**NPET PETDF20-FS-4PCS-US**

# NPET WF150 Pet Water Fountain Replacement Filter Instruction Manual

Model: PETDF20-FS-4PCS-US

## INTRODUCTION

---

This manual provides instructions for the installation, operation, and maintenance of NPET Replacement Filters for the WF150 Pet Water Fountain. Proper use and care of these filters ensure your pet receives clean, fresh water.

## SETUP AND INSTALLATION

---

1. **Unpack Components:** Carefully remove the replacement filters and pump sponges from their packaging.
2. **Rinse Filter:** Before first use, rinse the new filter thoroughly under running water for several minutes. This helps remove any loose carbon dust and prepares the filter for optimal performance.

Rinse Before Use Replace Every 2-4 Weeks

3. **Remove Old Components:** Disassemble your NPET WF150 Pet Water Fountain and remove the used filter and pump sponge.
4. **Install New Sponge:** Place the new pump sponge into its designated slot within the fountain's pump assembly.
5. **Install New Filter:** Insert the rinsed filter into the filter tray of the WF150 pet water fountain. Ensure it is seated correctly and securely.

6. **Reassemble and Fill:** Reassemble the fountain according to its original instructions and fill it with fresh, clean water.

## OPERATING PRINCIPLES

The NPET replacement filter utilizes an advanced 5-stage filtration system to purify your pet's drinking water, ensuring it is fresh and odorless. Each stage plays a crucial role:

- **High-density Sponge:** Filters out larger debris such as hair and food particles.
- **Activated Carbon:** Effectively removes odors and chlorine, improving water taste.
- **Ion Exchange Resin:** Softens hard tap water by reducing calcium and magnesium ions.
- **Medical Stone:** Aids in removing heavy metals from the water.
- **Non-woven Fabric:** Prevents mucus production and ensures cleaner water flow.

## MAINTENANCE

Regular maintenance of the filter and sponge is essential for maintaining water quality and the longevity of your pet fountain.

- **Sponge Cleaning:** The pump sponge should be cleaned weekly to remove accumulated hair and debris. Rinse it thoroughly under running water.
- **Filter Replacement:** For optimal filtration performance and water quality, replace the main filter every 2 to 4 weeks. The replacement frequency may vary depending on the number of pets using the fountain, local water quality, and overall fountain usage.
- **Disposal:** Dispose of used filters and sponges according to your local waste disposal guidelines.

## TROUBLESHOOTING

- **Reduced Water Flow:** If the water flow from the fountain decreases, inspect the pump sponge and filter for blockages. Clean the sponge or replace the filter if necessary. Ensure the pump itself is clean and free of debris.

- **Unpleasant Water Odor or Taste:** If the water develops an odor or an unusual taste, it indicates that the filter's effectiveness is diminishing. Replace the filter immediately to restore water quality.
- **Visible Impurities:** If visible particles are present in the water, the filter may be saturated or improperly installed. Replace the filter and ensure it is correctly seated in the fountain.

## SPECIFICATIONS

<b>Brand</b>	NPET
<b>Model Number (Filter)</b>	PETDF20-FS-4PCS-US
<b>Compatibility</b>	NPET WF150 (DF20) Pet Water Fountain
<b>Material</b>	Polypropylene (PP)
<b>Filter Diameter (approx.)</b>	3.1 inches
<b>Sponge Diameter (approx.)</b>	3.3 inches
<b>Item Weight (per pack of 4 filters)</b>	3.7 ounces
<b>Filtration Stages</b>	5-stage (High-density sponge, Activated carbon, Ion exchange resin, Medical stone, Non-woven fabric)
