

Bartec WRTTRP100

Bartec TechRitePro TPMS Diagnostic Tool Kit WRTTRP100 User Manual

Model: WRTTRP100 | Brand: Bartec

1. INTRODUCTION

The Bartec TechRitePro Tool Kit is a professional-grade diagnostic and programming tool for Tire Pressure Monitoring Systems (TPMS). This manual provides essential information for the proper setup, operation, and maintenance of your TechRitePro device and included RiteSensors. It is designed to assist technicians in diagnosing, programming, and relearning TPMS sensors efficiently.

Key features include a 2.8-inch high-resolution color display, a graphical user interface, a rechargeable LiPo battery, and multi-language support. The tool supports improved LF signal and UHF detection for reliable performance.

2. WHAT'S IN THE BOX

Verify that all components are present upon unpacking:

- Bartec TechRitePro TPMS Diagnostic Tool (Model WRTTRP100)
- Heavy-Duty OBDII Cable/Connector
- 4 RiteSensors (Programmable Replacement TPMS Sensors)

Figure 2.1: Contents of the Bartec TechRitePro Tool Kit. This image displays the TechRitePro diagnostic tool, the OBDII cable, and four RiteSensors, along with their individual packaging.

3. SETUP

3.1 Initial Charging

Before first use, fully charge the TechRitePro device's internal 2.3Ah LiPo battery using the provided charging cable and a compatible power source. A full charge ensures uninterrupted performance during diagnostic and programming tasks. The device features a removable battery for convenience.

3.2 Software Installation (TPMS Desktop)

The TechRitePro tool requires the "TPMS Desktop" software to be downloaded and installed on a PC or laptop for updates, data management, and extended functionalities.

1. Visit the official Bartec website to locate the TPMS Desktop software download page.
2. Download the installer file to your computer.
3. Follow the on-screen instructions to complete the installation.
4. Connect your TechRitePro device to the computer via the provided USB cable (if applicable, or follow software instructions for connection).

REQUIRES TPMS **DESKTOP**

This tool requires TPMS Desktop to be downloaded and installed on a PC or Laptop.

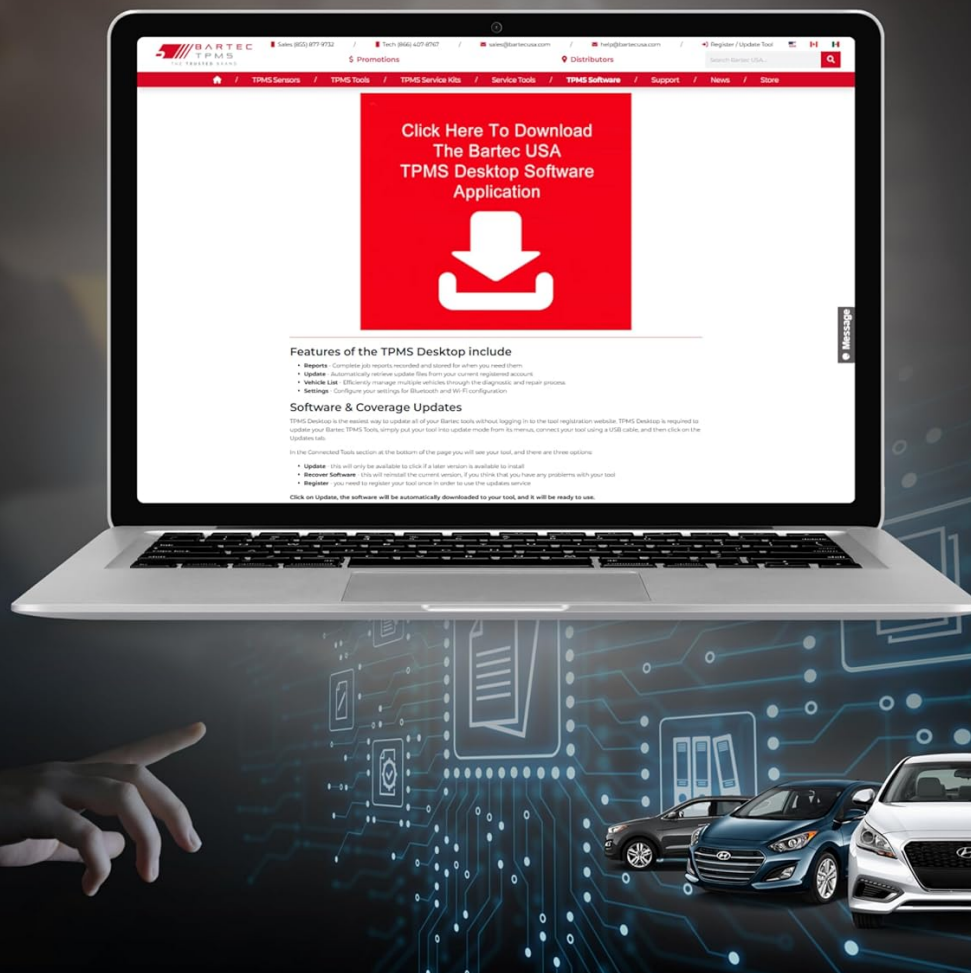

Figure 3.2: TPMS Desktop software is required for full functionality and updates.

3.3 Initial Device Configuration

Upon first power-on, the device may prompt you to set up basic configurations such as language. The TechRitePro supports multiple languages, including English, French, and Spanish. Navigate through the on-screen menus using the directional buttons and the ENTER button to select your preferences.

4. OPERATING INSTRUCTIONS

4.1 Device Navigation

The TechRitePro features a 2.8-inch high-resolution color display and a graphical user interface. Use the directional buttons (Up, Down, Left, Right) to navigate through menus and options. The **ENTER** button confirms selections, and the **BACK** button (often labeled with an arrow or 'ESC') returns to the previous screen.

2.3AH LIPO BATTERY

Figure 4.1: The TechRitePro's 2.8-inch color display and user interface.

4.2 TPMS Sensor Activation and Health Check

To activate a TPMS sensor or perform a quick health check:

1. Power on the TechRitePro tool.
2. Select the "New Sensor" or "TPMS Health Check" option from the main menu.
3. Follow the on-screen prompts to position the tool near each tire's sensor.
4. The tool will activate the sensor and display its ID, pressure, temperature, and battery status.
5. Confirm the sensor is functioning correctly.

QUICK TPMS HEALTH CHECK **CHECK**

Figure 4.2: Performing a quick TPMS health check to ensure proper tire pressure monitoring.

4.3 TPMS Sensor Programming

The TechRitePro tool allows for programming of the included RiteSensors or other compatible universal sensors.

1. From the main menu, select the "Programming" or "New Sensor" option.
2. Choose the desired programming method (e.g., Copy by Activation, Manual Input, Auto Create).
3. Follow the on-screen instructions to program the new sensor. This may involve activating an existing sensor to copy its ID or manually entering sensor IDs.
4. Ensure the programming is successful before installation.

4.4 TPMS Sensor Relearn Procedure

After replacing or programming TPMS sensors, a relearn procedure is often required for the vehicle's ECU to recognize the new sensor IDs.

1. Connect the TechRitePro tool to the vehicle's OBDII port using the heavy-duty OBDII cable.
2. Select the "Relearn" function from the tool's menu.
3. Choose the vehicle make, model, and year.

4. Follow the specific relearn procedure displayed on the tool, which may involve driving the vehicle, performing specific actions, or using the tool to force a relearn via OBDII.
5. Confirm that the vehicle's TPMS warning light has turned off.

Figure 4.3: Using the TechRitePro tool for TPMS tracking and detection.

5. MAINTENANCE

5.1 Cleaning the Device

Wipe the device with a soft, damp cloth. Do not use abrasive cleaners or solvents. Ensure the device is powered off and disconnected from any power source before cleaning.

5.2 Battery Care

To prolong battery life, avoid fully discharging the battery frequently. Store the device in a cool, dry place when not in use. The removable battery allows for replacement if its capacity diminishes over time.

5.3 Software Updates

Regularly check for software updates via the TPMS Desktop application. Updates often include new vehicle coverage, sensor programming capabilities, and performance enhancements.

6. TROUBLESHOOTING

If you encounter issues with your TechRitePro tool, consider the following:

- **Device Not Powering On:** Ensure the battery is charged. Connect the device to a power source and attempt to power it on.
- **Sensor Not Activating:** Verify the tool is positioned correctly near the sensor. Check the sensor's battery status (if possible). Ensure the sensor is compatible with the tool.
- **OBDII Communication Failure:** Check the OBDII cable connection to both the tool and the vehicle. Ensure the vehicle's ignition is on (or in the correct position for diagnostics).
- **Software Update Issues:** Ensure your PC has a stable internet connection. Temporarily disable any antivirus or firewall software that might interfere with the TPMS Desktop application.
- **Inaccurate Readings:** Ensure the sensors are correctly installed and programmed. Perform a relearn procedure if necessary.

For further assistance, refer to the Bartec support website or contact their customer service.

8. WARRANTY AND SUPPORT

For information regarding product warranty, please refer to the documentation included with your purchase or visit the official Bartec website.

For technical support, software updates, or service inquiries, please contact Bartec customer service or visit their online support portal.

9. SAFETY INFORMATION

- Always read and understand all instructions before operating the device.
- Use the device only for its intended purpose.
- Do not expose the device to extreme temperatures, moisture, or direct sunlight.
- Keep the device away from children.
- Do not attempt to disassemble or repair the device yourself. Refer to qualified service personnel.
- Ensure proper ventilation when charging the device.
- Always follow vehicle manufacturer's guidelines when performing TPMS service.
