## 2. PRODUCT FEATURES

- **Analog Quartz Movement:** Equipped with an imported quartz movement for accurate timekeeping and extended battery life.
- **Chronograph Functionality:** Features a stopwatch with 1/10 second, minute, and second sub-dials.
- **Date Display:** Convenient date window for daily utility.
- **3ATM Water Resistance:** Designed to withstand splashes, rain, and brief accidental submersion. Not suitable for swimming or diving.
- **Enhanced Visibility:** Luminous hands and markers ensure readability in low-light conditions.
- **Durable Construction:** Scratch-resistant mineral glass and a robust stainless-steel case.
- **Premium Strap:** Genuine leather strap for comfort and style.

### 3. SETUP AND INITIAL OPERATION

#### 3.1 Identifying Watch Components

Image 3.1: Diagram illustrating the various functional components of the watch, including crown and pushers for time, date, and chronograph control.

## 3.2 Setting the Time

1. Pull the crown (middle button on the right side) out to position 2.
2. Rotate the crown clockwise or counter-clockwise to set the hour and minute hands to the desired time.
3. Push the crown back into position 1 to start the watch.

## 3.3 Setting the Date

1. Pull the crown out to position 1 (first click).
2. Rotate the crown clockwise to adjust the date.
3. Once the correct date is displayed, push the crown back into its original position.

**Note:** Avoid setting the date between 9 PM and 3 AM, as this may interfere with the automatic date change mechanism.

## 3.4 Using the Chronograph (Stopwatch)

1. **Start:** Press the top pusher (button A) to start the chronograph. The 1/10 second, minute, and second sub-dials will begin to move.
2. **Stop:** Press the top pusher (button A) again to stop the chronograph. The elapsed time will be displayed.
3. **Reset:** After stopping the chronograph, press the bottom pusher (button B) to reset all chronograph hands to their zero positions.

# 4. OPERATING GUIDELINES

## 4.1 Water Resistance

Your WeCool Fairwhale watch is rated for 3ATM (30 meters) water resistance. This means it is suitable for daily use and can withstand splashes, rain, and brief immersion in water, such as during handwashing. It is **not** suitable for showering, bathing, swimming, diving, or any water sports. Do not operate the crown or pushers when the watch is wet or submerged.

Image 4.1: The watch demonstrating its 30-meter water resistance against splashes.

## 4.2 Luminous Display

The hands and markers on your watch are coated with a luminous material. For optimal glow in the dark, expose the watch dial to a bright light source (natural or artificial) for a few minutes. The intensity and duration of the glow will depend on the exposure time and light intensity.

## 5. MAINTENANCE AND CARE

---

### 5.1 Cleaning Your Watch

- Wipe the watch case and crystal with a soft, dry cloth regularly to remove dust and smudges.
- For stubborn dirt, slightly dampen the cloth with water and gently wipe. Avoid using harsh chemicals or abrasive materials.

### 5.2 Leather Strap Care

- Avoid prolonged exposure of the leather strap to direct sunlight, extreme temperatures, and moisture, as this can cause discoloration, drying, or cracking.
- If the strap gets wet, gently wipe it dry with a soft cloth and allow it to air dry naturally. Do not use artificial heat.
- Periodically clean the strap with a specialized leather cleaner and conditioner to maintain its flexibility and appearance.

### 5.3 Battery Replacement

The watch is powered by a quartz battery. When the watch stops or the second hand starts skipping, it indicates a low battery. Battery replacement should be performed by a qualified watch technician to ensure proper sealing and water resistance integrity.

## 6. TROUBLESHOOTING

---

- **Watch Not Running:** Check if the crown is fully pushed in. If it is, the battery might be depleted and requires replacement.
- **Time/Date Incorrect:** Refer to Section 3.2 and 3.3 for instructions on how to correctly set the time and date.
- **Chronograph Hands Not Resetting to Zero:** If the chronograph hands do not return to their zero

position after pressing the reset button, a minor adjustment may be needed. Consult a professional watch repair service.

- **Condensation Inside Watch:** If you notice condensation inside the watch, it indicates a breach in water resistance. Stop using the watch immediately and have it inspected by a professional to prevent further damage.

7. SPECIFICATIONS

# WATCH PARAMETERS. SCIENCE RATIO

ERGONOMIC DESIGN

Parameters:

Mirror material:	Mineral reinforced coated glass
Product movement:	Quartz movement
Case material:	Metal material
Band material:	genuine leather
Case diameter:	44*44MM
