

## Afidano B8

# Afidano Electric Cigar Humidor User Manual

Model: B8

## 1. INTRODUCTION

Thank you for choosing the Afidano Electric Cigar Humidor. This advanced cigar cabinet is designed to provide an optimal environment for storing and aging your cigars, ensuring they maintain their perfect flavor and aroma. Featuring precise temperature and humidity control, Spanish cedar wood shelving, and a large capacity, this humidor combines modern technology with elegant design.

Please read this manual thoroughly before operating your new humidor to ensure proper setup, operation, and maintenance, and to maximize its lifespan and performance.

## 2. SAFETY INFORMATION

To ensure safe operation and prevent damage to the unit or injury to yourself, please adhere to the following safety guidelines:

- **Electrical Safety:** Ensure the humidor is connected to a grounded power outlet with the correct voltage as specified on the product label. Do not use extension cords or adapters.
- **Placement:** Place the humidor on a stable, level surface away from direct sunlight, heat sources (e.g., stoves, radiators), and excessive moisture. Allow adequate ventilation space around the unit.
- **Water Usage:** When refilling the humidity system, use only distilled water to prevent mineral buildup and ensure proper operation.
- **Cleaning:** Disconnect the power before cleaning. Use a soft, damp cloth for exterior surfaces and a dry cloth for the interior. Avoid abrasive cleaners or solvents.
- **Children and Pets:** Keep the humidor out of reach of children and pets to prevent accidents or damage.
- **Ventilation:** Do not block the ventilation openings of the appliance.
- **Servicing:** Do not attempt to repair or modify the humidor yourself. Refer all servicing to qualified personnel.

## 3. PRODUCT OVERVIEW

The Afidano Electric Cigar Humidor is designed for optimal cigar preservation, offering a capacity of up to 2200 cigars. Key features include:

- **Capacity:** Stores up to 2200 cigars across 8 Spanish cedar wood shelves.
- **Temperature Control:** Maintains a precise temperature range of 62-74°F (16.7-23.3°C).
- **Humidity Control:** Features an HPR system to ensure a stable humidity range of 60-75%.

- **UV Protected Glass Door:** Provides a clear view of your collection while protecting cigars from harmful light.
- **Digital Display & Controls:** Easy-to-use interface for setting and monitoring conditions.
- **Fingerprint Lock:** Enhances security for your valuable collection.
- **App Control Function:** Convenient remote management of settings.
- **LED Interior Lighting:** Illuminates your cigars for easy viewing.
- **Quiet Operation:** Running volume is approximately 42dB.

Figure 3.3: Detailed view of cigars neatly arranged within one of the perforated Spanish cedar wood drawers, designed for optimal air circulation.

## 4. SETUP

---

1. **Unpacking:** Carefully remove the humidor from its packaging. Inspect for any shipping damage. Retain packaging for future transport if needed.
2. **Placement:** Choose a suitable location. The humidor is designed for floor mounting. Ensure the surface is level and sturdy enough to support the unit's weight (approximately 236 pounds). Allow at least 4 inches (10 cm) of space behind and on the sides for proper ventilation. Avoid placing it near direct sunlight or heat sources.
3. **Leveling:** Use the adjustable legs at the bottom of the unit to ensure it is perfectly level. This is crucial for proper door sealing and efficient operation.
4. **Initial Cleaning:** Before first use, wipe the interior and exterior with a clean, damp cloth. Do not use harsh chemicals.
5. **Seasoning the Humidor:**
  - Fill the water reservoir (if applicable) with distilled water.
  - Place a small dish of distilled water inside the humidor for 24-48 hours to allow the Spanish cedar wood to absorb moisture.
  - Once the humidity stabilizes within the desired range (60-75%), the humidor is ready for cigar storage.
6. **Power Connection:** Plug the humidor into a dedicated, grounded electrical outlet.

## 5. OPERATING INSTRUCTIONS

---

1. **Power On/Off:** Press the power button on the control panel to turn the unit on or off.
2. **Setting Temperature:** Use the temperature control buttons (usually up/down arrows) on the digital display to set your desired temperature between 62-74°F (16.7-23.3°C). The unit will automatically adjust to maintain this setting.
3. **Setting Humidity:** The HPR system automatically manages humidity. If there are manual controls, use them to set the desired humidity between 60-75%. Ensure the water reservoir is adequately filled with distilled water for the humidity system to function correctly.
4. **Fingerprint Lock:**
  - Refer to the dedicated section in the full manual for initial setup and programming of fingerprint access.
  - To unlock, place your registered finger on the sensor.
5. **App Control Function:**
  - Download the official Afidano app from your device's app store.
  - Follow the in-app instructions to pair your humidor with your smartphone or tablet.
  - Once paired, you can monitor and adjust temperature, humidity, and other settings remotely.
6. **LED Lighting:** The interior LED light can typically be toggled on or off via a button on the control panel or through the app.
7. **Loading Cigars:** Arrange cigars on the Spanish cedar shelves and in the drawers. Ensure proper air circulation by not overfilling.

## 6. MAINTENANCE

---

Regular maintenance ensures the longevity and optimal performance of your humidor.

- **Cleaning the Interior:**
  - Periodically remove cigars and shelves.
  - Wipe the interior surfaces with a clean, dry, lint-free cloth. For stubborn spots, a slightly damp cloth with distilled water can be used, but ensure the interior is completely dry before replacing cigars.
  - Do not use soap or chemical cleaners inside the humidor, as their odors can be absorbed by cigars.
- **Cleaning the Exterior:** Wipe the exterior surfaces, including the glass door, with a soft, damp cloth. For glass, a non-abrasive glass cleaner can be used, applied to the cloth first, not directly to the humidor.
- **Water Reservoir Refill:** Regularly check the water reservoir for the humidity system. Refill with distilled water as needed. The frequency will depend on ambient conditions and how often the door is opened.
- **Spanish Cedar Shelves:** The cedar wood naturally absorbs and releases moisture. Do not wash the shelves. If they become stained, gently wipe with a dry cloth.
- **Door Seal:** Inspect the door gasket regularly for any signs of wear or damage. A good seal is critical for maintaining stable internal conditions. Clean the gasket with a damp cloth if necessary.

## 7. TROUBLESHOOTING

---

If you encounter issues with your humidor, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Humidor not cooling/heating or maintaining humidity.	Not plugged in or power outage. Temperature/humidity settings incorrect. Door not sealed properly. Water reservoir empty. Poor ventilation around the unit.	Check power connection and outlet. Verify settings on the control panel or app. Ensure door is fully closed and gasket is clean/undamaged. Refill water reservoir with distilled water. Ensure adequate space around the humidor for airflow.
Excessive noise.	Unit not level. Objects touching the back or sides. Normal compressor/fan operation.	Adjust leveling legs. Move humidor away from walls or furniture. A running volume of around 42dB is normal.
Digital display not working.	Power issue. Control panel malfunction.	Check power supply. Contact customer support if power is confirmed.

If the problem persists after attempting these solutions, please contact Afidano customer support for assistance.

## 8. SPECIFICATIONS

Feature	Detail
Brand	Afidano
Model Number	B8
Color	2200 Ct (Capacity designation)
Product Dimensions (D x W x H)	27.9"D x 23.4"W x 71.2"H (70.9cm D x 59.4cm W x 180.8cm H)
