3. SETUP

3.1 Setting Time and Date

1. **Pull out the crown:** Gently pull the crown (the knob on the side of the watch) to the first or second click position, depending on whether you are setting the date or time.
2. **Adjust the date:** If applicable, rotate the crown in one direction (usually clockwise) to set the date.
3. **Adjust the time:** Rotate the crown in the opposite direction to set the time. Ensure the 24-hour sub-dial aligns correctly for AM/PM if present.
4. **Push in the crown:** Once set, push the crown back into its normal position to start the watch.

3.2 Adjusting the Watch Band

The metal band can be adjusted for a comfortable fit using the provided tool. It is recommended to remove an equal number of links from both sides of the clasp to maintain balance.

4. OPERATING INSTRUCTIONS

4.1 Chronograph Function

The watch features a chronograph (stopwatch) function with dedicated sub-dials for minutes and seconds. The pushers on the side of the watch control these functions:

- **Start/Stop:** Press the top pusher to start and stop the chronograph.
- **Reset:** Press the bottom pusher to reset the chronograph to zero after it has been stopped.

4.2 Luminous Feature

The luminous elements on the watch hands and markers absorb light and glow in the dark. For optimal glow, expose the watch to a bright light source for a few minutes before entering a dark environment.

5. MAINTENANCE

5.1 Cleaning

To maintain the appearance of your watch, wipe it regularly with a soft, dry cloth. For the metal band, a slightly damp cloth can be used, followed by immediate drying. Avoid using harsh chemicals or abrasive materials.

5.2 Water Resistance

Your watch has a 3 ATM water resistance rating. This means it is protected against splashes, rain, and hand washing. However, it is not designed for prolonged water immersion, swimming, showering, or diving. Avoid exposing the watch to hot water or steam, as this can compromise the water-resistant seals.

5.3 Battery

The watch is powered by a quartz battery. When the watch stops or the second hand moves erratically, it indicates that the battery needs replacement. Battery replacement should be performed by a qualified watch technician to ensure proper sealing and function.

6. TROUBLESHOOTING

Common Issues and Solutions:

- **Watch not running:** Check if the crown is fully pushed in. If it is, the battery may need replacement.
- **Date not changing:** Ensure the time is set correctly, especially the AM/PM cycle, as the date typically changes around midnight.
- **Chronograph not resetting to zero:** This may indicate a need for adjustment or service.

If you encounter any problems that cannot be resolved with the above steps, please refer to the warranty and support section for assistance.
