "E-3576" from your device's Bluetooth list and try pairing again.
LED lights not working or stuck	◦ Lights are turned off. ◦ Temporary software glitch.	◦ Long press the "M" button to cycle through light modes or turn them on. ◦ Disconnect and reconnect the USB power cable to reset the speaker.
Light settings reset after power cycle	◦ Speaker does not retain light settings when power is removed.	◦ This is expected behavior. Re-select your preferred light mode after each power cycle by long pressing the "M" button.
