SHAUOTR Compatible with Coway AP-1018F, AP-1016N, AP-1016P, AP-1013A, AP-1013F, APMS-1014D

SHAUOTR H13 HEPA and Activated Carbon Filter Instruction Manual

For Coway Air Purifier Models: AP-1018F, AP-1016N, AP-1016P, AP-1013A, AP-1013F, APMS-1014D

1. Introduction

This manual provides instructions for the SHAUOTR H13 HEPA and Activated Carbon Composite Filter. This filter is designed as a replacement for various Coway air purifier models, including AP-1018F, AP-1016N, AP-1016P, AP-1013A, AP-1013F, and APMS-1014D. It combines an H13 True HEPA layer with an activated carbon layer to effectively capture airborne particles and odors, contributing to cleaner indoor air quality.

2. Product Overview

The SHAUOTR composite filter is engineered for optimal air purification. Key features include:

- **Dual-Layer Filtration:** Combines an H13 True HEPA layer to capture 99.97% of airborne particles as small as 0.3 microns, and an activated carbon layer to absorb odors, smoke, and volatile organic compounds (VOCs).
- **Enhanced Durability:** Constructed with durable materials to ensure a longer lifespan and consistent performance.
- **Easy Installation:** Designed for user-friendly, tool-free installation and replacement.
- **Optimized Airflow:** Engineered to minimize airflow resistance, ensuring quiet operation and efficient air purification.
- **Maintains Air Purifier Efficiency:** Regular replacement ensures your air purifier continues to operate effectively, maintaining fresh indoor air quality.

3. Setup and Installation

Follow these general steps to replace the filter in your compatible Coway air purifier. Always refer to your specific air purifier's user manual for detailed instructions.

1. **Power Off:** Unplug the air purifier from the power outlet.
2. **Access Filter Compartment:** Open the front cover or filter access panel of your air purifier. Consult your air purifier's manual for exact location.

3. **Remove Old Filter:** Carefully remove the used filter. Dispose of it according to local regulations.
4. **Unpack New Filter:** Remove the new SHAUOTR filter from its protective packaging.
5. **Insert New Filter:** Insert the new composite filter into the air purifier. Ensure the filter is oriented correctly, typically with the activated carbon side facing outwards (towards the air intake) and the HEPA side facing inwards (towards the fan). Refer to your air purifier's markings or manual.
6. **Close Compartment:** Close the filter access panel or front cover securely.
7. **Restore Power:** Plug the air purifier back into the power outlet.
8. **Reset Filter Indicator:** If your air purifier has a filter replacement indicator, follow its instructions to reset it.

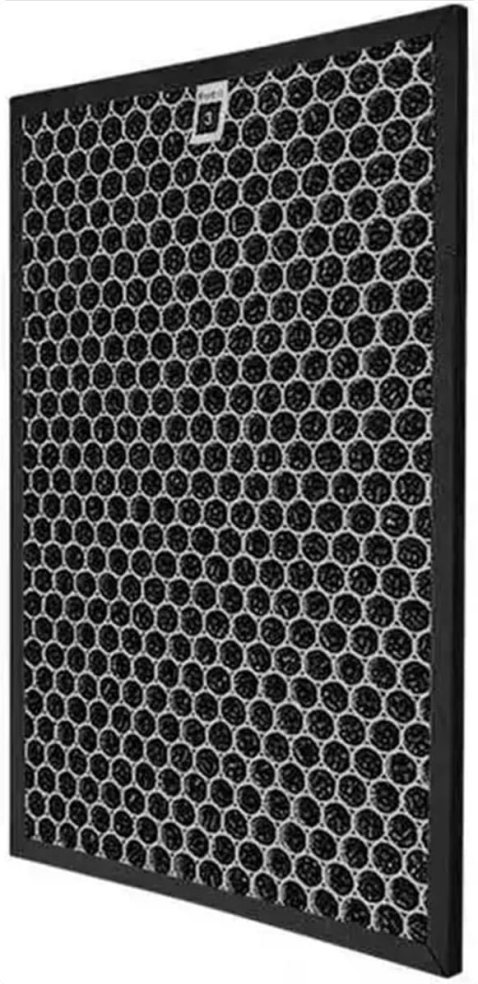

Figure 3.1: Activated Carbon Layer. This side typically faces the air intake.

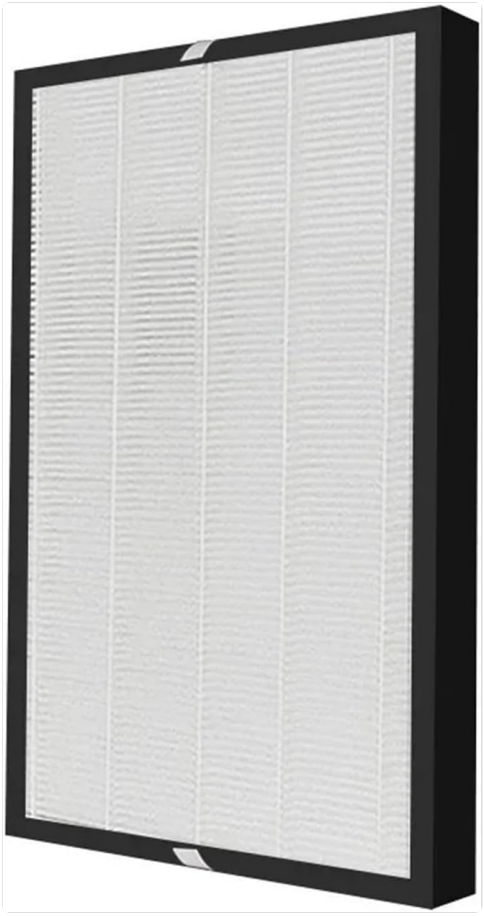

Figure 3.2: HEPA Filter Layer. This side typically faces the air purifier's fan.

4. Operating Instructions

Once installed, the filter operates passively as part of your air purifier system. Ensure your air purifier is running according to its own operating instructions to maximize the filter's effectiveness.

For optimal performance, operate your air purifier in an appropriate setting for your room size and air quality needs. The filter continuously works to remove particles and odors from the air passing through it.

5. Maintenance

The SHAUOTR composite filter is designed for long-lasting performance, but regular replacement is crucial for maintaining optimal air quality.

- **Replacement Frequency:** It is recommended to replace the filter every 6 to 12 months, depending on usage, air quality, and environmental factors. Air purifiers used in homes with pets, smokers, or high pollution levels may require more frequent replacement.
- **Filter Indicator:** Many Coway air purifiers have a filter replacement indicator light. Replace the filter when this indicator illuminates.
- **Cleaning:** The HEPA and activated carbon layers are not washable. Do not attempt to clean the filter with water or vacuum, as this can damage the filter media and significantly reduce its effectiveness.
- **Disposal:** Dispose of used filters responsibly according to local waste disposal guidelines.

6. Troubleshooting

If you experience issues after installing the new filter, consider the following:

- **Reduced Airflow:** Ensure the filter is installed correctly and the air purifier's intake and output vents are not obstructed. Check if the filter is fully seated in its compartment.
- **Persistent Odors:** If odors persist shortly after replacement, verify the filter is new and properly sealed. Ensure the activated carbon side is correctly oriented. If the issue continues, consider the source of the odor in the environment.
- **Filter Indicator Light Remains On:** After replacing the filter, you may need to manually reset the filter indicator on your air purifier. Refer to your air purifier's manual for specific instructions on resetting the filter life monitor.
- **Unusual Noise:** Ensure the filter is securely installed and not vibrating within its compartment. Check for any foreign objects inside the air purifier.

7. Specifications

The following specifications apply to the SHAUOTR H13 HEPA and Activated Carbon Composite Filter:

Feature	Detail
Brand	SHAUOTR
Filter Type	H13 True HEPA and Activated Carbon Composite Filter
Compatible Devices	Coway Air Purifiers (AP-1018F, AP-1016N, AP-1016P, AP-1013A, AP-1013F, APMS-1014D)
Item Weight	50 Grams
Number of Items	1 (per package)
Product Grade	New
Unit Count	1.0 Count

8. Warranty and Support

For product support or inquiries regarding the SHAUOTR H13 HEPA and Activated Carbon Filter, please contact your retailer or the manufacturer directly.

This filter is a replacement part, and its warranty coverage may be subject to the terms provided by the seller or manufacturer at the time of purchase. Please retain your proof of purchase for any warranty claims.

Ask a question about this manual

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page's manual context to help answer it.
