6. MAINTENANCE

To ensure the longevity and continued performance of your LUMUNANCE Metal Bed Frame, follow these simple maintenance guidelines:

- **Cleaning:** Wipe down the metal frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as they may damage the finish.
- **Regular Checks:** Periodically (e.g., every 3-6 months) inspect all bolts and connections to ensure they remain tight. Re-tighten if necessary to prevent squeaking and maintain stability.
- **Avoid Overloading:** Do not exceed the recommended weight capacity of the bed frame.

7. TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose bolts or uneven surface.	Ensure all bolts are fully tightened. Move the bed frame to a flat, level surface.
Squeaking noises.	Loose connections or friction between metal parts.	Re-tighten all bolts. Apply a small amount of lubricant (e.g., silicone spray) to connection points if squeaking persists.
Mattress sags or feels unsupported.	Improper slat placement or damaged slats.	Ensure all slats are correctly seated and evenly distributed. Check for any bent or damaged slats.
Difficulty assembling.	Incorrect part orientation or missing hardware.	Review the assembly instructions carefully. Ensure parts are oriented correctly. Verify all hardware is present. Contact customer support if parts are missing.
